

We've Just Located 4 NEW One-Day Wonder Stocks That Are Poised for Unbelievable Gains Very Soon -- We'll Rush You Our FREE Report...

We've just located four NEW One-Day Wonders that we're completely convinced can return enormous gains to you in a few days. There's a FREE report I'll send you entitled *Overnight Riches: 4 Scientifically Selected One-Day Wonders*. Remember our offer: They'll double your money within four months -- or everything we send you is FREE. Who else in America has the confidence in this market to match my offer?

Note: These four companies won't fit your standard mold of hot high tech or anything like it. (Those lost a fortune!) They're little-known, profitable niche businesses with solid, predictable businesses -- and that's the secret to our success.

ONE-DAY WONDER #1:

Stock Price: \$8. Potential Gains of 236% in Just 4 Days. A Little-Known Empire That Has the Answer to America's Brewing Medical Epidemic.

Here's an \$8 stock with a net worth of \$270.8 million. Sales in the most recent quarter rose 39.9% from a year ago, and its net income soared 30.8%. For the

We're Picking Up Diamonds on the Beach: Your Average Analyst Is Literally Missing 99.7% of the Opportunities We Find

Most brokers follow 25 firms or less. And the majority of these stocks are companies their firms took public so they have to say good things about them. On the Nasdaq, the New York Stock Exchange and the American Stock Exchange, there are around 9,215 companies. *Translation*: Your average broker knows

year, this company could easily do in excess of \$500 million in sales. And its stock price could rise from \$8 to over \$26.

This up-and-coming giant has an answer to one of America's biggest medical epidemics -- and it's not AIDS, cancer or even SARS. In fact, those diseases could pale in comparison to this brewing problem. The biggest threat to ailing and aging patients around the country is a SEVERE NURSE SHORTAGE.

The Rising Nurse Shortage Could Mean Death to Millions...

The United States is short about 110,000 to 126,000 nurses. And over the next 20 years, the nursing deficit could reach as high as 400,000. That means there won't be enough nurses in hospitals, emergency rooms, doctor offices or nursing homes. If that happens, a patient's chances of dying increase greatly.

A recent study by the University of Pennsylvania found that each additional patient in a nurse's workload translated to about a 7% increase in the likelihood the patient would die within 30 days of admission.

nothing about 99.73% of the companies out there.

Only We Know About These Penny Stocks -- And We'll Tell You the Best Ones to Buy

That means they're missing 99.73% of the opportunities to make the kind of money we have. Our high-speed computers constantly search the market looking for under-the-radar values that are genuinely outstanding. If you stick with what your brokers knows, you'll never get beyond the same tired list of companies everyone knows about. One-Day Wonders are America's least-known category of stocks... but most profitable.

Think about that for a second.

If you add two patients, the mortality rate jumps 14%. Add three, and his chances of dying increase 21%. Add four, and it jumps more than 28%. You get the picture.

This is a dire problem. And it's going to get even worse.

In the next 20 years, millions more patients will flood our hospitals and require acute nursing care as the 65 and older segment of the U.S. population is expected to grow 54% to 50 million. In that same time, the U.S. nurse deficit could grow more than threefold to 400,000 -- creating a 20% gap between supply and demand.

This is a problem that could wreak havoc on our entire medical system. But there's one company with an answer...

One Company Offers a Solution Worth Millions

This company has a temporary nurse staff of nearly 40,000 -- waiting to be called to duty. In fact, it's the largest supplier of what are called "per diem" temporary nurses in the United States. (Per diem nurses are simply nurses that are farmed out to hospitals, nursing homes and ambulatory centers for short periods of time.)

As the nurse shortage continues to reach critical mass, this highflying company will be in demand! And whenever a product is in demand, you can bet it will command a premium price. That's why you should own this stock now -- while it's cheap and before

**With One-Day
Wonders, You Don't
Have to Be Concerned
About Day-to-Day
Market Changes -- Or**

every major hospital in the country is knocking on its door.

Make 236% in Just Weeks -- Maybe Even Days

In the last year, this stock reached a high of \$26.93 a share. If it just returned to its high, you would rake in nearly 236% in profits. But there's no reason it won't reach \$26 and then keep right on going. This is exactly the kind of stock that could make early investors wealthy beyond their wildest dreams. Just remember, we told you so.

ONE-DAY WONDER #2:

Stock Price \$4.90. Potential Gains of 76.1% in 3 Days. This Company Is in Position to Fill a \$27 BILLION Void -- And It's Just Starting to Take Off.

This may be the easiest double- or triple-digit winner you'll ever find.

