

**You Could Make 30% to 455% in
Profits**

EVERY SINGLE
WEEK

**Trading My Explosive Triple-Play
Stocks**

*Using My Proprietary MST Trader Alert
System,*

*You Can Identify the Day's BIGGEST
Winners AND Losers,*

***With up to an 82% Accuracy Rate... All in
Less Than Seven Minutes a Week***

Dear Investor,

I've done it.

I've figured out a way for you to triple your money in as little as one week -- using my NEW proprietary *MST Trader Alert System*. And the best part is, it's been right up to 82% of the time.

In fact, with my *MST Trader Alert System*, you could be pulling in profits of 31%, 44%, 54%, 103%, 147% and 455% on what I call "Triple-Play" stocks...in a matter of DAYS.

What exactly are Triple-Play stocks?

They are the little-known stocks on Wall Street that can rise 30% or more nearly every single day. You'll probably never hear about these highfliers in the news or read about them in *The Wall Street Journal*. And I guarantee your broker won't tell you about these gems -- because he doesn't want you to share in the profits.

But I'm not a broker. I want you to rake in the big money! That's why I've spent the last year and a half designing a system that could help you do just that. Imagine turning \$1,000 into \$3,160, \$5,000 into \$15,800, or \$10,000 into \$31,600 on each trade...on a very regular basis...no matter which direction the market's going. You could amass a fortune.

And if you'll stay with me for the next five minutes, I'll tell you how you can do just that... make a fortune...in less than seven minutes a week.

This is a real life pennies-to-millions fairy tale come true.

Know Which Way A Stock is Headed BEFORE

Anyone Else

How much money could you make if you actually knew which way the stock market was headed day in and day out?

You'd make a fortune. Guaranteed.

Unfortunately, no one can predict which way the market is headed every single day. And likewise, no one can tell you with 100% confidence if an individual stock will rise or fall. But using my *MST Trader Alert System*, you can identify the day's biggest movers and shakers up to 82% of the time.

That means you can know exactly which direction a stock is headed -- BEFORE almost anyone else.

And with a tool like that at your disposal, you're on the road to making huge profits every single week.

The Single Most Comprehensive System on the Market Today

Before developing my new *MST Trader Alert System*, I studied dozens of the most successful trading systems on the market.

Some use insider buying to predict big moves. Others use point-and-click trading. And still others use candlestick charting, money flow analysis, or even Elliott Waves...

On paper, they all sound good. But looking back at each system's performance records, I noticed that sometimes the indicators worked...and

sometimes they didn't.

On a whole, there didn't seem to be any consistency among them. And there certainly weren't any checks and balances to distinguish a real winner from simple market noise.

What I soon realized was that relying on just one indicator was too unpredictable, especially if that indicator was designed to work only in a bullish or bearish market.

I wanted a consistent indicator that worked in any market -- bull, bear or flat -- that could maximize your profits day in and day out.

That's why I designed the *MST Trader Alert System* around not one but three of the market's most trusted indicators, all working together, to pinpoint stocks ready to move up or down by at least 30%.

As you'll soon see, having these three indicators working for you is what I believe makes my *MST Trader Alert System* more powerful than any conventional trading system you're using right now. But more importantly, it reduces your risk and is very easy to understand. (Of course there is always risk involved in ANY trade. But the *MST Trader Alert System* minimizes that risk as much as possible.)

Finding the Day's Best-Performing Stocks

My three *different* indicators constantly scan 9,500 stocks...minute by minute...tick by tick. And the moment all three indicators give the same signal on the same stock, the *MST Trader Alert System* immediately notifies me that a Triple-Play is in the works.

As soon as a Triple-Play is triggered, get ready. Huge profits are almost

certain to follow.

If it's a bullish Triple-Play, I'll tell you the stock to buy. If it's a bearish Triple-Play, I'll tell you the stock to short. It's as simple as that. So, what exactly are the three indicators, and how do they all work together?

I'm glad you asked...

Momentum, Strength and Trend: The Three Keys to Identifying Triple-Plays With Uncanny Accuracy

The three key factors in determining a Triple-Play are Momentum, Strength and Trend.

