

Final Call for the First-Ever

AGORA-WEALTH CURRENCIES & RESOURCES SEMINAR

**On July 15 & 16, at San Diego's Marriott La Jolla, 11
internationally renowned financial experts will reveal to 200 select
individuals ...**

The Best-Kept Secrets of the World's Wealthiest Investors

These closely guarded investment secrets could soon help you:

- *Turn a remarkable 10 to 1 pay-out in one foreign currency alone -- in the next 12 to 24 months!*
- *Make a staggering 800%-plus return on a single precious*

metal!

- *Reap the first 30-fold return on a skyrocketing commodity in more than 22 years!*

Just a few seats remain -- so you must sign up now! Here's how ...

Dear Friend,

Time is short, so let me get to the point.

This is your special invitation to the first *Agora Wealth - Currencies & Resources Seminar*, "The Best-Kept Secrets of the World's Wealthiest Investors." It's one of the most important seminars Agora Wealth has ever offered.

The Seminar will bring together 11 of the world's most renowned experts in Currencies, Commodities, and Precious Metals. In two days of interactive lectures, these respected analysts will show you how you could make more money in the next 12 to 24 months than you have ever made on any other investment in your entire life.

In short, they will reveal the secrets that have helped international investors like George Soros, John Templeton, and Warren Buffett turn obscure investments into fabulous fortunes. You'll learn:

- *How to multiply your wealth -- many times over -- by effectively leveraging every dime and dollar you invest*
- *How to diversify your investments so that -- time and time again -- you are at the forefront of where the market is moving*
- *Protect your assets no matter which way the world economy shifts*

Now, you can know all of that -- *and more* -- by being among the select 200 who take advantage of this special, final offer, opportunity.

Let me assure you that the timing of this remarkable Seminar is no accident.

In the first place, this is the only time in all of my years with Agora Wealth that I have been able to pin down the 11 "*Men With the Midas Touch*" to be at the same place, at the same time, sharing their knowledge on the same subject. When you hear them speak, you will understand why this is so important to your financial future.

In the second place, in all of my years in the financial community, I have never seen the global economy as volatile as it is today. Frankly, to the faint of heart, that means stick your money in a mattress and your head in the sand. But to the "World's Wealthiest Investors," to market makers -- to *you* , I hope and pray -- it means follow the money that moves the market.

And, in today's world, that means Currencies, Commodities, and Precious Metals.

Why Currencies? If the current USD bear market follows the historical trends, we could see a falling dollar for another 4 to 7 years. *Which means investments in the Yen, Euro, Sterling, or New Zealand dollar could bring an incredible 10 to 1 payoff -- or better -- within the next 18 months!*

Why Commodities? Oil prices are at their highest since the first Gulf War. Soybeans are at their highest since 1988. Other multi-year highs can be seen in corn, pork bellies, wheat and copper. *And, as you will*

soon learn, one step-child commodity has achieved a staggering 640% increase in earnings per share growth in the past 12 months alone!

Why Precious Metals? Right now, you can buy a basket of gold or silver stocks for under a dollar. You can buy gold itself for \$400. By all indications we are very likely at the very beginning of a raging bull market not seen since 1976. And when that happened, gold skyrocketed 800% in just four years! We'll tell you how to get ahead of the coming precious metals cash curve!

Now, do you see why I've brought together the world's leading currencies and resources experts -- and put together the first-ever *Currencies and Resources Seminar* at this exact moment in financial history? And, more to the point, now do you see why *this is the one, single seminar you simply must not miss?*

But, I have to warn you: The *Currencies and Resources Seminar* will be limited to just 200 serious investors. Like I said, it is highly intensive -- and rightly so. After all, we will be helping you learn how to make millions of dollars in investment income in the next few years -- while other investors are slowly losing their life savings.

So, if you want to be part of this once-in-a-lifetime opportunity, I urge you to register below. Right now. Because experts like those I am bringing to San Diego rarely come together at one place at one time on more than one occasion.

And, once the doors are closed, they will not re-open. So, please, don't miss out on this unprecedented opportunity to avoid a disaster -- and reap a fortune.

It's YOUR Choice: The Declining Dollar and Deepening Debt or the Investment Opportunity of a Lifetime!

Now, please understand, I know this is not the first -- nor will it be the last -- invitation you receive to an investment seminar.

But, I can guarantee you; it will be the most important.

You see, what I am about to reveal to you in the next few minutes could make the difference between losing -- and making -- a fortune in the months ahead.