Right now there is a \$27 BILLION void waiting to be filled in the women's apparel industry. And One-Day Wonder #2 is the front-runner to capture the

Finding "the Bottom." You Can Stop Worrying.

Where's the real bottom?
Answer: No one knows, and anyone who tells you different is absolutely risking your money. Use your common sense. How many times have you seen what everyone thought was a bottom, only to see those theories evaporate and quickly fall silent? I've counted at least five times myself. Turn on the TV. Read the newspapers. It's the same story over and over again.

Here's a fact no one talks about: In 1974 the bear market came to an end because the S&P was selling for 7.1 times earnings, a true low by historic standards. In 1982 at the end of the bear market it hit 8.2 times earnings. Both

lion's share of those profits. If it does, its stock price should soar at least 76% or more in as little as three days.

Let me explain...

The women's apparel industry is an \$89 billion moneymaking machine. And within the industry, one segment is growing faster than anything else -- the plus-size women's clothing segment.

Sixty percent of all American women wear plus-size clothes, size 14 or greater. Yet only 19% of the \$89 billion was spent on plus-size clothing last year. Why is that?

The Retail Revolution Has Begun and Early Investors Could Walk Away With 200% Profits or More

Until recently, almost every pop idol, TV actress and movie star we saw was thin. And most women wanted to look like them. But in the last few years, famous celebrities like Rosie O'Donnell, Queen Latifah, Mia Tyler and Camryn Manheim have changed the image of what successful and sexy women look like.

signaled the end of the bear market. Guess what? Today, the S&P is at 32.76 times earnings. That tells you there's more downside out there, perhaps a lot. Why risk all this when you don't have to?

I'm Stunned That So Few Investors Know About Them

About 99% of the companies we invest in are not followed by Wall Street analysts. They're profitable, fast-growing enterprises with able management -- sound and simple-to-understand businesses with bright prospects. None of this complex accounting, phony acquisitions and stock option frauds. Precisely because they're NOT followed, they're not caught up in the whirlwind blinding Wall Street.

Thanks to them, women are not only demanding clothes that fit

comfortably, but also larger sizes! That means retailers will be shifting their focus from selling size 2 outfits to size 14 and up. In fact, the shift has already begun... and plus-size women's clothes are the hottest items in the retail world right now.

They're making us money now.

From 1999 to 2001 unit sales for "women's misses" clothing fell 20.5%. Men's unit sales fell 2.6% in that same time. But guess what line of clothing rose in that time?

You guessed it, plus-size women's clothing. Unit sales rose 19.2%. That's an incredible increase.

A well-respected market research firm that specializes in the women's retail industry says the plus-size women's clothing market should be a \$44 billion business -- more than double its current size. And based on recent trends, it certainly looks like it will double!

If it does, the best way to profit is to own a piece of the largest plus-size retailer in the country.

Watch This Under \$5 Stock Rise 76% in Days

The leading plus-size women's outfitter has over 2,200 stores nationwide. Last year, it did \$2.41 billion in sales. Not millions, BILLIONS. This is no small fish. And now is the time to own it.

In the past 12 months, the company has paid off millions in debt. It has tons of cash sitting in the bank. And company insiders have been buying this stock by the thousands. This is a lean, mean, moneymaking machine, and it's on the rise. You couldn't have a better opportunity to get in.

Right now, shares of this company are selling for under \$5. That's ridiculous. Imagine shares of Sears, Wal-Mart, Target or any other leading retailer selling for under \$5. It's hard to even comprehend. But if it did happen, you would do everything in your power to buy as many shares as possible. Right?

Well, that's exactly the way to approach this stock.

Once Wall Street finds out about this underpriced gem, it could double, triple or quadruple in weeks... or less. But the secret is to buy low and sell high. That means you have to act quick. This won't be a \$5 stock for long.

ONE-DAY WONDER #3:

Stock Price: \$6.80. Potential Gains of 119% in Five Days. Its State-of-the-Art Technology Does Everything From Defend Our Country to Provide You With Digital TV.

In the post September 11 world, there is a greater need than ever for quality defense systems. And the U.S. government is willing to pay when it comes to buying solid, reliable equipment. But it isn't easy to win a government contract. You have to be the

We Bought Pokemon at \$1.29 a Share -- It Hit \$90. \$5,000 Soared to \$348,835 -- 70 Times Your Money. This System Works!

Most analysts first heard of this remarkable phenomenon when it made the front page of *The Wall Street Journal*. But by that time, my readers had already raked in an absolute fortune. You see, I first recommended Pokemon stock when I read an obscure Reuters report about kids in Japan going crazy over trading cards. At that point, my readers bought in at \$1.29.

best. Few qualify.