When a stock has Momentum, Strength and Trend all moving in the SAME DIRECTION, watch out. These are the stocks that could make you money hand over fist in as little as a month, a week or even just a day.

Last year my *MST Trader Alert System* found 56 stocks with Momentum, Strength and Trend all moving in the same direction. Forty-six of those trades resulted in a gain. And not just any gain...**a gain of at least 30% or more.**

But that's not all.

My *MST Trader Alert System* identified the market's biggest winners up to 82% of the time!

That means you can feel confident this system works. In fact, of all the systems I studied, none came close to this success rate. Let me show you

the kinds of profits you can make with the *MST Trader Alert System*.

How to Turn \$500 to \$160,232.56

On Aug. 6, 2002, the *MST Trader Alert System* identified **Crown Cork and Seal (CCK: NYSE)** as a Triple-Play candidate. At the time, it was trading for \$4.03 a share.

Less than one month later, CCK was trading for \$6.96 a share. On Sept. 13, you could have sold out for a 72.7% gain. (More on how the *MST Trader Alert System* knew CCK was poised to rally later!)

And that 72.7% profit was just the beginning. After that, my *MST Trader Alert System* identified more winners, including...

- **455% gains on Medifast Inc. (MED: NYSE) in 53 days...**
- **31.5% gains on Glamis Gold (GLG: NYSE) in 44 days...**
- **147.4% gains on Alaris Medical (AMI: NYSE) in 84 days...**
- **43.3% gains on Exploration Co. (TXCO: NASDAQ) in 22 days...**
- **54% gains on Harvest Natural (HNR: NYSE) in 55 days...**
- **44.1% gains on IMAX Corp. (IMAX: NASDAQ) in 51 days...**
- **103% gains on Select Comfort (SCSS: NASDAQ) in just 38 days...**
- **And just a few months ago, the MST System made 59.2% on Durban Roodepoort Deep (DROOY: NASDAQ) in 35 days...**

That's an average gain of 112% on nine consecutive Triple-Plays. Starting out with just \$500, you could have grown it into a whopping \$160, 232.56 today.

As impressive as that sounds, that's only half of the system.

My *MST Trader Alert System* not only identifies stocks set to rally... it also identifies stocks set to fall. In fact, in addition to the nine consecutive winners above, my *MST Trader Alert System* also generated the following gains by shorting these Triple-Play stocks...

Starting out on Jan. 3, 2002, my *MST Trader Alert System* identified **Palm Incorporated (PALM: NASDAQ)** as a Triple-Play candidate. Trading for \$4.37 a share, my system said PALM was poised for a big-time nosedive.

Just 35 days after the Triple-Play was triggered at \$4.37 a share, PALM was trading for \$2.98 a share, and my *MST System* had uncovered another 31.9% winner...

After seeing 31.9% gains on PALM, my *MST Trader Alert System* followed up with even more profits, like...

- **Shorting Beverly Enterprises (BEV: NYSE) for 55.9% over 19 days...**
- **Shorting Cordiant Communications (CDA: NYSE) for 45.9% over 98 days...**
- **Shorting Extencare Incorporated (EXE.A: NYSE) for 24.7% over 29 days...**
- **And most recently, shorting Aeropostale (ARO: NYSE) for 55.9% gains over 28 days...**

That's an average gain of 42.9% on five more Triple-Plays. Starting with just \$500, you could have grown it to \$2,916.28 shorting the "losers" I just mentioned.

When you put all of these up and down Triple-Plays together, you're looking at some serious profits. **In fact, a \$1,000 investment December**

2001 could've grown to over \$157,000 today... simply by following my *MST Trader Alert System's* Triple-Play indicators.

That's a lot of money. Enough to change the way you live.

And that's not even all of it. I have a huge list of even more Triple-Play winners to show you. But before I do, I want to make sure you understand how my *MST Trader Alert System* has consistently picked winner after winner.

Spot a Trend Before Anyone Else

If you knew which way a stock would trade day in and day out, you could amass a fortune trading with the trend. If a stock is in an up trend, you go long. And if a stock is in a downtrend, you short it.

