

'Forbidden' Investments

**Four 'Taboo' money-makers, reserved for the
wealthy and well connected only - and strictly
off-limits to you... **Until Now!****

**These and many of the other best investments
and financial strategies in the world are HIDDEN
from you by a cartel of regulators & special
interests!**

**Yet one group has broken past the CENSORSHIP, seeing
gains of 797% and 1,794% in the bear market... legally
slashing their tax bills... building an iron wall of protection
around their assets... and creating a lasting legacy of wealth
for their families**

Here's how you can do the same...

Dear ripped-off investor:

Hugely profitable investments and financial strategies *are being hidden from you* by a cartel of lawyers, regulators and Wall Street special interests.

In this letter, I'll reveal the most important of these - including four extremely profitable classes of investment that are practically **BLACKLISTED** by government snoops and financial power brokers. And I guarantee you - most, if not all of these, you've never heard about from your broker.

Why? His bosses have him push their 'preferred' investments (like shares of companies they have investment banking relationships with). Or he simply *can't* tell you because of a **GAG ORDER**.

Yet all of these investments are completely legal to own. In fact, one group of discreet, highly informed investors has been able to break through Washington and Wall Street's **INFORMATION BLACKOUT**. In this report, I'll show you how they've done it and how they've taken advantage of these 'forbidden investments' to the tune of...

797% gains from the fall of the dollar from April 2001 to March 2003

346% in the last 23 months on one of the fastest growing companies in Canada

550% since the peak of the bull market in 2000 on a closed-end investment company

91% since August 2002 on one of the best performing companies on the Australian stock exchange, but traded in the US too

195% in the last 16 months on the single biggest emerging trend in global finance (and this one has only just begun to soar!)

97% in just over two years on one of the best 'little big companies' you've ever seen

136% in the last 30 months on one of the most efficient gold and silver mining companies in the world

And 1,794% in just ten months on the surge of the euro - from May, 2002 to March 2003!

What's more, most of these investments are no riskier than your typical blue-chip stock. In many cases, they have far less risk. In fact, I'll show you a study by a Harvard professor that shows that adding some of these to your portfolio can reduce your overall risk while increasing your returns.

I'll also show you a *New York Times* article that revealed that one of these investments could have earned you 24% in a year with no more risk than a CD.

And I'll show you why this same group of followers I mentioned a moment ago can risk as little as a thousand dollars or less and have the potential to make *eight to eighteen times* their money - even while others lose millions in the bear market.

I'll even show you how - not only are top-performing investments deemed 'off limits' to you by the powers that be - but elite tax-reduction and asset protection strategies are also being hidden from you. Including legal but little-known techniques to help you...

Cut personal income and corporate taxes by as much as 45%

Stiff the feds on inheritance taxes, legally - with the same kind of techniques Sam Walton used to shelter his \$10 billion estate.

Use an approved European account to own profitable investment shares

with complete anonymity.

Take advantage of the world's most portable and private wealth by joining a gemstone buying syndicate for 30% to 60% net annualized profits.

Create airtight security for your computer with this secret technique, stronger than any firewall.

Make sure your life insurance benefit is not counted as part of the your estate and is tax-free

Get free government insurance on your gold holdings... *and* free storage!

Take advantage of a guaranteed depository for your gold, where you can hold up to \$1 million or more of the yellow metal - without having to report it!

Move your IRA account offshore, legally and safely (Most people don't even realize their retirement assets *can be seized in a lawsuit!* Yet they can. Here's how to gain greater protection and profits.)

Buy an incredibly safe asset that has *never gone down in value* on an annual basis over the last 32 years!

Discover the safest, most liquid and potentially most profitable type of collectible coins you should buy - *and why you should buy no others!*

These are highly profitable and prudent financial strategies known only to the very rich - but they're available to you too - *if you can find out about them!*

And that's just what you'll do in this report...

In the following pages, I'll reveal a hidden world of financial privilege - of incredible profits in bull and bear markets, of lower taxes even for wealthier individuals, and of far greater security against lawsuits and government seizure.

Let me begin by breaking the **SILENCE** on one of the best investment opportunities you'll never hear about on Wall Street...

Hidden Investment Class # 1: Top-performing Funds Your Broker Never Told You About

Business Week recently reported that all 500 of a special class of mutual funds posted positive gains in the last quarter. And over 96% of them had double-digit gains, including 58% gains by Apo Biotech and 47% by the Special Europe Stock Fund.