If you reject this invitation -- if you give up your seat to another investor and leave your money in the equities market -- you risk bearing the brunt of what many now believe could be the most devastating plunge in stock prices since the bursting of the dot.com bubble.

If, on the other hand, you accept this invitation and join a select group of just 200 savvy investors under the San Diego sun, you could soon profit from the most lucrative Currencies, Commodities, and Precious Metals market in nearly three decades.

When I explain why, I have a feeling you are going to rush to sign up for this exclusive opportunity to join the Select 200. Because if you have been studying the trends -- if you have been watching America's dollar decline and debt explode -- the way I think you have, you already know more than a little bit about what I am about to say.

So let me cut to the chase -- so that you can get on the list. Because your entire portfolio could depend on the decision you make in the next few minutes.

The Death of the Dollar

As I said at the outset, the U.S. dollar's day of reckoning is finally at hand. And there is nothing in the world that's going to prop it up once the current rut turns into a route.

And, have no doubt; it will. You've read the news, so you know the truth (regardless of what the politicians try to tell you in an election year):

- The USD has dropped 30% in the past 2 years -- and 50% in the past 4 years!
- The current national debt is more than \$7 trillion dollars -- and is increasing at a rate of \$1.73 billion a day!
- The U.S. trade deficit has now passed the \$500 billion mark -- and foreign investors must shell out more than \$1.3 billion a day just to keep the dollar afloat!

So let me ask you two questions (and I have a feeling your answers will help you decide where you need to be on July 15 & 16): *How long do you think the Asian countries are going to continue wanting to bail out the US economy? And how long do you think the Arab countries are going to continue trading in US petrodollars?*

Let me put it bluntly, because it's your money that's at stake -- and a heck of a lot of it ...

We are heading into an economic abyss for which there is no historical precedent: A US economy drowning in debt -- but also awash in increasingly worthless money.

Stocks continue to be drastically overvalued. And despite 45-year lows in short term interest rates -- not to mention the most excessive splurge of liquidity ever seen -- none of the major stock averages has been able to rise to new heights.

On top of that, the movement of Transports and Industrials has now reached a point of decidedly dangerous divergence. And the VIX is at a seven year low.

No wonder Warren Buffett has stated flat-out that he can find few if any stocks to buy that fit his valuation formula. And remember, the last time Buffett sat on the sidelines was a precursor to the largest stock market bubble in history.

So, what are *you* doing with your money still tied down to a dying dollar -- and still tied up in a declining (or, at best, reclining) market?

Welcome to San Diego. Welcome to the *Currencies and Resources Seminar*.

Welcome to the opportunity to turn the coming crash into cash. Welcome to a once-in-a-lifetime opportunity to get in early on what could soon be the biggest bull market ever in the only three investments guaranteed to expand as the dollar declines: Currencies, Commodities, and Precious Metals!

But, again, I urge you: don't delay -- because the Select 200 seats are filling up fast!

Okay, maybe you're still not convinced. Maybe you are still afraid to make your move -- even as the government continues digging its

grave in dollars and debt.

Then let's just look at the track record of Currencies, Commodities, and Precious Metals -- where they are and where they're likely to go. Then you can decide for yourself whether you want to watch your money melt away -- *or attend the Seminar and make it multiply!*

Seminar Topic #1 - Cashing In On Currencies

The Kingston Trio notwithstanding, I do give a damn about the Greenback Dollar. But, at a time like this, my personal feelings have to take a far back seat to your financial success.

And, the fact is, as of January of this year, the battered Greenback had lost a stunning 50% from its peak in 2000 against the Euro. It's lost 20% against the Japanese Yen in the past two years alone. And it is at an 11-year low against the Sterling.

So, if you are a betting person on where it's going from here, my advice is: take the Under.

Let's put it this way: In a recent speech Ben Bernanke, the Fed rookie spoke with a bluntness that stunned the economic world. What he said in so many words was that the central bank is ready to throw the dollar overboard if that's what it takes to get the economy moving. (And, he might have added -- especially in an election year.)

And remember, that comes at a time when our Fed funds rate is already at a 45-year low 1.25%. As opposed to:

- Canada's interest rate is at 3.25 -- and it experienced two rate

hikes in 2003!

- The UK's is at 3.75 -- with growing pressure to relax currency manipulation!
- The Euro zone is at 2.50 -- and it is offset to the USD with a current account surplus!

No wonder Warren Buffett recently told *Fortune* magazine, "Through the spring of 2002, I had lived 72 years without purchasing a foreign currency. Since then, Berkshire has made significant investments in -- and today holds -- several currencies."

