

# Grow Rich as the Dollar Declines

With the trade deficit soaring, economists expect the U.S. government to continue its weak dollar policy for at least another 18 months. That gives you plenty of time to rack up practically guaranteed gains by trading foreign currencies that tend to go up as the dollar goes down.

In your Free Report, Grow Rich as the Dollar Declines, you'll discover a safe, simple way to convert American dollars into Mexican pesos, Swiss francs or Norwegian Krone and begin earning annual yields double or even triple U.S. rates.

Investing in foreign currencies can help you:

- Build global wealth with higher yields and capital gains as the dollar declines
- Lock in interest rates 150% to 233% higher than U.S. banks
- Reduce the overall risk and volatility of your portfolio

You'll be surprised how easy it is to build Global Wealth using foreign currencies - and how quickly your money can grow.

Growing your money faster is remarkably easy once you understand that there are 7 different ways to build wealth. Once you master my simple 7-step system, you won't have to worry about where the stock market is headed or whether you'll have enough money to live on when you retire.

Millions of Americans counted on the stock market to secure

their future, only to watch in horror as the Tech Wreck evaporated their gains. They made the one big mistake you've been warned about since you were a child - don't put all your eggs in one basket.

**gains on foreign  
investments skyrocket.  
Learn how to profit with  
almost no risk!**

Many people think they're "diversified" if they invest in a broad-market index fund. They believe their money is safe sitting in a 1% CD. Meanwhile, most index funds haven't earned a penny this year, and inflation will turn that 1% gain into a 2.5% loss.

People like to invest in the devil they know. Mention other investment choices like options or foreign currencies, and they step back in fright.

"Not for me."

"Too risky."

"I'll stick with what I know."

Investors who chose to "stick with stocks" when the dot-com bubble burst saw their portfolios shrink by as much as 70%. Many are still waiting for the market to retrace its steps, so they can recoup the money they've lost.

They may have a long wait.

## **A 100-Year Bear Market?**

The Tech Wreck that began in March 2000 ushered in one of the worst stock market declines in history. More than \$3 trillion in investor wealth evaporated in less than a year.

Some of that wealth belonged to you, didn't it?

In the roaring '90s, returns of 20%, 30%, 50% or more became average. A monkey throwing darts could have tripled his net worth in five years. It was fun while it lasted!

Then POOF! Everything went belly up.

Four years later, the DOW is trading 1,800 points below its all-time high of 11,750. The Nasdaq has lost 61% of its value. And so far this year, the market has completely flatlined, ending the 3rd quarter almost exactly where it started on January 1.

Not to worry, your financial advisor will say. Be patient! The market always rebounds. Over the long haul, stocks always trend higher. It just takes time.

How long can you afford to wait? 10 years? 20? 30?

What if it takes 100 years for stocks to regain lost ground? That's the timeframe one celebrated analyst projects.

Robert Prechter has a long track record of making outrageous predictions that flout conventional thinking and contradict the majority of his peers.

He also tends to be right on the money.

In the late 1970's, the DOW was hovering around 800 and interest rates were on a steep uphill climb. My parents signed a 30-year mortgage at 22%. Many investors were stuffing cash in mattresses rather than risk potential losses.

Prechter saw things in a different light. He stepped away from the pack, predicting a "raging bull market" that could last ten years or more.

This time, he was more than right.

The bull market that began in 1982 actually lasted two decades, during which stock prices rose more than 1,000%. Financial News Network named Prechter the "Guru of the Decade."

Now this Guru is warning stockholders the worst is yet to come.

## **The Perfect Storm Could Send Stocks in a Tailspin**

The world has changed since the glory days of the dot-com era.

Technology no longer drives economic growth. Oil prices topped \$55 a barrel. Americans struggle under the burden of \$51 trillion in debt. And we're at war with an enemy that has no face, no nation, and no apparent desire for peace.

We're living in dangerous times. People are afraid.

And fear makes people do strange things.