Yet every single one of these funds is HIDDEN from you by US regulators.

What's more, some of these funds have been making investors bull-market profits for over 100 years, including one that has doubled investors' money about once every 5 ½ years for the last 133 years!

Others have been making investors rich during the bear market. For instance,

MLIIF World Gold, posted 116% returns in the first three years of the bear market.

Value Partners A, gained 113%.

Parvest China C, meanwhile, is up 440% in the last five years.

And Baring Korea Trust is up 320%.

Yet US regulators CENSOR information about all of these funds!

It's perfectly legal for U.S. persons to own these funds. But Wall Street moguls and their SEC toadies have made it nearly impossible for you to ***find out*** about them...unless you're well connected and part of the wealthy elite.

Why? Because they're 'offshore funds.' That means they're managed from other countries - like Switzerland, Hong Kong, England, Luxembourg and others.

And while most of these financial centers have far stricter corporate governance and regulation than scandal-plagued Wall Street... regulators say they're 'protecting' you by enforcing an **INFORMATION BLACKOUT** on these funds.

But the truth is, these funds pose a threat to the US mutual fund cartel. That's why industry lobbyists have persuaded US lawmakers to bar these funds from advertising in the US.

That's why you'll never hear about some of the safest, best performing funds in the world from your broker and you're not likely to read about them in Money Magazine or hear about them on CNN.

Yet they're making a handful of well-informed investors from the US and around the world some very substantial profits. With returns like...

57% in the last three months from UBS EF-Asian Technology

85% in the last six months from RP Selection Europe

141% in the last two years from CA Funds Thailand Classic.

Where Did Those 100,000 American Millionaires Go?

Merrill Lynch and Cap Gemini Ernst and Young recently did a study on US and global wealth. They concluded that there were 2 million American millionaires at the end of 2002. That's 100,000 less than the year before!

You might think the bear market explains the disappearance of these 100,000 millionaires... but that isn't the whole story. The same study also found the number of millionaires in other *parts of the world* **rose** by 200,000!

A better explanation was given by James Gorman, president of Merrill Lynch's global private client group. Gorman told *The New York Times* that Europeans generally 'moved earlier than their counterparts elsewhere to diversify their portfolios across major asset classes, insulating them against the worst of the downturn.'

Unfortunately, Gorman didn't tell *The Times* that many of these better performing asset classes are **HIDDEN** from US investors - by regulations that prohibit US advertising of many of the very best offshore funds and hedge funds.

He also didn't mention that other top-performing asset classes are reserved only for those with seven-figure wealth or more (unless you know how to get around that loophole)... and that other high-return asset classes simply aren't recommended by Wall Street because there are no IPO paydays for insiders or investment banking 'kickbacks.'

If you want to invest in the top-performing asset classes in the world at all times, you have to look beyond Wall Street. You have to find the kind of investments that have created 200,000 new millionaires in the last year - even while 100,000 American millionaires fell off the

charts.

The Sovereign Society is dedicated to helping you invest in the very best investments of all kinds - US and international stocks, onshore and offshore funds, skyrocketing currency trends, select, risk-controlled options, hedge funds that used to be reserved only for the wealthy elite, and more...

You can learn all about these bear-market-busting investments in a FREE special report just published by ***The Sovereign Society***. It's called: **The Black Book of Forbidden Investments: Secret Securities That Crush Stocks in Bull and Bear Markets**. Click on the subscribe button below to get your FREE copy today.

And 668% in the last five years from a rock-solid British mutual fund that's so secretive it's best I not mention it in this letter. (But I can and will tell you about it in a FREE special report I can send you that you'll learn about later on in this letter.)

Imagine what these returns could have done for your portfolio over the last three years - instead of being forced to choose only among crashing US stocks and funds.

These types of funds are regularly used by some of the wealthiest investors in the world, including George Soros and Sir John Templeton. But - for all intents and purposes - they're off-limits to you, thanks to an ongoing '**CENSORSHIP**' of some of the best performing investments in the world.

I'm going to tell you how you can break through their censorship and own these funds legally, safely and very profitably. But first, you should realize that these extremely profitable funds aren't the only high-performing investments that are being kept from you.

In fact, let me tell you about another 'taboo' investment right now. It too is making the rich richer... but it's completely off the radar screen for most individual investors.

