

You Can Turn \$10,000 Into \$1 Million With Just Two Stocks

This Special Report Shows You Exactly How...

Dear Investment U Reader,

Take a penny, double it every day for 30 days... and it's worth over \$10,700,000. (If you doubt it, grab your calculator.)

This is the awesome power of money compounding. And it's this type of extreme money making that attracts certain investors to a particular class of stocks. They are, by definition, the fastest-growing companies-and the most rapidly moving stocks-in the market. There's nothing mysterious about them. They simply lead virtually all other companies in terms of sales growth, operating margins, profitability and "relative strength."

In 2003, for instance, the Dow rose 25.3% and the S&P 500 rose 26.4%. Not bad. But these returns can't touch the profits delivered by the market's strongest stocks. Last year Align Technologies rose 498%, Akami Technologies climbed 521%, Sonus Networks vaulted 656%, XM Satellite Radio rose 879%, and Millcom Int'l Cellular climbed an astounding 1,209%.

Many of the best-performing stocks of the past-the ones that have turned \$10,000 into more than \$1,000,000 for hundreds of investors-are businesses you've been patronizing for years. Have you or your spouse ever shopped at Wal-Mart? The company's shares rose 40,232% during the last bull market. That's enough to turn \$10,000 into more than \$4 million.

Have you or your company ever bought a Microsoft software program like Word, Excel or PowerPoint? The stock rose 61,034% in the thirteen years following its IPO. That turned a \$10,000 investment into more than \$6.1 million.

Have you ever used your computer to log onto the internet? The biggest maker of routers and switches for internet connections is Cisco Systems, which rose 95,667% in the 1990's alone. A \$10,000 investment made here would have allowed you to spend the rest of your life sitting on tax-free bonds. Because \$10,000 grew to an astonishing \$9.56 million in less than ten years.

Unfortunately, Microsoft, Cisco and Wal-Mart cannot possibly generate these kinds of returns in the future. They're much too big to grow at that rate now.

The key to making a fortune in a short time now is to invest in the most rapidly growing companies today... so you can enjoy a life of total financial independence tomorrow.

In this special report, you're going to learn exactly how to identify these superlative companies *before they begin to soar*, turning \$10,000 into \$1 million or more. And you're going to learn not only when to buy them, but exactly when to let them go... so you can capture magnificent profits along the way.

Best of all, you're going to find that owning these companies carries less risk than you might imagine.

Don't get me wrong. Buying troubled or mediocre companies is very risky. But buying superbly managed, rapidly growing companies with double- or triple-digit growth rates, high returns on equity, and strong share prices is much safer.

Let me show you exactly how to identify these companies before they arch skyward and how owning just two of these stocks can turn \$10,000 into \$1 million-guaranteed.

Turn A Grub Stake Into A Small Fortune

My name is James Boxley Cooke. I'm retired now, but I'm a former executive with T. Rowe Price. And I also serve as Chairman of the Board of Governors of *The Oxford Club*. With thousands of members worldwide, it is perhaps the world's largest private financial foundation.

Our mission is straightforward. We work to help like-minded individuals achieve and maintain total financial independence by maximizing returns, minimizing risks, and eliminating capital gains taxes.

However, it's not the Club or its philosophy I intend to discuss with you today. I simply want to share with you how you can identify a select group of stocks poised for enormous gains.

And how two carefully chosen stocks can turn \$10,000 into \$1 million... guaranteed. It boils down to pure mathematics. If you invest \$10,000 in one stock and it rises ten-fold, you now have \$100,000. If you then take that money and reinvest it in another stock that rises 10-fold, your \$100,000 will be worth \$1 million dollars. It's a mathematical certainty.

How difficult is it to find a stock that rises ten fold? If you know what you're doing, it's not that hard. Ever shop at Best Buy, for example? It recently rose

more than 30-fold in five years. And there have been dozens of other great-performing growth stocks... even in the vicious bear market of the past three years. For instance, Ultra Petroleum, Lannett Company, Headwaters Inc., and Multimedia Games have all risen more than 14-fold in the last three years. Alliance Gaming has risen more than 29-fold in the past three years... in the midst of a bear market!

Each of these stocks has given investors a moon shot. And each is what professional investors call a "momentum stock." Quite simply, a momentum stock is a company showing dramatic gains in sales, earnings and share price movement.

Yet you probably don't own them. In fact, when you look in the paper and run your finger down the list of the market's biggest percentage gainers-the momentum stocks-you may find you don't own a single one of them. You're not alone.

You see, I've worked with many thousands of investors over the years, showing them how to safely and consistently maximize their returns. So they can live the kind of life they've always dreamed of living. Doing what they've always wanted to do... with the people they want to spend time with. Having the peace of mind that comes with knowing that they'll never outlive their money. And I've seen the alternative... becoming a burden to their children... or, perish the thought, depending on the federal government.