Think back to the spring of 2000. The Nasdaq was in free fall. Between March 10 and April 14, tech stocks shed a breathtaking 34% of their value. Yet investors held on. In fact, many very smart people bought even more shares of doomed companies like Enron, Worldcom, and Global Crossing.

They grabbed for the falling knife.

People want to believe everything will be all right. It'll turn around. The sun will come up tomorrow.

But what if it doesn't?

Today, we're living with the constant threat of terrorism... massive deficits... a sideways

market... and the prospect of 77 million baby boomers cashing out of the system in a few short years. It's a gloomy picture. And, if the "Guru of the Decade" is right, it could mean financial disaster for millions of Americans.

The only way to protect your family from financial collapse is to make sure you're not counting on any one source of wealth to sustain you. In fact, you need to be drawing income from seven different sources to fully diversify your wealth and safeguard against potential losses in the market.

That's where step 6, Real Wealth, can be your best friend.

### **Golf Course Gurus Reveal The Most Powerful Wealth-Building Secret in the World**

Our foursome had just finished the 7th hole. I was six strokes behind, but I didn't care. I was just happy to be there.

I was playing with three men whose combined net worth topped \$500 million. And they were talking about money. Specifically, how to make more of it. I held my breath and prayed they would not stop talking.

Over the next hour and a half, I learned more about building wealth than I've learned from any seminar or self-help book. I discovered powerful secrets and simple strategies anyone can use to dramatically increase investment gains while actually reducing risk.

And I realized something strange. There was nothing special about those men.

They weren't born rich. They didn't go to ivy league schools. They didn't have some mysterious talent for making money. They were just like you and me.

On the golf course that day, those three wise men revealed the most powerful wealth-building secret in the world: Anyone can be rich. What are you waiting for? Start today

Real Wealth comes from hard assets like property and precious metals, things that have intrinsic value and can generate revenue. Profits from Real Wealth often rise when stock prices are falling. Real estate values have tripled in the four years since the stock market crashed.

One classic type of real wealth has also been gaining in value over the past few years, and some experts believe it has a long way yet to go.

The Olympics may be over, but there's still plenty of time for you to "go for the gold."

## **Grow Rich in the Next Gold Rush!**

I mentioned earlier that the value of the American dollar has been declining for the past three years. We're four years into a bear market in stocks that could last until the next century. Foreign investors are pulling their money out of U.S. Treasuries at a rate we haven't seen in over forty years.

But one investment sector has been on fire, vaulting an incredible 65% since 2002.

Over the past year, gold prices have jumped from \$380 an ounce to \$426, and most gold experts fully expect prices to top \$500.

This quiet ride has been almost ignored by the general media, much to the dismay of

Real Wealth investors. Only about 3% of all investors own gold.

That means recent gains in gold prices are actually lower than they could be - and much lower than they will be when hungry investors realize we're on the brink of a new gold rush.

To begin building Real Wealth in gold, start with your Free Report, The Coming Gold Rush. You'll discover why most experts who specialize in precious metals are predicting a major bull market in gold over the coming months.

- See why rising oil prices, the falling dollar and declining Treasury yields forecast a booming bull market in gold.
- Discover the easiest - and safest - way to invest in gold.
- Find out which gold stocks will skyrocket as more money flows into Real Wealth.
- Earn 2,000% on a single "junior gold stock."
- Get insider tips to increase your returns from gold coins, bullion and "paper gold."

As investors flee the stock market and bond prices plummet, the price of gold will almost certainly rise. With your free copy of The Coming Gold Rush, you'll be one of the first to prosper. Now let me tell you another way to build Real Wealth that may surprise you...

Did you know you can make money by paying other people's taxes?

## **Pay more taxes and pocket 50% returns**

This year, in stuffy meeting halls and forgotten back rooms in over 3,100 government

buildings nationwide, billions of dollars in low-risk, high-yield certificates will be handed over to a tiny group of very happy, very rich investors.

Each certificate carries a guaranteed interest rate of 12%, 15%, 24%, even 50%. Each certificate is guaranteed by the government. And each certificate is secured by real property, which makes this an easy way to begin building your Real Wealth.

