

Chinese Military Reports, 'America Is the Enemy!'

If you still think I'm just speculating... that this couldn't possibly be planned... maybe you haven't heard yet about a hugely popular book that's still making the rounds... first in Beijing... and now at the White House, the Pentagon, and CIA headquarters.

The book is called 'Unrestricted Warfare.' It's written by Colonels Qiao Liang and Wang Xiangsui, two high-ranking officials in the People's Liberation Army of China (PLA).

America, says the book, is China's most likely enemy for at least the next two decades, if not for the whole 21st century. The battle, they say, will be fought everywhere.

Drug smuggling... attacks on America's computer networks... media manipulation... intellectual piracy... exploiting loopholes in international law... and one of the most powerful weapons of all, **attacking America's financial base.**

Here's a direct quote from page 51 of the book:

'Financial war is a form of nonmilitary warfare which is just as terribly destructive as a bloody war, but in which no blood is actually shed... When people revise the history books... the section on financial warfare will command the reader's utmost attention.'

'Wal-Mart, the U.S. retailer, now has more than 300 permanent buyers in China, and last year imported \$12 billion of Chinese goods... if Wal-Mart were a country, it would rank ahead of Great Britain and Russia in total imports.'

The Irish Independent, Sept. 26, 2003

Beijing takes this book seriously. So does Washington.

The book also recommends Chinese companies infiltrate the U.S. stock market.

Imagine if the U.S. government started building companies just to drain income from Dow and Nasdaq investors. Imagine the U.S. Army taking over Motorola or QUALCOM so they could suck technology secrets out of other nations. Maybe it wouldn't happen here.

But it's business as usual in Beijing. With companies like PetroChina, the huge state-owned Chinese oil company. Or Hutchison-Whampoa, the state-owned Chinese construction conglomerate. Or COSCO, China's state-owned shipping giant.

The list goes on. As recently as 1999, the U.S. Congress named over 3,000 front companies for the Chinese army operating inside the United States!

Like I said...

Washington's got no grip on this. Neither does Wall Street. But you can do PLENTY to protect yourself. And make a handsome profit besides...

Strategic Investment: A History of Predicting History
by William Bonner

Right from the beginning -- over 19 years ago -- *Strategic Investment* has had a history of getting the world's most profitable trends right... and helping investors protect their money... and get richer!

- We called the fall of the Berlin Wall in 1989.

- We called the crash of the Japanese economy in 1990.
- We told investors the 1990 Gulf War would be 'short.' It lasted was 43 days.
- We said to get into Argentina when others ran - the market tripled.
- We called the same British Pound devaluation Soros did in 1992.
- We kept investors out of the 1987 crash.

In 2003 alone, we hit with...

- 113% gain on September .86 Euro FX calls
- 76% gain on DOW Diamonds June 03 76 puts
- 65% gain on DOW Diamonds June 03 88 puts
- Our readers have socked away 28% on Allied Defense.
- We made 89% in ASA Limited, a South African gold fund.
- There is a comfortable 13.3% so far accumulated in Walgreen Co.
- Up 38% in Curtis-Wright, a mid-cap defense stock
- Readers locked in 87.6% on Ducommun Inc.
- Just under 40% gains on iShares Emerging Markets Index Fund
- Another 26% so far in the Hong Kong Index Fund
- Plus, we're up 26% on our iShares Japan Index Fund
- We've seen gains of 15% on a Singapore fund, 12% in a Taiwan fund
- Readers' holdings in Glamis Gold are already up 50% and we're recommending that they buy more.
- Up over 50% on Newmont Mining
- Up 46% on the Prudent Bear Safe Harbor Fund

No question, the 'Big Picture' is the way to invest if you want to build real wealth... by spotting Big Trends before the rest... and raking in very substantial profits ahead of the crowd! Join us in our next long round of profits.

MONEY MAKER #1: How to Make 794%

Profits While Protecting Your Wealth

I should introduce myself. My name is Daniel Denning. I spearhead a group of private investors who have been following explosive profit trends like this China phenomenon...

Plus, the recent run-up in gold... Greenspan's interest-rate games... Bush's war in Iraq and the flood of profits in defense stocks... and much more.

Everything this private group does is centered on a strategic insights just like these. And every member of this group is a reader of my monthly investment advisory letter, *Strategic Investment*.