Simple, right?

You bet. And the *MST Trader Alert System* can spot a stock's trend BEFORE just about anyone else.

It identifies a stock's Trend by using what is called a Moving Average

Convergence Divergence indicator. It sounds complicated, but it's not. I promise.

An MACD indicator is made up of two lines: a quick-moving line (also known as the MACD line) and a slow-moving line (known as the Signal line).

When the MACD line crosses above the Signal line, an upward trend is forming. In other words, the bulls are winning out. And that's an opportunity for you to make some quick and predictable profits by going long.

But as you know, big money can be made just as easily by shorting stocks headed down.

When the MACD line falls below the Signal line, a downward trend is forming. In other words, the bears are winning out. And when that happens, you can bet the stock's price will plummet.

The MACD indicator constantly scans over 9,500 stocks a day looking for the few that have a strong trend -- up or down. And when it finds them, you are one-third of the way to a Triple-Play -- and one-third of the way to substantial profits.

Take a look at this recent example in **Select Comfort (SCSS: NASDAQ):**

In late August 2002, both the MACD and the Signal line were headed up for Select Comfort. And as you can see, just after the two trend lines crossed, SCSS rallied from \$4 a share to \$8.12 a share. That's a quick 103% gain.

The same principle applies to bearish trend formations. As soon as the Signal line crosses back over the MACD line, sentiment is reversing and you'll see a bearish pattern forming.

But remember, spotting a trend is simply one of the three Triple-Play indicators. Two more criteria must check out before it's a Triple-Play.

After Locating Stocks Showing Trend, My *MST Trader Alert System* Looks to Indicator #2...Strength

There are very few guarantees in life. But I CAN guarantee you one thing: If you always trade in the direction of a stock's trend, you will make money every single time. The only problem is, it can take months...sometimes even years to cash in on the profits.

I want you to profit in weeks or days...not years. That's why I invented the *MST Trader Alert System*.

One way to make quick profits of 30% or more is to find the stocks with strength on their side.

The stocks that trade up or down with a lot of strength are the stocks that will move quickly. And that means you can get in, get out and walk away with some serious cash -- all before the rest of Wall Street even knows what hit them!

My *MST Trader Alert System* identifies Strength by monitoring, in real time, the changes in a stock's closing price over a 14-day period. In the technical analysis world, this is commonly referred to as *Relative Strength*.

Relative Strength fluctuates between 0 and 100. When a stock has a strength reading below 50, it is said to be "oversold." These are your bargain stocks -- the ones waiting to rise up quickly and explosively.

The *MST Trader Alert System* looks for the oversold stocks with rising strength. When it finds one, you are just around the corner from huge profits.

Likewise, my strength indicator also finds the stocks that have a reading above 50. These are your "overbought" stocks that are doomed to fall...quickly.

When the *MST Trader Alert System* spots an overbought stock with declining strength you can be certain it will fall 30% or more in a few days.

The best way to show you how the Strength indicator works is by looking

at a recent Strength chart. Here's an example of how my *MST Trader Alert System* identified rising strength in **Select Comfort (SCSS: NASDAQ)**...

On Sept. 9, 2002, SCSS was trading for \$4.20 a share. The MST Strength screener went off as soon as SCSS had crossed above the 50 line...which resulted in SCSS rallying 103% in less than two months.

When you have trend and strength on your side, you are two-thirds of the way to a Triple-Play. In all honesty, most traders would be thrilled to make just 50% in less than 60 days. But the *MST Trader Alert System* wasn't built with the average trader in mind. It was built for the trader who wants to rake in HUGE profits in a short amount of time...

That's why I designed the system to incorporate one more essential component...

The Final Piece of the Triple-Play Equation Is Momentum

How many times have you watched a basketball, football, baseball or hockey game and heard the announcer say, "This team has momentum on

their side. They're unstoppable!"

When a team has momentum on its side, everything is clicking. The offense is scoring at will. And the defense is like an iron curtain -- nothing gets past it. It's a winner.