Hidden Investment Class # 2: The Secret Investment That Has Crushed Stocks for the Last 30 Years

You've probably heard of 'hedge funds.' These are special funds that play both sides of the market (long and short) to reduce risk and maximize gains. In volatile markets such as we've had recently, they often outperform traditional mutual funds by 50% or more.

And yet, there's a particular type of hedge fund that performs better still. They're called Commodity Trading Advisors, or CTAs.

CTAs trade various types of commodities - from currencies to grains, oil and gas - again, long and short. They typically use tight selling stops, to limit risk. And they often let the winners ride to squeeze out maximum gains from rampaging trends. As a class, CTAs have crushed stocks through bull and bear markets.

According to University of Massachusetts's Center for the Study of International Securities and Derivatives, CTAs as a class have posted 2003% returns since 1980. That's far better than the 1,398% returns posted by the S&P 500 during the same time. And yet the very best CTAs produce far greater returns still.

One leading CTA, for instance, is managed by Dunn Capital Management. Every \$1,000 invested in this fund in 1979, would be worth over \$ 412,000 today!

Another leading CTA is owned by the owner of a major league baseball team, and bears his name. Yet it's so secretive, they threaten **legal action** if I mention their name in this letter to you. So I'll have to just call them 'Investment X.'

Investment X has done even better than Dunn Capital. It's compounded at a phenomenal 31% annually over the last 20 years. Each \$1,000 invested in 1984 would be worth over \$221,000 today.

And there's something else equally extraordinary about these investments. The higher returns do not necessarily have to come with higher risk. In fact, Professor Lintner of Harvard University recently did a study of these investments. He concluded that adding these investments to a typical stock and bond portfolio resulted in...

'substantially less risk at every possible level of expected return than portfolios of stocks (or stocks and bonds) alone.'

So why aren't these investments on the front page of *The Wall Street Journal* every day? It's because you have to 'qualify' to buy them. That means you have to have a \$1 million net worth or make \$200,000 a year for two years running to even find out about them. But, in reality, it's even more restrictive than that...

You see the investment minimum on Dunn is \$1 million. For Investment X, it's \$2.5 million! That means, to allocate your capital correctly to these funds (with no more than 14% of your portfolio), you'd need investment accounts worth between \$7 and \$17 million!

It's as if the 'Boys Club' of multimillionaires want

SECRETS OF THE GLOBAL MILLIONAIRES: How to Make 24% on Your 'Safe Money'

Short-term interest rates are at historic lows.

Consequently, many American investors are settling for 1% to 2% on their 'safe money.' Not **Sovereign Society** members.

In July 2003, *The New York Times* reported that developed economies with far healthier economic fundamentals than the US - countries like New Zealand and Australia - were paying as much as 4.63% on CDs. Add in the fact that the currency of New Zealand had appreciated 20% in the previous 12 months, and you

to make sure you never join them... by keeping the very best investments to themselves.

And yet, if you have the right connections, there's nothing they can do to prevent you from profiting right alongside them - even if you have just an average net worth or simply don't have an 'extra million' or so lying around.

I'd like to tell you how you can do that right now by sharing with you a bit of my own experience.

How to Gain Access to the Most Closely Guarded, Top-performing Investments in the World

My name is Erika Nolan. I'm the Executive Director of a private organization serving investors around the world. It's called ***The Sovereign Society***.

As our name implies, we believe each individual is sovereign. Our members are men and women of accomplishment and are accustomed to making decisions for themselves. They don't need to be 'babied,' and they resent excessive government interference in their lives.

If you've heard of ***The Sovereign Society***, you may be surprised to learn we have a global investment research group that has made our

could have made 24% on your 'safe money.' Better still, you didn't have to fly thousands of miles to take advantage of this opportunity. You could have bought these CDs through a bank in St. Louis!

While this was news for most investors, ***Sovereign Society*** members were already well informed of this opportunity. In fact, the president of the bank *The New York Times* highlighted has made these recommendations to ***Sovereign Society*** members and spoken at ***Sovereign Society*** conferences.

To take advantage of the most exclusive high-profit/low-risk investment opportunities in the world today, send away for your FREE copy of *The Black Book of Forbidden Investments: Secret Securities That Crush Stocks*

members the kinds of profits I've shown you. After all, we're best known as the premiere source for asset protection, privacy-protection and tax-reduction information and strategies for individual investors.

in Bull and Bear Markets.
Click on the subscribe button
below for your FREE copy
today!