It's one of the longest-standing investment letters in the industry... with a long history of huge, triple-digit gains... including better than **145%, 221%, 249%, 445%, 420%, 1,400%... and more.** Just from pouncing on trends like these.

Strategic Investment readers discovered how to make **100% profits in one month** with MultiCorp... **92% profits with SouthWest Gold in one month and... 249% profits in just four months** on Philip Morris...

We've also made many other stunningly fast profits...

65% and 77% on Dow Diamonds puts... 45% on AngloGold... 87.6% on Ducommun... 39% on Oxford Health Plans... 28% on Allied Defense Group... 114% on Euro calls... another 171% on DJX puts...

But you're going to DWARF those gains when you take a gander at the blockbuster double-play strategy in your **FREE** e-copy of my newest special investing report, **'Total Profit Protection From the Coming China Crisis!'** This is very simple.

It's made up of two steps.

You can do one, or both. It's up to you. But they're easy. And they take a minimum commitment of time and investing capital to set up. Here's how it works:

Let's start with the defending yourself against a falling dollar...

It used to be that the only way you could hedge against a currency was to take a huge chunk of cash down to the bank and throw it all into the foreign currency market.

This is what George Soros did in 1992, when he made a billion dollars in a single day on a crash of the British pound. But he had to leverage over \$10 billion to get that gain.

But it's not like that anymore. You don't need a huge pile of cash. And you don't need to buy the actual currency. You can profit from a delining dollar by buying outside the United States... and by buying commodities that are in huge demand by explosivlely growing nations.

In your **FREE** e-copy of '**Total Protection From the Coming China Crisis!**' I show you exactly how to do both with several blockbuster investment opportunities. They're low cost to get in. And all it takes is a phone call to set it up.

As long as the yuan is pegged to the dollar, Washington plans to keep the dollar weak. But what they aren't telling you is they've already lost control. When the downward spiral begins, you could make at least eight times your money on this powerful strategy...

...Plus up to 400% on

the Coming Bond Collapse!

OK, now let's look at protecting yourself from a bond market collapse. Remember, the Chinese hold an estimated \$120 billion in U.S. Treasuries. When they stop buying and start selling, it's crash time for the U.S. bond market.

Because to keep Treasuries attractive, interest rates have to go up. When interest rates go up, issued bonds with the lower yields look less valuable. And the bond market goes up in flames.

That's bad news for bond holders. But it's good news for you, if you know the strategy I recommend to profit from it. I lay out for you in **'Total Protection From the Coming China Crisis!'** Some of my readers and I have profited twice in the last few months...

In just eight days, we locked in 50%... in another four days, we socked away an extra 27%... but this is a bigger opportunity, with a slightly longer term. I expect you to make up to 400% or more just on this strategy.

How to Make 500% in Asia... Without Investing in Chinese Companies

When you pick an *'Exchange-Traded Fund'* (ETF) to invest in, it has to be (1) *liquid*, so you can sell quickly if you need to move your money somewhere else and (2) *inexpensive*, since some are much better priced than others.

Right now, ETFs are popping up to cover sectors of the Asian-Pacific countries left and right. Japan, Korea, Malaysia, Singapore, Taiwan, India, Australia, New Zealand...

They're further broken down by sector, by size of the companies they carry, by the indexes they trade on, and just about every other variation you can imagine. **Some are good, some are great, and some are excellent.** You could do the research yourself... or you could find out all about the five ETFs I'm recommending right now for my Strategic Investment readers... just click the 'Subscribe Now' button for the FREE report I've put together. It's called, ***'How To Pile Up 500% Gains Investing Outside of China.'***

My *Strategic Investment* readers and I made the same kinds of exponential profits when I showed them how to buy puts on the Dow. One reader wrote in to say thanks for a **586% return** on one of my recommendations:

'Hello Dan, Thank you for the great advice. I bought my Dow Sept 90 Puts at \$1.40 and sold them for \$9.60. -- a very substantial profit, thanks...'- Ian McFarlane

Another, who quickly made back his investment and is now piling up profits, writes:

'Thanks for getting me to check out those Dec. put options... I sold half at \$780 each and I've gotten all my money back and then some... they've been up to almost \$1,200 and we still have three months to go!' - John T. Ashworth

And still another *Strategic Investment* reader says:

'Dan, I ended up making four times my original investment... who's complaining when the profit margin is 300%!'- Mark Mansfield

When should you jump on this? As soon as China starts dumping bonds... that's our signal! I show you exactly how to set all this up in your **FREE** copy of the report. I also show how to do this inside the added protection of what's called an 'exchange-traded fund' (ETF). Of course, this is just the beginning. Make no mistake. This is a tectonic shift in the world economy. And it's opening up many more ways to pile up a fortune...