For those "in the know," just one of these certificates can deliver returns as high as 230% in a few short months.

Naturally, major players in the financial industry - insurance companies, institutional investors, and America's super-rich - fought hard to keep this powerful money-making program their own little secret.

Now you can join the private party, too.

In your Free Report, Grow Rich with Government-Issued Secret Certificates, you'll learn how people just like you are cashing in on the biggest government giveaway in history - making money by agreeing to pay other people's taxes.

Wealthy investors routinely take advantage of this simple strategy to lock in guaranteed double-digit returns just by being in the right place at the right time.

Wall Street has kept this secret hidden for years, because this investment is absolutely commission-free. Brokers don't make a dime,

## How Do You Plan to Get Rich?

What's the best way to become wealthy?

Most people would answer: Work harder. The more you work, the more earn. The more you earn, the more you can save.

It's the American way. From an early age, we're taught to value "honest work for honest pay." We look down on slackers who squeak by without doing their fair share. We don't want to be seen as lazy. Idle hands are the devil's playground.

We idolize self-made men and women who (we assume) hammered and clawed their

way to massive wealth. Bill Gates, Sam Walton, Oprah Winfrey. They started with nothing, and look how much they have now.

Work harder and someday you could be the next Bill Gates.

At the very least, you'll get a raise and make more money next year... if the company's doing well.... if there's enough money in the budget.... and if your boss thinks you deserve a raise.

But let's take a step back. Bill Gates, Sam Walton, Oprah Winfrey... Did they really get wealthy by increasing their salaries every year?

In 2003, Microsoft paid Bill Gates a salary of \$865,114. Nothing to sneeze at. But that same year, his total annual earnings were about \$7.72 billion.

Bill Gates' salary contributed less than 1% of his annual income.

The truth is: Most hard working people never get wealthy. And most wealthy people don't work very hard.

Here's another fact: When wealth people do choose to work, you can bet they're working

## **Wealth-Crushing Mistake #4: STOP Asking Your Boss for a Raise!**

**Most Americans believe in working hard, because they believe hard work pays off.**

**CNNMoney reports that employers plan to dole out raises averaging about 3.6% next year. Inflation is expected to come in around 3.5%.**

**What do you plan do with that 0.1% windfall?**

**A raise may help you cover the growing cost of living - just barely - but don't let compensation committees and bean counters determine how much money you can earn.**

**Before you ask your boss to raise your salary by 1% or 2%, discover**

for themselves. Starting a business is one of the most powerful ways you can take control of your financial future.

**how you can increase your  
income next year by as much as  
100%.**

Think about it... Bill Gates, Sam Walton, Oprah Winfrey... and most of the world's richest people all got where they are now by following step 7 - building Enterprising Wealth.

## **Self-Made Millionaire - Your Guide to Independent Wealth**

I think each of us secretly dreams about quitting the 9-to-5 rat race and going it alone.

Starting a business gives you the freedom to plan your own time and the power to decide how much money you want to earn. Ask anyone worth more than \$100 million, and he'll tell you the only sure way to wealth is to be your own boss.

If you've ever dreamed of telling the boss to "take this job and shove it," you have everything it takes to begin building Enterprising Wealth. And it's a lot easier than you might think.

You don't have to train to be a four-star chef or spend hours in the basement inventing a better mousetrap before you can start your own successful company. You can launch a million-dollar business from home, after work and on weekends, with almost no seed money.

In your Free Report, Self-Made Millionaire - Your Guide to Independent Wealth by Starting Your Own Business, you'll get a practical, step-by-step plan that will help you become an independent, high-income entrepreneur. This powerful report was written by a multi-millionaire who has started and run dozens of successful businesses.

Imagine earning a six-figure income while working just a few hours a week. Picture yourself taking control of your time, working only when you want to work, and still earning double or triple what you make in a 40-hour week.

Your free report, *Self-Made Millionaire - Your Guide to Independent Wealth by Starting Your Own Business* shows you the proven techniques used by independent business owners who started with nothing but the desire to be their own boss. If you follow the simple strategies revealed in this exclusive report, you will be on your way to earning \$100,000 in less than a year.