The former is a worthy goal. But I've found that most individuals don't have a clear idea how they're going to achieve a legacy of great wealth. The desire is there... but the results often come up short. And as Yogi Berra once remarked, "If you don't know where you're going, the chances are you won't get there."

In my view, the key to achieving great wealth-the kind of wealth where money is no longer an object, where you leave a real legacy to your children and

grandchildren-is to *follow a system that gives you the statistically highest probable chance of success.*

That's the key. To build great wealth, you need an investment system that is battle-tested to perform in all economic and market environments.

Owning the fastest growing companies-momentum stocks-allows you to do that. It's a common sense approach to investing that works in good markets but, as you'll soon see, in bear markets, too. It doesn't depend on what the market averages are doing. Or whether your fund manager is on or off his game. It just takes identifying the right stocks-momentum stocks-something we do every day.

How To Build Your Fortune Quickly, Consistently... And Methodically

How do you identify the momentum stocks-the ones that will turn \$10,000 into \$1 million-before they make their historic moves up?

The answer is almost too obvious. If you were an engineer in charge of building an important bridge, how would you go about it? Would you try something new and different? Would you try to build a bridge based on untested ideas or drawn from a plan never seen before?

Absolutely not. You would build your bridge to the most exacting specifications. You would use the strongest materials, the most rigorous plans, and the most qualified people to build it.

A blockbuster investment portfolio is constructed the same way. If you understand that the best performing stocks in the future will be the fastest-growing companies, with the greatest leaps in profitability, and the strongest price action in the market, why not invest exclusively in these stocks?

If you're like many investors I speak with, I already know your answer. You're not sure which companies these are.

Fair enough. But following my analogy about the way to build a bridge, how do you go about identifying the companies that are likely to show the biggest gains in the market?

The answer is plain. You go back through history and make a thorough, systematic study of every stock that ever gave fantastic, 10-fold or better returns. You see what unique elements they all had in common. And then you seek those same elements in the stocks available today.

During the '90s, for instance, Clear Channel Communications went up 5,615%. Emulex rose 6,412%. Dell Computer went up 10,198%. Activision went up 13,819%. Semtech rose 15,231%.

These stocks made multi-millionaires of many investors. Just as other momentum stocks will in the future. You can be one of them.

Here's all it takes...

First you pinpoint the characteristics that all these stocks shared before they skyrocketed-and there are only a few. Then you carefully screen all the publicly-traded companies available for purchase today. You isolate the handful that share these criteria and are, therefore, likely to rise 10-fold or more.

Then you invest in this select handful of stocks... and wait.

It won't take long before your portfolio starts to act like a pan full of Jiffy Pop. Because if history has demonstrated anything, it's that ultimately share prices follow earnings. But not earnings alone...

The Big Winners Of The Past Will Help You Identify The Big Winners Of Tomorrow

While these are averages, based on the big movers of the past, here are a few of the factors that will help you identify two stocks that will turn \$10,000 into \$1 million:

- They were an IPO within the past eight years.
- They have annual earnings growth of at least 24%.
- The average percentage increase in earnings for the current quarter is at least 34%.
- They have a p/e ratio of 31 or more.
- They have a relative strength rating of 85. (That means they are already outperforming 85% of the stocks in the market before they make their big move up.)
- Their relative strength has been growing for at least the past six months.
- They have an average of at least 5 million shares outstanding.
- They have average daily volume that exceeds 75,000 shares.
- Their industry group is in the top 30% of the market.
- They have a median stock price of \$26.

When you boil it down this way, it may seem as though the process is purely a numerical exercise. But, like most things in life, it's not that simple.

First of all, you must know exactly how to apply those qualifications to different sectors of different industries under different market conditions.

"I am delighted to tell you that your recommendations are, almost without exception, amazingly accurate and, above all, amazingly successful." ~H.P.

Secondly, you have to have access to a proprietary database that contains the relevant data on more than 9,000 publicly-traded companies.

Thirdly, you have to be qualified to interpret the mountain of quantitative and qualitative information that you uncover. That often takes years of experience.

Finally, even if you have the knowledge, the skills, the contacts and the money to ferret out these few stocks, you will need to spend hundreds of hours screening all the potential candidates.

Personally, I don't have that time. Or, quite frankly, the ability to see the things a trained expert can detect. That's why I'd like to introduce you to the man who can provide you with a window on the market's most successful momentum stocks... and the incredible short-term profits that come with them.

Your Biggest Ally In The Battle For Financial Freedom

His name is Alexander Green. He is the Investment Director of *The Oxford Club* and, as you'll soon see, the person most capable of identifying momentum stocks with outstanding short-term potential.

Let me give you a little background.

We recruited Alex as Investment Director of *The Oxford Club* three years ago.