**HUGE MONEYMAKER OPPORTUNITY #2:
Make 10 Times Your Money on theResource
Explosion of 2004-2005**

I'm telling my *Strategic Investment* readers to get ready for a 20-year bull market in just about every raw resource they can think of...

Copper... gold... silver... nickel....oil... natural gas... wheat... coffee...

What? Sure Dan, commodities have soared over the last year. But how could this run of profits last for 20 years? Right of you to ask. And ordinarily I'd expect you to think I'd lost my marbles to make predictions that broad and that long-lasting. But first, hear me out.

Just on energy alone, take a look at these China-related numbers:

- In 1993, China became a net oil IMPORTER just like the Unites States.
- More than half of China's 26 provinces are already facing electricity shortages.
- China is now the second largest energy buyer in the world, after the Unites States.
- China will demand 290 million metric tons of oil by the end of 2004.
- China's oil demand is expected to double by 2010.
- China's electricity demand has already doubled, and it should quadruple by 2020.
- Last year, China drove 35% of global oil demand.

That's just energy.

Consider: During the 1800s, Britain went through a boom. During the 1900s, it was America. Both had huge downturns during those times... but commodity demand exploded for both for the full century.

China's wealth expansion dates back to the first reforms in 1979. But already, they've at least doubled and tripled their needs for lots of raw

goods. For instance, just in the last year China's steel imports SKYROCKETED 36 million metric tons (an international record)... its copper imports EXPLODED by 48%... iron ore, platinum, palladium, iridium, alumina...

If it can be chipped, mined, grown, or smelted, China wants it. A lot of it. And that virtually guarantees MASSIVE demand and commodity price hikes all around the world... almost as far as they eye can see...

The Biggest Bull Market In Commodity History

Let's just think about this.

The Chinese already have more refrigerators, more mobile phones, more TVs, AND more motorcycles than the United States. They need lots of juice to power all that technology. They're just getting started.

In the United States, we burn through 22 million barrels of oil per day. Asia -- with total population 10 times larger than in the US -- still 'only' burns through 19 million barrels of oil per day.

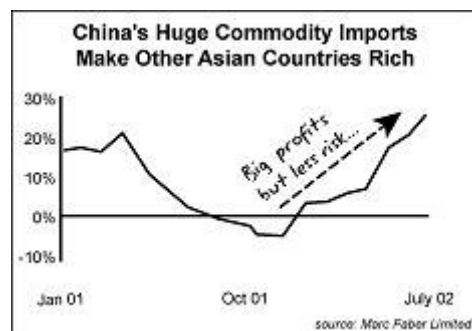

What happens when Asia uses as much oil as the United States?

Chinese oil demand is already double what it was seven years ago. So is Japan's. Economist Marc Faber, who lives in Hong Kong, predicts it will double again over the next 10 years. (Marc, by the way contributes to both *Barron's* and *Strategic Investment*.)

Translation: **Without oil and other commodities, the Chinese miracle is over!**

Will oil geopolitics change? They'll have to. Will oil prices go up? Absolutely. Will investors in energy and other commodities get VERY RICH? I'm counting on it.

Here's the way to make money. First, take a look at this next chart...

Despite having a huge amount of land, China has a pathetic amount of minerals... and they've already burned through a lot of their domestic oil supply...

So China is literally a hostage to all the rest of the countries able to feed China fresh supplies of raw material! Own the right commodity-based investments in the

right countries and you'll make a huge pile of profits. It's almost that simple.

In the **FREE STRATEGIC PROFIT PROTECTION LIBRARY** I put together for you, there's another report -- '**Make Ten Times Your Money in the Inevitable Resource Explosion of 2004-2005**' -- I urge you to read.