So, the smart money is already going overseas. And the only way to stop the waterfall, watershed decline in the USD is for the Fed to raise interest rates. But, if that happens, it will cause a simultaneous crash in stocks, bonds, and housing credits.

That's why trading the falling dollar will become the investment trend of the next two years (at least).

And that's why the *Currencies and Resources Seminar* has brought in some of the world's leading experts to help *you* learn for yourself when to trade in which currency to reap windfall profits!

Now, we understand that trading in the world's currencies is something most people don't do. Unless you while away your days sailing the Seven Seas, you probably cannot relate to Yen, Euros, and Francs the way you do the DOW, Nasdaq, and the NYSE.

But, the simple fact of the matter is: The wealth of the world flows into the country that -- for a variety of reasons -- offers the greatest potential real time returns.

And, at the *Currencies and Resources Seminar*, we'll give you the reasons -- so that day after day, you can cash in on the real time returns!

And that's just the beginning -- of the dollar's crash and *your* cash ...

Seminar Topic #2 - Making A Killing In Commodities

The *Currencies and Resources Seminar* will also help you understand why the time has never been better to diversify your portfolio into the cyclical cyclone of commodities -- if you know what to hold and when to fold.

And you will -- once you have listened to the sage advice of seminar experts who have helped thousands make millions on oil, soybeans, and pork belly futures.

Now, I have a feeling I know what you're saying (or, what, perhaps, you should be saying): The past 20 years has been a bear market for commodities. And, in fact, Lynch even closed down its commodities trading market.

Well, you're right. But, that was then, and this is now. And now is the time for you to learn how to cash in.

Why? Think of it this way ... It happened three times in the previous century -- the 1910's, the 1940's, and the 1970's -- and it actually appears to be happening again: commodities prices across the board are exploding exponentially:

- Crude oil prices are at their highest levels in 13 years -- and

OPEC's recent announcement that it will *not* curtail production should drive them even higher!

- Cattle prices are at their all-time highs!
- With the condition of the Great Plains winter wheat crop in question and the UN tendering nearly a million tons of wheat for Iraq, an upside explosion is underway!
- The price of soybeans has nearly doubled since 2002!
- Even coffee, on a downward trend for the past year, recently closed at a three-month high!

As the global economy expands -- especially against the falling USD -- the demand for commodities will rise. And so will commodities prices. China has already seen a shortage of some of the major commodities, namely steel, lumber, and oil. The continued growth of China's economy will continue the trend.

At the *Currencies and Resources Seminar*, you'll not only learn what's on the rise, but how to hedge your bets and when to make your play. For example:

- You will learn how to track prices and read price charts to spot commodity trading trends
- You will learn more than two dozen chart patterns that develop in every commodity -- and how to quickly profit from each one
- You will learn how to put together your trading plan of action using the same methodology as top traders
- You will learn how to analyze and interpret trading ranges so you'll know when to buy low and sell short

Let me put it this way: The *Seminar* faculty is not going to teach you *what* commodities to trade. That information can change in a

heartbeat.

They're going to teach you *how* to trade commodities. That kind of knowledge can last you a lifetime -- and make you a fortune!

And, yet, there's even more ...

Seminar Topic #3 - Making A Profit On Precious Metals

Don't get spooked, I'm not a "Gold Bug." But, for your own good, the *Currencies and Resources Seminar* is going to put a gold bug in your ear.

You want to know why? Well, for openers, just take a quick glance at this chart:

	Mar. 17	Mar. 19	Result	Percent
US Gold	302.20	412.70	+110.50	+35.6
\$US Index	118.91	88.54	-30.37	-25.54
DOW	10,427	10,186	-241	-2.31

Now, I know that snapshots are not always indicative of long-term trends. But, anyone who has watched this stock market over the past four years -- and watched the price of gold over the past two years -- knows that this picture truly is worth a thousand words.

To put it bluntly, if you are not already diversifying into gold, you could soon come out short several hundred thousand dollars -- or more.

That's why I have included precious metals in the *Currencies and*

Resources Seminar. Oh, we'll cover all manner of precious metal opportunities, like:

Platinum -- Did you know that nearly one-quarter of the world's platinum demand now goes into a market that did not even exist six years ago? And when that market is as quixotic as jewelry, you better know when to sell short.

Silver -- Did you know that the last time silver showed the incipient surge it is now, it went on a five-year bull run that set some investors up for life?

"Dr. Copper" -- Did you know that they call it "Dr. Copper" because historically it has been better at predicting the world economy than even the top economists -- and right now, Dr. Copper is going parabolic?