And he came to us with a wealth of experience.

He's a Wall Street veteran with over sixteen years experience as a research analyst, investment advisor and professional portfolio manager. How successful was he? Exceptionally. His managed accounts delivered blockbuster returns. And, in fact, he retired from Wall Street at the ripe old age of 43.

He now oversees The Oxford Investment Portfolio and runs an elite trading service - ***The Momentum Alert*** - dedicated to uncovering exactly the kind of stocks I've been talking about.

His knowledge, experience and contacts allow him to target the most successful companies in the market. The ones that are well on their way to becoming this year's biggest percentage-gainers. The ones that can turn \$10,000 into \$1 million for you.

Of course, the proof is in the pudding. It's isn't enough for an investment system to work in theory. It has to deliver the goods.

And ***The Momentum Alert*** has... in spades. Let's look at the facts.

In early 2004, *Investor's Business Daily* listed the handful of stocks that were the top performers of 2003. Dick's Sporting Goods, for instance, was up 153%. Central European Distributors rose 156%. Genentech rose 182%. American Pharmaceutical rose 183%. And the best performing stock on the list? Little-known Schnitzer Steel, up 504%.

Of course, these stocks all have something else in common. All were also recommended in ***The Momentum Alert*** at different times throughout last year. (And another top 40 winner, Netflix, up 396.7% in 2003 was recommended by Alex Green last year!).

What are the odds? There are over 9,000 publicly-traded companies in the U.S. And five of the top 40-including the single best stock-were all recommended in *The Momentum Alert*.

But that's just the beginning. Last year *Momentum Alert* subscribers also had an opportunity to lock in double or triple-digit profits in Coach, Qualcomm, Nam Tai Electronics, Career Education, eBay, Vimpel Communciations, Teva Pharmaceutical, Countrywide Credit, Verint Systems, Portfolio Recovery, Eon Labs, and Garmin, among others.

Meet Alexander Green: Your Partner in Profits...

You won't find many men or women of Alexander Green's talent or integrity on Wall Street. At the height of the stock market boom, he walked away from a prestigious position with one of the country's leading money-management firms - retiring from Wall Street at the ripe old age of 43, saying 'no thanks' and returning more than half of a \$510,000 signing bonus. He then became Investment Director at the *Oxford Club*-a private financial organization dedicated to building and preserving the wealth of its members, independent of Wall Street's dubious influence.

When Alexander isn't making money for members and his premium trading service subscribers, his market views and observations are constantly in high demand. He's been profiled in Forbes.com, and has written for Louis Rukeyser and several other leading financial publications and was recently featured on the Fox News Channel's 'The O'Reilly Factor'. He currently writes and directs *The Oxford Club Communiqué*, the *Oxford Insight* e-letter, and he's a top-rated speaker at financial conferences around the country.

In Life... Timing Is Everything

It's important to know that, although nothing in the market is a sure thing, ***Momentum Alert*** subscribers will be guided on how to protect profits with Alex at the helm. He begins by putting a "sell stop" below every recommendation, just for protection. (He describes in each broadcast exactly where and how to place the order.)

Then as the stock moves into the profit zone, he gradually moves the stop order up behind it. He calls this "laddered stops." The higher the stock goes-and the bigger the profits-the higher the sell stop goes... and the bigger the eventual profit. As long as the stock is moving up, Alex never sells.

"I have only been a member of The Momentum Alert for 10 days and decided to act on your GRMN recommendation and am very happy that I did. I can hardly wait for your next recommendation since GRMN is the 1st stock I bought after becoming a member." ~ A.M.

"That's the secret to uncovering a stock that rises 10-fold." he told me. "You never, ever sell your winners early."

Instead, once the stock peaks and begins to trend back down, the sell stop is triggered automatically... and locks in profits.

"You always cut any losses that develop quickly," he says, "and let those profits just continue to run and run."

And Sometimes... It's Who You Know That Can Make You Rich

Aside from the proven trading methodology that Alex is using, in my view, he is one of the best-connected traders in the country.

For instance, he is a lifelong friend of the scientist who has been heralded by The Institute for Scientific Research as the world's leading scientific researcher. He tipped Alex off to the attractive levels that Immunex had reached just six weeks before Amgen bought them out in the biggest biotech deal ever.

Subscribers saw gains of 56% in just six weeks.

Recently, this same world-renowned researcher gave him another head's up about a biotech company that has a pipeline full of the most promising medical technologies in the world today.

Two weeks after *Momentum Alert* subscribers read about it, this same scientist was elected to the company's board of directors. It has all the makings of a stock that will offer yet another 10-fold return. And start turning \$10,000 into \$1 million.

"I consistently trade (sometimes daily) the options on the Momentum stocks in my brokerage account, and I'm very pleased with the results, which are considerably more than 27%."
~S.B.