I'll show you all the investments I'm recommending right now to readers of my newsletter, *Strategic Investment*. I'll also give you a full strategy for as much of the rest of this 20-year bull market in commodities as we can figure out in advance...

The Next New Oil War?

China's imports shot up 40% over the last year.

What happens now that the Chinese can trade gold on the Shanghai exchange?

What happens when U.S. and China oil demands collide?

Already, two of China's largest oil companies just outbid several rivals to take over huge Indonesian gas and oil fields. And Beijing just invested \$9 billion in a natural gas project in Jakarta.

China also imports oil from Iraq, Iran, Saudi Arabia, Sudan, Angola, Nigeria, Russia, Argentina, Bangladesh, Canada, Colombia, Ecuador, Mexico, Venezuela, and even the United States.

On certain energy plays I've got pegged for the *Strategic Investment* portfolio, it is very possible to start making 300% to 400% gains in a very short period of time. And gold...

As I'll show you in '**Make Ten Times Your Money in the Inevitable Commodities Explosion of 2004-2005**', I see gold and the DOW crossing

Sourpuss or Stock Market Genius?

When Bill Bonner, author of the *NY Times* # 1 Business Bestseller - *Financial Reckoning Day*, predicted the dot.com collapse, *Money* magazine called him a sourpuss, but *Worth* magazine says he's a genius. He said the 'New Era' was a fraud as early as the autumn of '99, when almost everyone thought it was for real. Six months later, the New Era was history.

We'd like to offer you **The Daily Reckoning**, an irreverent mix of contrarian commentary and as one reader points out '*...monetary sense in a world gone fiscally mad...*' Nothing else like it on the Internet... and it's free. You can begin your FREE subscription to **The Daily Reckoning** E-Letter by entering your e-mail address below and clicking 'Subscribe'.

You won't find more thought provoking writing anywhere on the Internet.

We value your privacy.

paths. Spot gold could double from current prices. Gold stocks blast off to five and six times their current levels.

And that's just the bigger players. **Junior gold stocks could shoot up 20 times current share prices...** just as soon as the U.S. dollar starts hits freefall.

In your **FREE** e-copy of ' **Make Ten Times Your Money in the Inevitable Commodities Explosion of 2004-2005**', I'll show you how. I'll rush you this **FREE** report the moment you let me know you're ready.

A Juggernaut That Can't Be Stopped

What if China gets slammed by another SARS outbreak or some other crisis?

Profits will just keep pouring in!

Because China has to pay for its commodities, regardless. It needs them. She doesn't have them. So whether China likes it or not, its going to have to make a lot of raw resource investors -- even outside of China -- incredibly RICH, as China just keeps on buying and growing.