Those are the kind of insights into what I call "second-tier" precious metals that can turn a dime to a dollar virtually overnight. But, the PM subject that's really going to tantalize your talismanic taste buds is gold. And I can tell you why in a single sentence.

It's from an article in Seminar faculty member Michael Checkan's newsletter. And it pretty much says it all:

"The dollar price of gold bottomed out at \$252.80 July 20, 1999. Since then, through January 6, 2004, the value of gold has risen an astounding 67% to reach \$424.40 per ounce."

The truth is, most savvy gold observers believe the current gold bull market began on March 27, 2002, when gold broke \$300 to stay. That

means if past gold trends prove prophetic, we are still at the bull market's beginning and have another two to three years of sharply escalating gold prices.

And, that's another important reason for you to get in your reservation now to make absolutely certain you are among the Select 200 at the *Currencies and Resources Seminar*.

You see, the big gains in a bull market are made by those who get in early, not by those who wait around to see which way the wind is blowing. That's especially true when it comes to precious metals. And what makes it particularly intriguing is that's not only when the gains are biggest -- that's also when the risks are lowest.

Where will the gold rush stop? Some analysts are saying, "Gold is in the adolescent stage of a bull market that will make the dot.com mania seem somber in comparison." Others say, "I feel comfortable in calling for gold well over \$1,000 in the next few years."

Whatever the case, one thing is certain: You need to be amidst the experts if you intend to be amongst the investors who strike it rich in precious metals. And that means San Diego under the sun!

In closing let me tell you just a little bit about those experts -- so that you'll know firsthand why I personally call them "The *Men With the Midas Touch*" ...

The Currencies And Resources Seminar's Ultimate Advantage:"The Men With The Midas Touch"

Let me go ahead and say it right from the start: In all the investment

seminars I have put together over the years, I have never seen a finer faculty with a better record.

Every one of them is a fabulously successful trader in his own right. And each has an established record of guiding clients to some of the highest yielding investments in the history of Currencies, Commodities, and Precious Metals.

You simply could not ask for more than that. And, the fact is, at this Seminar, they are not only going to tell you the inside secrets of their success. They are going to teach you how to share in that success for years to come.

So, let me briefly introduce you to these remarkable "Men with the Midas Touch" -- who will soon be your mentors and friends:

Eric Roseman -- The president of ENR Asset Management and editor of Sovereign Society's Commodity Trend Alert, Eric Roseman is one of the world's leading offshore mutual fund analysts.

Richard Rule -- Rick Rule is a General Partner of Global Resource Investments. For years he has been leading investors in mining, energy, water, forest products and agriculture.

Michael Checkan -- One of the first foreign exchange traders ever to operate in the United States, Michael Checkan is the president of Asset Strategies International, which developed the world's first government-guaranteed precious metals storage program.

Chuck Butler -- The director of Everbank World Markets and the author of the popular "Daily Pfenning" newsletter, Chuck Butler has a

career in investment services and currencies extending over 30 years.

Karim Rahemtulla -- Karim Rahemtulla has gained international renown by teaching clients worldwide how to use a fraction of their investable capital to hedge against impending catastrophes (as in the impending death of the dollar!) by using long-term, low-risk puts and calls. Widely respected as "*The Oxford Club's Options Expert*," Karim will show you step by step how to use his "LEAP Options System" to position your portfolio to take advantage of long-term moves on Gold, Currencies, Oil, and a variety of other commodities and precious metals.

Steve Belmont & Robert Meir -- As Senior Researcher and Senior Market Analyst for the Rutsen Meier Belmont Group at *Fox Investments* in Chicago these gentlemen have been analyzing and trading commodities, currencies and other alternative investments for Agora subscribers since 1982; and for Oxford Club members since 1991. *Fox Investments* is also the Oxford Club *Pillar One* partner for futures, options and managed futures accounts.

John Myers -- John Myers has been working with investors to profit in natural resources for over 20 years, starting as an apprentice to his father, hard-money legend C.V. Myers. In his newsletter, *Outstanding Investments*, he shows his readers how to take advantage of the profitable world of commodities - opportunities like gold, silver, oil, even water. John takes a hands-on approach to his recommendations: traveling in the oil-and-mineral rich expanse of western Canada, flying to South Africa to research gold opportunities and attending an OPEC meeting in Geneva. Through John's insights, his subscribers can safely multiply their wealth many times over.