Recently too, Alex spent over an hour on the phone discussing investment ideas with Jim Rogers. If you're not familiar with Jim or his investment track record, you should be. There aren't many like it.

In 1970 Jim teamed up with George Soros to run one of the most successful hedge funds of all time. From December 31st, 1969 to December 31st, 1980, the fund chalked up a gain of 3,365%. For comparison purposes, the S&P 500 returned 47% over the same period.

Jim was one of the handful of individuals, along with Warren Buffett and John Templeton, who were profiled in John Train's recent book *Money Masters of Our Time*.

"I cannot find sufficient words to properly express my satisfaction with The Momentum Alert. Thank you."
~B.D.

Using Jim's macroeconomic outlook on China-he had just visited 22 cities there-and Alex's proprietary momentum screens, he recommended an unusual stock.

It's China's leading independent power producer. And at the rate the world's

most populous nation is growing, the future demand for power there will be nothing short of ravenous. This should propel the stock substantially higher in the months ahead. In fact, it is yet another potential 10-bagger, a stock with the potential to rise 10-fold or more.

And as Alex wrote in a recent broadcast of The Momentum Alert:

"Although my guess is that the strength of the economic recovery is not going to win any awards this year, it doesn't really matter for our select group of stocks.

When a company does all the right things-increases sales, pays down debt, buys back shares, and grows at a double- or triple-digit rate-the market will reward its shareholders.

"And that's the only kind of company we own." I've found that once Alex's momentum stocks get a tailwind behind them, there's no telling how far they'll run.

Start Turning \$10,000 Into \$1 Million Today

By becoming a *Momentum Alert* subscriber, you're about to learn how to become very rich in a short period of time. (Remember, it only takes two stocks to turn \$10,000 into \$1 million.)

With the economy just beginning to emerge from recession, the profit potential for *Momentum Alert* subscribers is greater now than ever.

We've seen that this system works beautifully in a down market. But an economic recovery provides the ideal springboard for these fast-moving momentum stocks. Profits in the weeks ahead are

"I would like to extend my subscription to the Momentum Alert for a six month extension. This service

likely to be nothing short of breathtaking.

is the absolute best I have
seen in 25 years of investing!"

~M.W.

That's why I urge you to get on board now. ***The Momentum Alert*** features precisely the kind of fast-moving momentum stocks I've talked about in this letter.

Upon becoming a subscriber, you will be notified by "instant alert" as soon as Alex sees that a momentum stock is ripe for the picking.

These trades move quickly-as do the profits-so the service is provided by e-mail or fax. You then relay the recommendation to your broker and the trade gets executed. The whole process takes a matter of minutes. You'll also get a summary each week updating you on the current status of each outstanding recommendation.

Plus, as a ***Momentum Alert*** subscriber, you'll also get a direct access phone number to Alex's research associate, Chris Matthai. Use it anytime you have a general question about a stock we're buying, about background research, company news, or questions relating to Club services. Please understand that while *The Oxford Club* provides investment recommendations to all members, we are not licensed by the Securities and Exchange Commission (SEC) to provide individual investment advice, and therefore, cannot address your personal circumstances...

As with other VIP services, enrollment will be conducted on a first-come, first-serve basis. The cost is \$1,250 for a year's subscription-a terrific value when you consider the kinds of returns this service has produced.

And one more thing... If you'd like to stop receiving ***The Momentum Alert*** at any time, just let us know by mail, phone or e-mail. Your credit card won't be billed again. And whatever option you choose, we'll

"Just a short note to
compliment you on your
highly successful year 2003
stock picks. I made tens of

issue you a full pro-rated refund for any unused months left on your subscription. But whichever option you choose, know that you'll be receiving the kind of high-level investment recommendations that have put thousands of dollars into the pockets of investors just like you.

thousands of dollars because of your recommendations. Keep up the good work!"

~J.T.

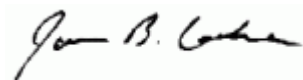

There will be a lot of competition for the limited number of spaces available.

Because we expect-and I'm sure we'll see-an over-subscription and then a waiting list for this service, enrollment will be limited.

Let me assure you that Alex does not divulge the names of companies he is researching prior to recommending them. The effectiveness of this service is due in large part to the speed and confidentiality of the recommended trades. As editor of ***The Momentum Alert***, his loyalty is to his subscribers.

Join us today, and the next Momentum Alert issue could be in your hands in a few days. And the profits that go with it. You can ensure a reserved spot in this elite trading service by clicking subscribe now below. I look forward to welcoming you on board!

Sincerely,

James Boxley Cooke
Chairman, Board of Governors
The Oxford Club

P.S. With the short-term gains we've been generating recently-often in a matter of days-interest in ***The Momentum Alert*** has far exceeded our original

expectations.