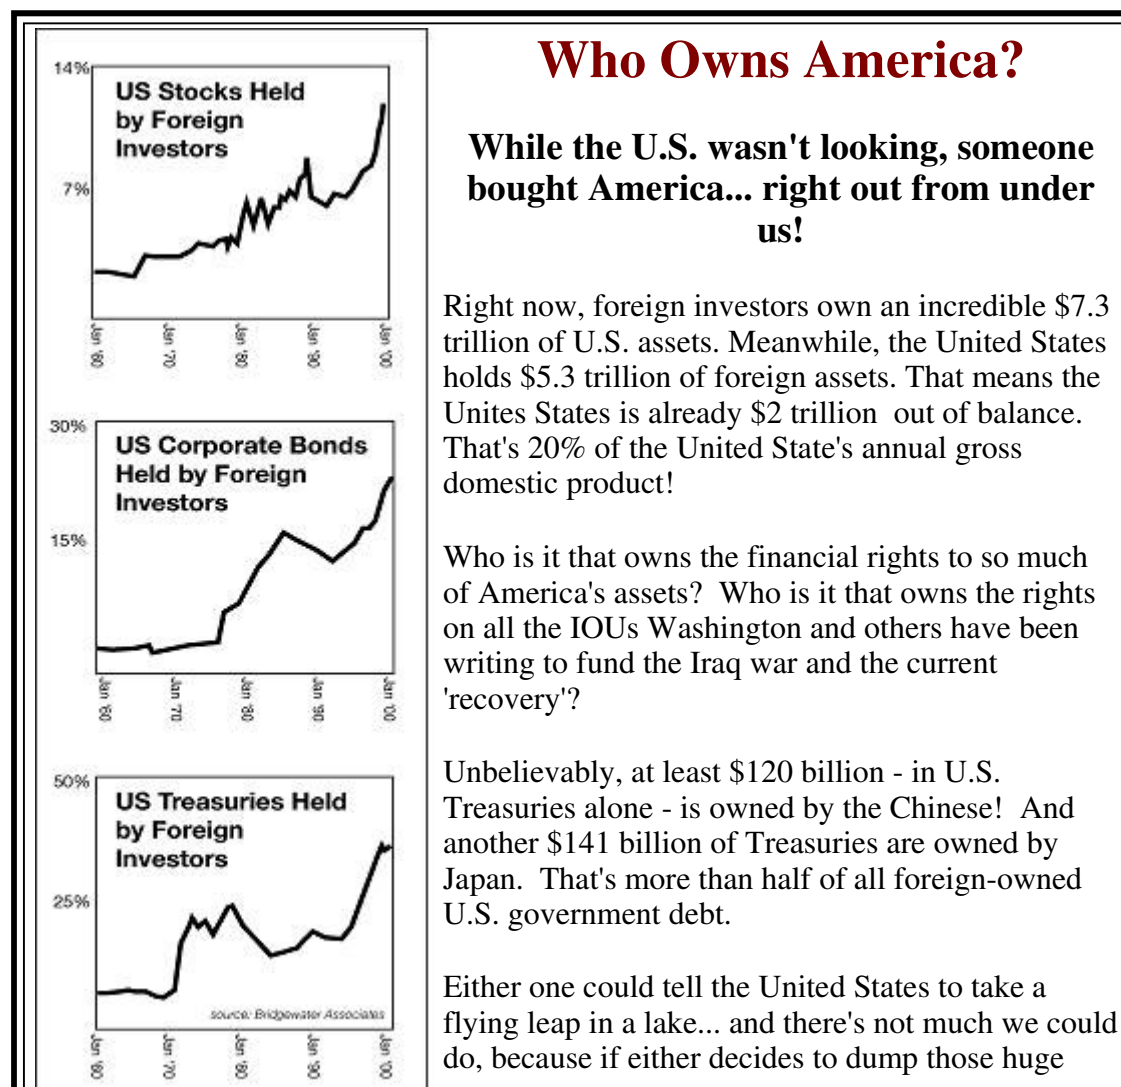

Already it's happening. Over the last several years, China has pounced on commodities like a tiger on tenderloin. If China keeps growing annually at 8% and even 9%, demand for raw goods will just keep growing!

So I'm convinced you can make a fortune on this.

All you need to know is how to own the right commodities and the investments tied to those commodities. And that's exactly what you'll find

in your **FREE** copy of 'Make Ten Times Your Money in the Inevitable Commodities Explosion of 2004-2005'.

But first, here's another way you can pile up profits over the next 12 months...

holdings of U.S. debt, the U.S. economy is done for. (There's no telling how much stock or corporate bonds they hold, but it's a considerable amount. And they could dump that at any time too.)

The moment the sell signal comes, a bond market collapse... rising interest rates... even more dollar devastation... and a crumbling stock market... are all but guaranteed. Protect yourself by reading my new FREE report, Total Profit Protection During the Coming China Crisis.

MAJOR MONEYMAKER #3: How You'll Pile up 500% on an Asia Boom Without the Risk of Chinese Stocks

What's the absolute best way to profit from Asian *stocks*? Aside from buying commodities, it's to *buy the companies and countries that export TO China!*

Take a look at the chart to the left. Sure, China's economy is exploding. But so are the economies of China's neighbors.

Invest in Chinese stocks, and you might be buying a hidden political risk... a cooked balance sheet... or just too much premium, thanks to all the recent China *hype*.

But as you can see in this chart, *China isn't the only story in Asia!*

A HUGE Profit Opportunity That Lets You Sleep at Night

What a lot of American investors DON'T know is that China is not just a massive exporter. It's also one of the world's largest IMPORTERS. Last year, China's imports shot up an incredible 41%.

China accounted for 62% of Korea's total surplus in commodity trade... Indeed, China is now Korea's largest trading partner, leaving behind both the Unites States. and Japan...