- Discover how you can start your own business from home with almost no up-front investment.
- Brainstorm ideas for products and services that cost pennies to produce and that people will pay \$40, \$75 even \$100 to purchase sight unseen.
- Get 11 rules to guarantee your success as an entrepreneur.
- Learn the secrets of your service to trounce the competition for maximum return.
- Make millions even if only 5 people out of 100 buy your product!

It will take you less than an hour to read *Self-Made Millionaire - Your Guide to Independent Wealth by Starting Your Own*. By the time you finish this fascinating report, you'll have generated at least a dozen ideas for your new business, and you'll have an action plan for making your first sale.

Once you start to grow your Enterprising Wealth, you'll begin to see yourself as an entrepreneur. You'll gain the confidence that comes with being completely self-sufficient and knowing you

**Build  
Enterprising**

don't have to rely on anyone else.

You'll start to see yourself in a whole new way.

You'll also begin to realize that building Enterprising Wealth provides new opportunities to expand your income and protect your assets from the taxman. There are hidden advantages to owning a business that can deliver immediate financial returns.

One of the first things you'll want to do is to identify the best legal structure for your business.

Wrap a Teflon Shield around Your Wealth

The two biggest threats to your growing wealth are liability and taxes. Just one lawsuit filed by a clumsy neighbor who slips in your driveway can wipe out your fortune instantly. And whatever's left will mostly likely end up in the hands of Uncle Sam.

You can protect against both of these threats by adding three little letters after your name (or the name of your new business): Inc.

When you incorporate, it's like wrapping a Teflon shield around your personal wealth. Lawyers and the taxman can't get at it, no matter how hard they try.

- Protect your assets and shield your personal wealth from a potentially devastating lawsuit

When you woke up this morning, I bet the last thing on your mind was self-incorporation. Yet here you are, imagining how great it would be to have that kind of freedom and control over your time, your family's security and your financial future.

It's closer than you think. Say the word, and I'll send you 14 exclusive reports that will show you, step-by-step, how to stop saving money and start building real, lasting, massive wealth.

And you don't have to send me a penny.

### **Wealth-Crushing Mistake #5: STOP Prepaying Your Mortgage!**

**I still remember the day my Grandpa burned his mortgage in the back yard. Like many Americans, he wanted to be "debt-free." But there's bad debt and there's good debt. Historically low interest rates make a home mortgage a great way to free cash for investment and still enjoy the comfort - and capital appreciation - a home affords.**

**Take a look at your financial "big picture" so you can make decisions that will maximize the value of your assets and help you achieve your goals faster.**

## What's the Catch?

I know you're skeptical. It's only natural. When I tell people about my 7-step system for building wealth, there's always someone in the crowd who insists, "Oh, I can't do that."

"I have too much debt."

"It sounds complicated."

"I don't have time."

Nothing could be farther from the truth.

You can begin building wealth right now - even if you're worried about money. In fact, that's the perfect time to take control of your finances and make the simple changes that will put you on the road to financial freedom.

True Story: I showed these free reports to one of the richest people I know, a self-made man who banked his first million before he turned 27. Today, he owns several homes, runs four successful businesses, and tours the country sharing his wealth-building tips at exclusive seminars.

After reading them, he actually accused me of spying! He said, "These reports read like my autobiography! I took the same exact steps when I was starting out - only I made it up as I went along. This collection of reports would have saved me a lot of time and heartache."

Then he said, "Are you sure you want to give these reports away for free?"

I told him I'm giving away this valuable information because people need it. I just read a warning from the Employee Benefit Research Institute that American retirees will have \$45 billion less in retirement income in 2030 than they will need just to cover basic expenses!

There's no time to waste.

Too many investors were hit hard by the Tech Wreck and the recession. Too many hard-working Americans are going to have to work even harder to live comfortably. Too many retired folks are going back to work just to make ends meet.

If you're worried about your future... If you want to be sure you have enough money to retire... If you hope to live a lifestyle that allows you to enjoy the finer things without worrying about how you'll pay the bill.