But watch out for the ones that do...

Thanks to just one or two multimillion-dollar government contracts, a company can literally go from unheard of to must own in a few days, even hours. And these are the companies that can make you rich!

One-Day Wonder #3 is a perfect example.

This company is one of the leading providers and manufacturers of everything from communications satellites that orbit the Earth so you can watch digital TV to rockets that test our missile defense systems to more complex satellites that conduct space-related research.

And there is a huge demand for its products -- from the U.S. government as well as the private sector.

Raking in Billions in New Contracts... It's Only a Matter of Time Before This Stock Doubles

Already in 2003, this company has

It Was a Small Lead I Aggressively Followed Up On...

Then the detailed investigation began. Who was Pokemon? Were they public? What were they selling for? Was management aggressive? Were their finances solid? Were sales growing rapidly? Was this a passing fad or a real business we could climb aboard and get rich from? Once all these questions were answered beyond any shadow of a doubt, we bought in as fast as we could. I mean instantly.

Next, the stock went to \$30 and split 3 for 2. Some of my readers got out before then with big profits. But the stock kept going. It went to \$50 and split 2 for 1. (Meaning a split-adjusted entry price of just \$1.29.)

received three contracts from the U.S. government worth up to \$535 million. This is exciting -- especially when you consider in 2002, this company's TOTAL revenues equaled \$551.6 million.

And then there's the contract it signed at the end of 2002 with the Boeing Company -- worth up to \$1 billion.

Soon, the stock hit \$90. And what about those investors who failed to take advantage of my Stealth Stage alert and waited to get the morning paper? Well, they lost about 6,900% in quick and easy profits!

One-Day Wonder #3 is attracting some HUGE business from the largest government and private players in the world. Yet this stock is trading for under \$7. Not for long.

Once this company reports earnings, its stock price could skyrocket. It could double, or triple, in a day if the results are as promising as I expect.

Buy Low and Sell High... Very High

Imagine if you put just \$3,000 in this company today and it doubled on its earnings announcement. You could take that vacation you always dreamed of. Or you could put a nice down payment on that sports car you've had your eye on. You could do whatever you want with the money.

The point is simple. When you come across a company like this, that's bringing in hundreds of millions of dollars in new business, you have an opportunity to make a lot of money yourself. And quickly. Once the talking

**Even Average
Investors Who Had
Their "American
Dreams" Shattered Are**

heads on Wall Street finally find out about this company, it's only a matter of time before they start recommending it left and right. Then you can expect millions of people to invest in it all at once. That's when its stock price will rise.

That's why you want to buy NOW. The best time to own a stock is when it is unknown and under Wall Street's radar screen.

Then when the "herd" lays down their money, you sit back and watch the stock price rise. The only question you have then is: When should I call my broker to cash out? And let's face it, there are much worse things you could worry about than how much to cash out for!

Don't miss your opportunity to profit from this One-Day Wonder. It's not every day you find a company bringing in hundreds of millions of dollars in new contracts and selling for under \$50, let alone \$7. Don't be surprised if this is a \$15 or \$20 stock by the end of the year.

ONE-DAY WONDER #4:

Stock Price: \$4.76. Potential Gains of 109% in Two Days. This

Now Making Money With Our One-Day Wonders!

*"I want to personally thank you for the **Penny Stock Fortunes** newsletter. I am a novice, at best, in investing in the stock market. There is no way I could have done as well as I have without **Penny Stock Fortunes**."*

--A. Stith

"Dear James, I am your subscriber just for 2 months and already made realized gains of \$1,000. Your latest CXS picks are just excellent. Both jumped 20% the very next day after your CXS alert. Thank you!"

--M. Kozlov

"I bought ASL at \$5.36 in April of this year... I just got out at \$7.67! So I made 43% profits in about two months... Am I happy? You better believe it!"

--J. Werning

Company Is Getting Ready to Tap Into a \$100 BILLION Global Market. Don't Miss Out!

Last year this company did more than \$500 million in sales. It's on pace to beat that by \$47 million this year -- at the very least! And don't be surprised if it actually doubles its sales altogether, reaching the \$1 billion mark.

You see, this company is an industry leader. It's the largest owner and manager of thoroughbred horse racing tracks in North America -- including Pimlico Race Course, home to the second leg of the Triple Crown. And this stock is selling for under \$5. But don't expect it to sit there for long.

"Mr. Boric, I am a fairly new subscriber. Yesterday when you said buy NT, I jumped on it. Today, I could have sold for a big gain. I want you to know, Mr. Boric, this is the first time that something like this has happened to me. I have subscribed to at least 20 newsletters and the only thing that has happened to me is that I lost all my retiring money. That's why I am writing to you now to thank you for giving me new hope. Thanks again."