You should feel the same way about your trades. You want that unstoppable trade -- the one that doubles or triples and then keeps on going. You want a stock with momentum on its side -- a real winner.

The *MST Trader Alert System* finds the winners for you by identifying stocks with momentum on their side. It tracks the relationship of a stock's closing price relative to the stock's high or low trading range over a five-day period. In technical talk, this is called a Stochastic Oscillator.

By studying a stock's stochastic reading, the *MST Trader Alert System* shows you when bulls or bears become stronger or weaker, which often times leads to upwards or downwards pricing momentum.

The Stochastic Momentum Oscillator gives a reading between 0 and 100. My *MST Trader Alert System* scans the market for stocks registering a bullish momentum reading under 25, which means a stock is significantly OVERSOLD and ready to rise, and stocks registering a bearish momentum reading over 80, which represents a stock that is significantly OVERBOUGHT and doomed to fall.

Take a final look at the **Select Comfort** chart and you'll see what I mean:

72.7% profits once the Triple-Play was triggered

In mid-August, my *MST Trader Alert System* noticed that the fast stochastic momentum line in SCSS had crossed over the slow stochastic momentum line...all while SCSS had a momentum reading under 25.

This is when the *MST Momentum* screener alerted traders to a bullish pattern forming in SCSS. At the time, SCSS was trading for \$4 a share. A month after the Momentum Screener turned bullish, SCSS was breaking through \$8 and heading for \$9.

My *MST Trader Alert System* also scans for stocks exhibiting bearish momentum the same way. When the two stochastic momentum lines cross with a reading over 80, that's exactly when my *MST* momentum screener signals that a stock is due for a downturn.

But don't worry about any of the details. I'll take care of all that. Each Friday, I'll let you know exactly what stock to trade and why. I'll show you the charts. And I'll give you the analysis. All you have to do is call your broker and wait for the profits to pour in.

Here's what you can expect.

Put All Three Trends Together, and You've Got a Triple-Play Winner up to 82% of the Time

As you can see, all three indicators by themselves make up very powerful forecasting tools. But when you put them together, you get a Triple-Play winner up to 82% of the time. That's where you can really make the huge profits.

And I'm not talking about 5%, 10% or even 20% profits. I'm talking 30%, 75%, 100% and 455% profits...just like the *MST Trader Alert System* found with Glamis Gold, Crown Cork and Seal, Select Comfort and Medifast Inc.

The Formation of Crown Cork and Seal's 72.7% Triple-Play Winner Went Like This...

Crown, Cork and Seal is one of the best examples of how a Triple-Play works.

- The Momentum Indicator was the first to turn bullish on CCK on

July 26, 2002...

- The Strength Indicator popped up as bullish on July 31...and two out of the three pieces of the Triple-Play were in place.
- The Trend Indicator registered as bullish on Aug. 6, and the Triple-Play was officially triggered.

As you can see from the chart, CCK was trading for \$4.03 when the Triple-Play went into effect. Over the next month, CCK rallied to nearly \$7 a share...and anyone who bought it made almost 73% in profits by mid-September.

Select Comfort's 103% Triple-Play Winner Looked Like This

Select Comfort is another example of how my *MST Trader Alert System* puts all three indicators together to form a Triple-Play winner.

- The Strength Indicator was the first to signal a buy on Sept. 5, 2002...
- The Momentum Indicator said buy on Sept. 6...
- And the Trend Indicator capped off the bullish play later on Sept. 6...

The Triple-Play officially took shape at \$4 a share. Less than two months later, Select Comfort was trading for \$8.12, and you could have sold for a 103% gain.

Durban Deep's Triple-Play Was Also Very Explosive

Durban Deep is an example of how quickly a stock responds when all three Triple-Play indicators line up.

- The Strength Indicator signaled BUY on July 31, 2002 at 10:05 a.m....
- The Trend Indicator said BUY a few days later on Aug. 8 at 1:45 p.m....
- The Momentum Indicator signaled on Aug. 20 at 3:15 p.m. and the Triple-Play began...