Japan's exports to China shot up 33.2% in 2003, the biggest jump since 1961.

Vietnam's exports to China -- including crude oil, coffee, seafood, vegetables, footwear, tea, machinery, and rubber -- surged 14%. And China invested \$5.1 billion in a total 288 new business ventures *inside* Vietnam.

Malaysia's exports to China are up 30% just over the last three months, thanks to demand for electrical components.

Singapore's exports to China have shot up 69% over the prior year, mostly because of petrochemical sales.

China is now a bigger net importer of Asian goods than even Japan.. In fact, it's a bigger importer of Asian goods than even the Unites States. Some of those goods are raw materials. As the Chinese middle class gets bigger, other imports are finished goods. You can make money just by knowing where and how to find the sellers.

It's the gold old 'pick-and-shovel' theory. *Don't buy the unproven fad -- buy the proven materials feeding that fad!* Here's how...

I Urge You to Read

This FREE Investing Report

I hope you'll let me send you the third **FREE** e-report included in my new **STRATEGIC PROFITS PROTECTION LIBRARY**.

It's called, '**How to Pile up 500% Gains Investing Outside of China.**' Inside it shows you how you've got basically *two important ways* to play the stock market angle in Asia...

FIRST, you can make huge gains buying the best Asian country funds: Imagine if you could buy the S&P way back in 1982. It's up nearly **10 TIMES** what it was worth then. Even after crashes. The right Asian countries now are like the S&P500 yesterday. The big call is just to buy. You're looking at the possibility of *1000% gains* over the next 10 years. Without much stress, without much worry. Even if we're just talking 400% to 500%, this will prove one of those 'if you could make one investment every 20 years, this is it' investments.

There are literally *hundreds* of Asian country-based and index-based mutual funds. My readers are already making money on them in my ***Strategic Investment*** advisory letter portfolio. In your **FREE** e-copy of '**How to Pile up 500% Gains Investing Outside of China**', I'll show you precisely which ones to buy now... which ones we're holding... and which ones to avoid like the plague!

And SECOND, you can make massive gains by using 'exchange-traded funds:' In every bull market, there's at least one 'fashionable' class of investment everyone talks about. This time it's the exchange-traded fund (ETF). But I guarantee you nobody is using them the way we've figured out how to use them.

ETFs are like mini-mutual funds. Except because they let you own a much

smaller basket of stocks, management fees are usually smaller. Because of the way *ETFs* are structured, the risk of scandal and management fraud is next to nothing. Yet because they contain several carefully different stocks from any one chosen sector, *ETFs* let you minimize and spread out investing risk.

ETFs are popping up all over Asia right now. In just about every country and broken '**How to Pile up 500% Gains Investing Outside of China,**' I'll give you the names of *five must-own ETFs available right now.*

These are the same five I've just recommended to my *Strategic Investment* readers. So far, the weakest of those five has already given us profits of *10% in just three months.* The rest are averaging between 30% and 40% over the same period.

I expect all of them to keep soaring higher.

Send for your **FREE** copy of the report, '**How To Pile Up 500% Gains Investing Outside of China**'. Just one of the three **FREE** investing strategy reports that you get when you let me send you my new **STRATEGIC PROFITS PROTECTION LIBRARY**. Again, it's free. There's no charge.

There is, however, one small 'catch.' I'd like you to try *Strategic Investment...* 'FREE' too. For 90 days. Let me explain...

**Try Strategic Investment
for 90 Days... also FREE!**

I hope you can see how -- with this massive China trend already under way -- you'll have to make a choice very soon. You can either roll the dice and

see what comes up. Or you can take the protective and incredibly profitable steps I've just shown you.

I like to think that you and I are alike. And that if you see an opportunity to stand up for *yourself* and look out for your *own* wealth... rather than entrust it to pulpit-pounding politicians and bureaucrats... *you will then seize that chance.*

I hope that's the case. Which is why I don't want to wait too long before rushing you the **STRATEGIC PROFIT PROTECTION LIBRARY** that we just talked about.

But I want to send you something else too. I'd like to get you in on what thousands of other investors have enjoyed... my *Strategic Investment* advisory letter.

Though this may be the first you've heard of it, *Strategic Investment* has actually covered huge profit opportunities and trends in the marketplace for nearly *20 years*.