--M. Petersen

In addition to owning some of the most prestigious horse tracks in the United States, this company is also involved in the national wagering business. And it has an ace in the hole that could help it double sales... and ultimately its stock price in a matter of days.

Last year, it unveiled a state-of-the-art wagering system that customers can use to bet on up to 70 horse races from the comfort of their own home! This system runs off the Internet and phone, so anyone can use it. It's simple, user-friendly and already making the company a ton of money.

In its first year of existence, more than 10,000 people in North America used this system to bet on races. And it's one of the main reasons corporate sales jumped \$30 million in the last year. Now it's time to take this idea global...

Strike It Rich as This Company Goes Global and Taps Into a \$100 Billion Industry

Worldwide, \$100 BILLION is spent betting on horse races. This is a massive industry. And only 15% of that revenue is generated in the United States. That's precisely why One-Day Wonder #4 is taking its wagering system to Europe. It wants to tap into a larger portion of the \$100 billion industry and rake in huge sales.

And this is your opportunity to buy shares of this stock BEFORE it strikes it big overseas. Just think for a moment...

This is an industry leader we're talking about here. It's not some wannabe start-up company with a huge idea and no way to get the job done. This company already has a proven product that has earned millions in the United States. And it knows the horseracing industry better than anyone in the world.

If anyone is going to succeed in bringing a popular online wagering system to Europe, it is One-Day Wonder #4. And let's say it can only capture 1% of the total horse wagering market. That would still equal \$1 billion in additional sales. That's huge -- enough to more than double its current revenue total.

And who's to say it can't grab 2%, 3% or 4% of the market? After all, this is an established leader in the industry. Sound far-fetched to you?

It shouldn't.

Investors Ask 4 Key Questions About One-Day Wonders -- And How They Can Make Such Large Gains Without Crazy Risks

"I Don't Want to Invest Until I See That What You're Saying Really Works."

My Answer: "Fine. Take my top-rated CXS System selected stocks and paper trade them. Share it with someone you trust. Watch their progress. After you're 100% convinced, invest a small amount to get started. This is the safe way, and I encourage it."

"How Much Money Do I Need to Get Started?"

My Answer: "The beauty of One-Day Wonders is that you could literally start with \$200, or less if you like. They have the potential to rapidly multiply your money and put your portfolio back where it was. This is a personal decision that depends on the size of your investments, your goals and how you've done in the market."

"What Work Do I Have to Do to Invest in One-Day Wonders?"

My Answer: "None. We will tell you what to buy -- and even more importantly -- when to SELL. I'm a great believer in taking profits when you have them. I want you to put your profits in the BANK, where they belong."

"Is It Really Possible to Make a Lot of Money?"

My Answer: "Absolutely. One of the biggest reasons why is this: One-Day Wonders are an unknown segment of the stock market that's ignored by 99.73% of Wall Street. And that's good news. Deeply undervalued, safe, solid companies are numerous. It's NOT like buying Cisco -- an overblown windbag everyone knows about."

Follow Insider Money to Easy Triple-Digit Profits

Company insiders are bullish on its future. That's why over the past 12 months, they have purchased over 4.7 million shares -- in some cases for \$2 more per share than it's selling for right now.

When a company's CEO, CFO and COO are ALL buying shares in their company, you can almost bet something good is about to happen. You won't hear about it in *The Wall Street Journal*, on CNN or any other mainstream news outlet... but you will hear about it in ***Penny Stock Fortunes***.

This is exactly the kind of stock that can make you rich in a month, a week or even just days.

If this new system takes off in Europe, there is no telling how high its stock price could climb. 109% may be way too conservative. You could be looking at 300%, 500% or more in profits. We'll just

One-Day Wonders Are Smaller, Solid, Well-Managed Enterprises That Are Simple to Understand And Have Clean, Easy-to-Read Income Statements

Forget the complex accounting, ignore the acquisitions and avoid the greedy stock option plans that raise red flags. Our One-Day Wonders are the exact opposite of the typical

remember you have to double your money in four months -- call customer service and cancel out for a full refund. No questions asked. You get every cent back -- and keep your FREE reports as my "thanks."

fraud you see today. We'd rather have hot companies in hot industries with solid, reliable profits and predictability.