You could have bought shares of DROOY for \$4.26 a share. Two months later, Durban Deep rallied up to \$6.78 a share, and MST Traders would have cashed out of DROOY on Sept. 24 for a 59.2% profit.

Which brings me to an important point...

Ride the "Triple-Plays" for What They're Worth...Then GET OUT!

Crown Cork and Seal, Select Comfort, and Durban Deep Corp. are three perfect examples of how you can profit using my proprietary *MST Trader Alert System*.

But it's important to know that this is purely a trading strategy. When a Triple-Play hits, ride it until my *MST Trader Alert System* tells you that the fervor is fading. Then get out with whatever profits you may have. (And don't worry, I'll send out an Alert letting you know exactly when to take your profits off the table.)

Sometimes you'll be rewarded with 455% gains, like the profits Medifast Inc. produced. Other times you'll make 59.2% in a month like Durban Deep, or even 55.9% in 18 days following a Triple-Play bearish indicator, as you will see in a moment...

My point is, you're only in for the explosive ride up or down. Usually it's a quick one. But it's never a "buy and hold" situation.

Something else to remember. Trading using the *MST Trader Alert System* is not passive.

It's fast-paced. It's exciting. And the potential for big, fast, and consistent gains is tremendous.

Let Me Give You Another Example

Take a look at our Triple-Play on **Beverly Enterprises, Inc. (BEV: NYSE)**...

Beverly Enterprises is an example of how the *MST Trader Alert System* identifies stocks ready to take a fall.

- The Momentum Indicator was first to pop up bearish on July 3, 2002...
- Next came the bearish Trend Indicator on July 17...
- The Strength Indicator completed the bearish Triple-Play short recommendation on July 18...

MST Traders could have shorted BEV at \$6.85, and less than one month later, closed out the position at \$3.02, a gain of 55.9%.

Aeropostale's (ARO: NYSE) Triple-Play Was Just as Profitable

Our Aeropostale trade shows you just how explosive the Triple-Play sell-offs can be.

- Momentum gave the first sign of weakness on Sept. 10...
- Strength chimed in with a bearish indication on Sept. 11...
- And Trend confirmed them with a bearish indication on Sept. 20...

The Triple-Play short was indicated on (ARO: NYSE) at \$19.15 a share. After a handful of violent sell-offs, you could have covered at \$8.44...and bagged another 55.9% winner in just 28 days.

From December 2001 to Fall 2002, my *MST Trader Alert System* has identified 56 stocks as "Triple-Plays." Of those 56 stocks, 46 of them have resulted in moves of + or - 30% within 90 days. You must agree, that's awfully impressive. If all three *MST* indicators match up, then you know that the odds are in your favor for explosive profits.

Does the Trend Check Out? Does the Strength Check Out? And Finally, Does the Momentum Check Out?

I could go on and on with example after example showing you how the *MST Trader Alert System* could make you rich, but I think you get the picture. When all three indicators go off, that's when profits are close at hand...

And that's when you can expect an instantaneous e-mail alerting you to the opportunity ahead. If you think making a 50% gain is fun, imagine making over three times your original investment following the same surefire signals...

That's exactly what happened with **Medifast Inc.** "Triple-Play," which resulted in a 455% gain after being selected by my *MST Trader Alert System*. And then there was the 44.1% you could have made buying

IMAX...or the 55.9% you could have made shorting BEV...

Tested, Proven and Fine-Tuned in One of the Toughest Markets in Recent Memory... The System Works!

The last year and a half of extreme market volatility has proven to be an excellent proving ground for the *MST Trader Alert System*. And judging from the gains we've made both on the upside and on the downside, Momentum, Strength and Trend have proven to be valid, consistent and valuable trading tools.

By becoming a subscriber to my *MST Trader Alert System*, you'll be the first to know about each and every Triple-Play stock that could make you at least 30% profits up to 82% of the time.

Of course no system is full-proof. Don't let anyone convince you otherwise. Will the *MST Trader Alert System* always work 82% of the time?

Who knows?