It's been at the heart of controversy... it's lead the news with predictions no other journalists or investment experts could see... it's delved into secrets nobody dared uncover... but most of all, it's helped a lot of INVESTORS get very RICH indeed!

During one of Argentina's crashing markets... when most investors were on the run... *Strategic Investment* saw the turnaround point and told readers it was a good time to get back in. *A year later, the Argentine market had tripled.*

Strategic Investment called the '87 stock market crash... the fall of the Wall in Berlin... the start of the Gulf War... and the 2002-2003

explosion of the gold market...

I've told investors how to more than double **their money** on a little-known mining company called Royal Oak Mines... how to **make 445% on Dell Computers...** how to tuck away **106% gains on Franco Nevada... 170% gains on Euro June 2003 puts...** and another **114% gains on September Euro calls...**

The list goes on.

But I firmly believe if you follow me on this, you're going to shatter all those records and beat those returns just by making the investments I want to e-mail you in your **FREE STRATEGIC PROFITS PROTECTION LIBRARY**.

And you're going to do even better when you start following the investments I'll tell you about every single month in your issues of *Strategic Investment*, which I hope you'll agree to try FREE for 90 days. If you accept my invitation right *now*, in response to this letter, here's a detailed rundown of everything you'll get:

First, every weekday morning, I'll start by sending you *'The Daily Reckoning,'* a *stunning market commentary* by my colleagues, bestselling authors Bill Bonner and Addison Wiggin. Each e-mailed issue is packed with insights I personally agree with and know you shouldn't be without. This is **yours FREE**.

Then we really get started. I'll also send you -- via e-mail -- my own detailed analysts of what's going on with your investments... your *Strategic Investment* portfolio... and markets and news around the world. I write this personally and I'll send it to you at the end of every week. This is also **yours FREE**, just for trying my advisory newsletter.

You'll get urgent e-mail profit alerts *every time* there's an investment opportunity so fast moving I think you need to know about it. And of course, I'll also use this to steer you away from sudden market dangers you might not be aware of -- **yours FREE**.

Only subscribers to my advisory letter ***Strategic Investment*** can get into the private members-only web site. You'll have that exclusive access if you accept my invitation. It's packed with updates, new investment recommendations and follow-ups, searchable archives of past issues, guides, advisories, and recommendations, and a lot more. Combined with the e-alerts, this is easily over \$500 worth of investment resources. All by itself. However, it's **yours FREE** when you accept my offer.

Of course, you'll get all three reports in the **STRATEGIC PROFITS PROTECTION LIBRARY** too: '**How to Pile up 500% Gains Investing Outside of China**', '**Total Profit Protection During the Coming China Crisis**' and '**Make Ten Times Your Money in the Inevitable Commodities Explosion Ahead**.' Worth over \$200, but **yours FREE**.

Last but absolutely not least, you'll start getting fresh issues of ***Strategic Investment*** every single week. It will arrive promptly in your mail. And you'll find it packed with valuable investment ideas, trends, insights, warnings, breathtaking opportunity, and virtually everything else you'll need to survive, thrive, and continue building your investment fortune in the 21st century.

What Dan's Readers Are Saying...

'Thanks for the 586% Profit Call, Dan.'

'Thank you for the great advice. I bought my Dow Sept 90 Puts at \$1.40 and sold them for \$9.60. -- a very substantial profit, thanks.' - Ian

McFarlane

'I've Made Four Times My Original Investment...'

'I ended up making four times my original investment. Just wish I had a few more of the contracts and waited a few days longer to cash out. But hey, who's complaining when the profit margin is 300%? I can easily say that I have made a ton of money this year in the stock market.' -

Mark Mansfield

'I Use Your Advice for My Own Financial Clients.'

'Gentlemen, I've been a life member for a number of years... I'm also a financial planner... I read everything you print and use it in making decisions for myself and my clients. Thank you for your excellent information...' - Thomas T. Slaughter

'Those Puts You Recommended Are up 54%.'

'Thanks for getting me to check out those Dec. put options... I sold half at \$780 each and I've gotten all my money back and then some... they've been up to almost \$1,200 and we still have three months to go!' - John T. Ashworth

'I Just Made 39% Profits, Dan... Thanks!'