Dan Denning -- Dan Denning is the editor of *Strategic Investment*, one of the most respected "big-picture" investment newsletters on the market. A former specialist in small-cap stocks, Dan has been at the helm of *Strategic Investment* since 1999 - where, drawing from his network of global contacts, he has designed an investment strategy to profit from trends in the world's credit and currency markets. His weekly e-mails and monthly newsletter give investors the most complete picture of what's shaping investment markets, what's coming next, and exactly what to do today.

Barbara Rockefeller -- Barbara Rockefeller is an international economist and an expert on currency trading, with over 20 years experience in the industry. She has worked in the foreign exchange department of Citibank and European American Bank and for the last ten years has been an NFA-registered Commodity Futures Adviser specializing in foreign exchange. She is the author of various highly regarded books on the subject, including *How to Invest Internationally*, *CNBC 24/7-Trading Around the Clock*, *Around the World*, *The Global Trader* and *Technical Analysis for Dummies*. Ms. Rockefeller is also the co-editor of a new service for individual traders, *The Money Trader*. But, perhaps most impressive of all, Ms. Rockefeller is an exceptionally gifted trader. Last year, for instance, if you were lucky enough to have been a client of Barbara's and followed her currency trading recommendations, a \$20,000 portfolio would have turned into \$81,043.75! In 2004, she's doing it again... already posting significant profits in the first two months of the year. Barbara will give you crucial insight into how the currency markets really work and will share with you her current top recommended trades.

Kevin S. Kerr -- As President and Chief Trading Officer of Kwest International, LLC Kevin Kerr has had an amazing career. At the age

of 20 he became a member of the New York Finex Exchange and soon afterward become a full seat member on the New York Board of Trade trading the dollar Index and cotton next to legends like Paul Tudor Jones. Kevin has traded and worked on all of the major US exchanges including the NYMEX crude oil pits during the first Gulf War in 1991, the Chicago Mercantile Exchange, and Chicago Board of Trade and others. Kevin was a senior trader and broker for OTC energy swaps and derivatives with Intercapital London and New York. He brings a unique and hands on insight to what actually goes on in the trading pits each day to help you better understand the process and gain a competitive edge. Kevin shares that insight with *Outstanding Investments* Subscribers as a frequent contributor.

There you have it -- a *Currencies and Resources Seminar* faculty that sets the standard for excellence in investment analysis. And can set you apart in the pursuit of profits in the turbulent times ahead.

Soon, they will be gathered under one roof -- for two full days -- to help you learn the secrets of turning Currencies, Commodities, and Precious Metals into a lasting family fortune.

**Attendance is Limited to Just 200 Select Participants --
So Sign up to Cash in NOW!**

The *Currencies and Resources Seminar* will cost you just **\$695** (*Oxford Club* Chairman's Circle members receive an additional discount). That's just **\$695** for highly specialized -- and, frankly, priceless -- instruction from nine of the world's leading authorities on Currencies, Commodities, and Precious Metals.

If you were to approach any one of these acknowledged experts

individually and ask for even an hour of his time, what you would learn would be worth (and could rightly cost you) thousands of dollars, many times over. Now, you sit down for more than two hours each -- and hear from every one of them -- and pay a mere fraction of that amount.

For more than four years, we have watched as the politicians and a complicit Fed have borrowed, begged, and stolen -- printed fiat money, lowered rates, and devalued the dollar -- as if there were no tomorrow. Well, tomorrow is here. And, for most investors, the impending Bust could mean the worst cash crash since the Great Depression.

But for you -- if you learn now how to take advantage of the impending Boom in Currencies, Commodities, and Precious Metals -- your financial success could be assured for generations to come.

So, I urge you to register: Don't wait one more moment to sign on as one of the Select 200 for this exclusive opportunity. **Simply click on the link at the bottom of this page OR CALL 888-799-0463 to register -- and do it now.**

Remember, the *Currencies and Resources Seminar* is strictly limited to just 200 savvy investors. I want you to be -- *you need to be* -- one of them. Let me hear from you today!

Sincerely,

Addison Wiggin
Publisher, Agora

P.S. The big picture is incredibly dark: The United States is technically bankrupt. And a devastating Catch 22 looms on the horizon. Unless

interest rates rise significantly, the severe downtrend in the dollar can be expected to continue, foreign investment will dry up, and the propped up U.S. economy could collapse like a house of cards.

If, on the other hand, interest rates do rise significantly, cash-strapped Americans will sell anything and everything --- cars, houses, stocks, bonds -- to get healthy, and catastrophic debt levels will ensure an economic implosion.

Either way, the dollar is doomed, and the market will likely follow it down. That's why the upcoming *Currencies and Resources Seminar* is so vitally important to your economic survival -- and prosperity.