These FREE Reports Bring You Our Favorite Stocks Right Now -- Including the 4 NEW One-Day Wonder Stocks We've Just Located

FREE INTRODUCTORY BONUS #1: *Overnight Riches: 4 Scientifically Selected One-Day Wonders.* This extraordinary report brings you the four One-Day Wonder Stocks I told you about. Get all the details, numbers, names and estimates as to how much money they can make you -- and when they can hand you gains that range from 76% to over 236% in just days. In some cases, in less than 48 hours. These companies are on the verge of big successes that can dramatically increase their stock prices.

The first stock is \$8 a share. Profits are \$17.9 million on sales of \$483.5 million over the last year. And there's no telling how much this company will make in 2003 as the nurse shortage swells to epidemic levels. The second stock is trading for less than \$5 and could rise 76% in a matter of weeks... even days. It operates in the fastest-growing segment of an \$89 BILLION industry. Its net income is up more than \$10 million in the last quarter! The third stock is raking in hundreds of millions of dollars in government and private contracts. Once Wall Street realizes what a

cash cow this company is, this stock could double in five days or less. And the fourth stock is truly extraordinary. It has a chance to tap a \$100 billion industry with its state-of-the-art wagering system. Right now it's trading for under \$5 a share. But once it takes off it may not stop until it hits \$10 or \$15. That's enough to double or triple your money.

FREE INTRODUCTORY BONUS #2: *The Penny Stock Fortunes Emerging Technology Report.*

This extraordinary report highlights the hottest technology to come along in the last 20 years. It's still in the very early stages of existence -- which means you have a chance to get in near the bottom and ride it to the top. And if early indications are any sign of how big this technology will be, you could be in for quite a ride. Already this product is taking off faster than the CD and DVD player. In fact, it's taking off more quickly than ANY

consumer audio product in the past 20 years! Don't miss your opportunity for triple-, maybe even quadruple-digit profits!

FREE INTRODUCTORY BONUS #3: *American Blue Chips Exposed.* Is your portfolio safe? It may not be if you are holding shares of Microsoft, Cisco, Citigroup, Johnson & Johnson, Coca-Cola, Home Depot or any number of other "safe" blue chip stocks. We've run 30 of the largest stocks on the Dow, NASDAQ and S&P 500 through the rigid CXS System. You'd be surprised how they scored. Don't be caught holding these losers for long periods of time. They may cost you thousands in profits.

FREE INTRODUCTORY BONUS #4: *The Code of the Rich: Turn \$200 Into \$25,000* . It's been done. The rich routinely profit from it. Here, at last, are the tell-all secrets of our incredible CXS quick-cash money multipliers. You will learn how to take just \$200 and multiply it almost effortlessly, virtually overnight. You've already seen how well my system works... enough to buy you a new home or car... take a long-deserved vacation... pay for college tuition... or provide abundantly for a worry-free, early

retirement. This exciting report lets you copy the exact steps wealthy investors use to consistently get richer.

FREE INTRODUCTORY BONUS #5: OUR WEEKLY E-MAIL ALERT SERVICE (Yours ONLY if you act promptly!) This is your guarantee that you won't miss a single recommendation. Our alerts bring you the latest updates on current stock selections, up-to-the-minute recommendations of emerging stocks, the latest and best One-Day Wonders that return enormous gains in 72 hours or less -- anything you need to know to quickly act on and make money immediately. Act now and you could be raking in gains like 65% on drugstore.com... 121% on DA Consulting... 271% on Smith Micro Software... and 233% Sirius Satellite Radio.

Where Do You Find One-Day Wonders? In Our Publication, *Penny Stock Fortunes*. It Has a National Reputation for SAFELY Earning Spectacular Gains in Today's Unpredictable Market. Look at These Numbers...

Penny Stock Fortunes specializes in finding stocks that generally trade between \$1 and \$10 that have extraordinary, untapped potential to soar triple digits. We've done this time and again. Success like this

has given us our hard-earned reputation. As you can see, our **CXS Scientific Stock Selection System** is one of the most potent moneymaking systems in America today. It even works in markets exactly like the one we're in because it doesn't depend on a rising market for its success.

And since the profitability of these stocks is so high, you don't need a lot of money to make a lot of money. You start off with a small amount, it could even be as little as \$200 per stock, and you use this to build up stupendous gains. What many investors do is this: once they have a gain, they take out their initial investment. This way, the money you invest then becomes the profits you've earned -- so your risk is substantially lowered. Look at the profits this systems produces...

- Select Comfort -- 73% gain
- Pan American Silver -- up 85%
- Sirius Satellite Radio -- 233% gain
- Drugstore.com -- up 65%
- E-Loan -- 44% gain
- Bema Gold -- up 35%

You're Invited to Join Us at *Penny Stock Fortunes* for as Little as 14 Cents a Day and Receive 6 FREE BONUSES