But that doesn't matter. All that matters is that you make more (and I mean significantly more) on your winners than you lose on the few trades that go south. And the *MST Trader* is geared to do just that.

Remember, it uses THREE powerful technical indicators to locate each potential Triple-Play stock. That means you have a built-in series of checks and balances to give you the best chance to minimize any risk and maximize your profits.

Trading like this isn't guesswork. With up to an 82% accuracy rate, you can almost bank on making huge profits one regular basis, like...

- **72.7% profits on Crown Cork and Seal...**
- **455% gains on Medifast Inc...**
- **31.5% gains on Glamis Gold...**
- **147.4% gains on Alaris Medical...**
- **43.3% gains on Exploration Co....**
- **54% gains on Harvest Natural...**
- **44.1% gains on IMAX Corp....**
- **103% gains on Select Comfort...**

And many, many others...

A System Immune to Market Manipulation

I must confess, my *MST Trader Alert System* recommends many Triple-Play companies you may have never heard about. And with the first few recommendations, you'll most likely ask yourself, "Do I really want to trade this company?" That's a typical and honest reaction.

Given all the market corruption in the last few years, I don't blame you for being skeptical about investing in companies you've never heard about. That's why I've designed my *MST Trader Alert System* around three indicators immune to market manipulation.

Strength, Trend, and Momentum readings are generated using complex mathematical models. They cannot be altered, messed with, or influenced by greedy Wall Street brokers and their network of "good old boys."

For example...

A stock's Trend is indisputable...

A dirty accountant can't fudge a Strength reading...

And Ken Lay can't secretly tell Martha Stewart insider Momentum info...

Once you watch Triple-Play stock after stock quickly shoot up or down in the days and weeks that follow, you'll stop doubting and start enjoying the ride. (In fact, one recent Triple-Play recommendation jumped from \$5.15 a share to \$7.35 in just seven trading days.)

Which brings me to another important matter. There is a strict limit to the number of investors who can subscribe the *MST Trader Alert System*.

The companies you'll most likely be trading are smaller-cap stocks. That means it doesn't take a lot of volume to drive the prices very high, very quickly. But that's not the way we want to profit. We want to get in right as the Triple-Play hits and let the resulting market conditions take the stock up or down.

That's why it is absolutely necessary that I limit the number of people I reveal the Triple-Play trades to.

But the good news is, I've reserved a spot for you...

A Very Limited and Time-Sensitive Opportunity

To get started, all you need to do is let me know and you're in. But I urge you to act now, because at the price I'm offering, those spots will fill up fast.

Logic would tell you that anything less than, say \$5,000, would be a

bargain for the *MST Trader Alert* service -- especially since a \$5,000 investment in Medifast Inc. alone would've netted you \$27,750 in just days.

But a subscription to my *MST Trader Alert System* won't cost you \$5,000. It won't even cost you \$2,500. To become a subscriber today, and to begin receiving your real-time Triple-Play alerts and weekly updates by e-mail, you need to pay only \$695.

That's a great value. Remember, a \$5,000 investment in just Crown Cork and Seal, Select Comfort, and Medifast Inc. would have turned into \$97,286.23. That's enough to pay for your subscription 139 times over!

For your money, you get the *MST Trader Alert System* monitoring 9,500 stocks or more each and every trading day, constantly watching every last one for Trend, Momentum and Strength...and alerting you the minute all three line up.

Of course, I can't promise you how many Triple-Play opportunities will arise -- that's for the markets to decide. But I can tell you that, we've had as few as two trades and as many as eight trades each month. There's no telling what future months will hold. But I can promise you this:

When a Triple-Play recommendation comes by e-mail, though, it's because my *MST Trader Alert System* feels it represents the very best opportunity the market currently has to offer to make a substantial amount of money in a very short period of time.

Remember, the *MST Trader Alert System* identified a total of 56 Triple-Play candidates... and 46 of them have moved as predicted. And that means you could have made 30% or more in profits on 82% of these recommendations.

Check Out the *MST Trader Alert System* on a 30-Day Trial Basis

I am so confident that you will make HUGE profits using my *MST Trader Alert System* I'm going to make you an offer no one else would dare to make.