'Dan, I bought a modest number of Sep. 02 Dow 90 puts at \$4.40 and sold at \$6.15 including dealing costs. Wish I'd bought more... Thank you!' - Mike Davis

'Thanks for Your Outstanding, Courageous Insight.'

'Thanks for outstanding... courageous insight... I hope you'll continue to share it with your readers!' - R. Forkner

'I've Made \$1,618!'

'Counting dividends and costs, I've made \$1,618... on an investment of \$3,142... wish I could always do this well!' - Bill Gross

And as I promised, I want you to try all this for 90 days... in a **FREE** trial that works like this:

*All you need to do is sign up to receive **Strategic Investment**. I'll e-mail you everything we just talked about.*

Just so my publisher doesn't have to assume all the risk, you cover the subscription price when you sign up. However, that's where the generous free trial kicks in...

You've got a full 90 RISK-FREE DAYS to decide. If Strategic Investment just isn't for you, simply cancel. IF YOU'RE NOT 100% SATISFIED, THERE'S ABSOLUTELY NO CHARGE TO YOU -- EVERYTHING YOU'VE RECEIVED WILL BE YOURS FREE.

I won't ask you any questions. I won't get in your way. And even if you DO decide to cancel, you still get to keep all the FREE reports in your STRATEGIC PROFITS PROTECTION LIBRARY. Every last one.

You'll get a full refund, the **STRATEGIC PROFIT PROTECTION LIBRARY** reports sent to you right away via e-mail, and all the profitable trades and information sent to you during the trial period. *So 90 risk-free days, everything above, and all your money back, no charge. I hope that sounds fair to you.*

But suppose you decide to stick around after 90 days, you might ask. Well...

The *real* total value of everything you get just with the offer is worth \$915. And I've also seen people pay as much as \$3,500 and even \$5,000 for investment services and investment advice (just the advice) that aren't nearly as thorough or accurate.

But not here, not on my watch.

The net cost to you for a full **two years** of monthly *Strategic Investment* issues and everything else included above is just \$159. If you'd rather go for a single year (12 issues plus everything above) I'll ask you to pay only \$99.

And either way you still get the full no-risk, money-back, 90-day trial guarantee. You risk nothing. Use the information in the FREE investment reports I'll send you by e-mail right away. Protect your portfolio immediately... set yourself up for immediate gains... and settle back to enjoy your long-term strategy accordingly.

As I said, you pay only \$159 for a full TWO YEARS (24 issues) of *Strategic Investment*... just \$99 for ONE YEAR (12 issues). In the issues, I'll continue covering every opportunity we've talked about today... plus an untold number of new ways for you to make and protect your money in the incredible market gyrations ahead.

Either way you get an excellent deal. I hope you'll decide to give it a try. These are great moneymaking opportunities. *I would hate for you to miss them.*

Sincerely,

Daniel Denning,
Senior Editor, *Strategic Investment*

P.S. Is Beijing's assault on the U.S. economy going to succeed? I can tell you this -- History is not over. There's no way to tell how it ends. But there's no way to force it to end a certain way either.

Personally, I think Beijing's dictators are building a bubble of vanity that's bound to collapse one day. A 20-year economic plan just isn't realistic thinking. But for at least the next several years, the risks I told you about in this letter are exactly the risks you'll need to prepare for, both now and for a long time to come.

The yuan will stay pegged to the dollar... labor in China will stay cheap... and rapid economic growth there is getting faster, not slowing down...

So I'm sure you see as I do which side of this coin is the safer bet. Sign up for *Strategic Investment* and get your **FREE STRATEGIC PROFITS LIBRARY** as soon as you have the chance. Test the strategies for yourself... make eight times your money (or more) when they pay off.

P.P.S. Did you know that every single week day, China also buys \$48.5 *million* in Fannie Mae and Freddie Mac mortgage-backed bonds? When you write a mortgage check, it's paying dividends to some guy in Beijing!

This just convinces me even *more* that U.S. real estate lenders and the U.S. real estate bubble are in for a radical shake-up over the months ahead. Which is why I've put together a *fourth* **FREE** report I want to se-mail to you.

I haven't mentioned it until now, but it's called, '**10 Safe Ways to Survive a Real Estate Collapse!**' If you own any property or know someone who does, you need this report. It's also yours FREE.