I will let you use my *MST Trader Alert System* on a trial basis for 30 days. You'll have full access to the weekly alerts, the Web site and your **FREE** report called: "**Technical Analysis 101: Understanding the *MST Trader Alert System*.**" Here's how it'll work.

When you sign up, you will be billed \$175 -- which is roughly one-fourth the full \$695. And if for any reason you are not completely satisfied with the *MST System* during that 30-day trial period, I'll refund you every penny -- the full \$175.

This will give you 30 days to check out the service on a trial basis, while still getting a chance to participate in all of Triple-Play recommendations.

I'm willing to make you this free 30-day offer because I'm so confident that, like many nervous and skeptical subscribers before you, you'll quickly see just how much money you can make in a short period of time.

From then on, we'll automatically bill your credit card \$175 each quarter until you tell us to stop. I don't normally make this deal available, but I'm offering you this special arrangement because I don't want a few dollars to come between you and the wonderful opportunity that my *MST Trader Alert System* offers.

But I urge you to make your decision quickly. Given the outstanding

success our Triple-Play stocks have enjoyed throughout this year, I suspect that interest in this opportunity will be enormous. Please don't risk losing your chance to get in on the action.

To Ensure You're on Top of Every Triple-Play Trade...

Once you've signed up, here's how you can expect the "procedure" of the *MST Trader Alert System* to work.

The instant all three Strength, Trend, and Momentum indicators line up and a Triple-Play opportunity arises, you'll receive an e-mail alert. As you've already seen, once all three indicators line up, stock prices are ready to take off -- either up or down -- usually in a matter of days.

That's why you'll have an instant trading alert in your e-mail in-box with all the details the very minute a Triple-Play takes shape.

Same thing goes for when it's time to get out.

It's absolutely critical that you get out when the profit run is over. Don't get greedy. Don't try to squeeze every last dollar out of the trade. Remember, even after a Triple-Play is triggered, my *MST Trader Alert System* will continue tracking the Strength, Momentum, and the Trend of the stock very closely. As soon as *MST* shows evidence of any one of the three indicators reversing, you can expect another alert, telling you it's time you get out.

All told, reading the e-mail alert and taking the appropriate action will take you no more than seven minutes. I'll tell you in plain English what the Triple-Play stock is...how the Triple-Play was formed... and how to profit

off it. There's not one ounce of guesswork for you. Everything you'll need to know about the Triple-Play trade will be spelled out to the letter. But I'm getting ahead of myself. First, you have to sign up.

If you're ready to get started, here's what you need to do right now...

Decide now if you want in on the *MST Trader Alert System*. We are accepting new subscribers on a first-come, first-served basis until our limit is reached.

Once you sign up, you will have a full 30-day trial period to make sure the *MST Trader Alert* is right for you. If you aren't completely satisfied with the service and profits, I'll be happy to surrender your spot to someone else -- and give you a full refund.

If you're happy with the system and the profits generated by it, then we'll automatically bill your credit card \$175 each quarter until you tell us to stop.

To get started today, simply click the "Subscribe Now" button below to enroll immediately to help guarantee your spot.

Waiting one day longer could be the difference between being "in" on the next big Triple-Play move or missing out all together. Make a modest, intelligent investment on your future wealth. Subscribe to the *MST Trader Alert* today.

Sincerely,

James Boric
Editor and Creator, *MST Trader Alert*

P.S. As a subscriber to my *MST Trader Alert*, you just don't profit from the Triple-Play stocks, you get to learn the details of them inside and out. With your subscription, you'll also get our new "Triple-Play Trader's Handbook" that explains the precise inner-workings of my *MST Trader Alert System*. It's a technical look inside the Strength, Trend and Momentum indicators titled "**Technical Analysis 101: Understanding the *MST Trader Alert System*.**"

Your copy will be sent to you the day after we receive your order. And no matter if it's a year's subscription or a 30-day free trial, the new handbook is yours to keep forever. So don't delay. Subscribe today, and become a better, more profitable Triple-Play trader for life!