And with litigation at an all-time high and the government encroaching more on personal liberties every day, we're more committed than ever to helping members secure their property and privacy rights. (Later in this letter, in fact, I'll tell you a bit more about the kind of information we regularly provide our members on these issues.)

But over the last six years, we've also put together an unrivaled network of international *investment* experts as well. Top professionals from the world's major financial centers in banking, money management, currency trading, global mutual funds, international stocks, precious metals and more...

As you'll see in this letter, these experts have helped ***Society*** members make tremendous profits in bull and bear markets. But, unfortunately, most investors never find out about the very best performing investments in the world. They're kept in the dark by arcane and self-serving regulation from Wall Street and Washington.

As a result, they end up stuck with the same old choices of over-hyped, overvalued stocks selling at ridiculous prices in a market that is due for another fall. But as global investors - with inside contacts on the absolutely best international investments from stocks to offshore funds, currencies and more - we can go wherever the best opportunities are at any time.

In fact, let me show you two more 'forbidden investments' your broker never told you about. Then I'll show you how you can consistently tap into these major profit producers, month in and month out, regardless of what the major US indexes do.

An Invitation to Join the World's Most Distinguished Group of Private Investors

When you become a member of *The Sovereign Society*, you'll receive the best information and advice money can buy on all points that matter about your wealth: international investments, asset protection, financial privacy, estate planning, tax reduction, international business opportunities, global real estate and more.

The intelligence and advice you receive from *The Society's Council of Experts* may come to you from any point in our global financial network, including London, Vienna, Dublin, Panama City, Hong Kong, Denmark, the Isle of Man, New York, Montreal and Geneva, just to name a few. Our experts and the areas they cover include:

On Global Mutual Funds and Special Investments: Eric Roseman of Montreal's ENR Asset Management on the world's best offshore mutual funds and hedge funds, including one, The Gresham House Investment Trust, that returned 7,908% between 1997 and 2002!

On Financial Privacy and Your Legal Rights: Robert E. Bauman, Esq.: former US Congressman and Legal Counsel to *The Sovereign Society*, on practical ways to defend your liberty and your wealth against an increasingly invasive government.

On Financial Freedom and Your Investments: Harry Browne, Libertarian Presidential candidate...and author of the best-selling book: *How I Found Freedom in an Unfree*

World...

On Global Banking and Safe Wealth Strategies: Peter Zipper of Vienna's Anglo-Irish Bank on owning gold anonymously and safely.

On Personal Liberties: Leon Leow, a Libertarian advocate of personal freedoms and a four-time Nobel Peace Prize Nominee.

On International Portfolio Diversification and Hedge Funds: Larry Grossman of Sovereign International Asset Management on why your IRA is not protected from creditors, how to protect and even how to buy real estate through your retirement account.

On Bullet-proof Asset Protection: Derek Sambrook of Trust Services on a foolproof 7-step checklist for going offshore...

On Offshore Real Estate Opportunities: Lief Simon, global real estate expert based in Ireland, on the best property buys from Europe to Latin America (including a program where the French government will pay 20% of your investment in a Mediterranean condo).

On Little-known Ways to Slash Estate Taxes: Michael Chatzky, Esq. of Chatzky Associates on how to choose the right trustee for your estate.

On Diversified European Investment Opportunities: Barrie Martin of London's NCL Smith and

Williamson on how to quickly and inexpensively put together an all-weather global portfolio.

On Currency Diversification and Investment

Programs: Thomas Fischer of Denmark's Jyske Bank on how to open a 'dry' offshore account - with no deposit needed right away. It's there ready for you, the moment you need to move assets out of harm's way.

On Combined Asset Protection and Investment

Programs: Marc Sola of Zurich-based NMB International Financial Services on the single best 'Swiss Solution' for asset protection, privacy and estate planning.

On Slashing Your Tax Burden: Vernon K. Jacobs, CPA, CLU, FLMI with insider strategies for reducing income and estate taxes.

On Offshore Business Investment Opportunities:

Rainelda Mata-Kelly of the law offices of Rainelda Mata-Kelly in Panama on how to set up a tax-advantaged International Business Corporation in a Caribbean asset haven that has had IBC-friendly laws for 76 years and a strong, stable currency for 100 years.

On Personal Protection against the Growth of Big Brother Government: Mark Nestmann, editor of The Sovereign Individual, on protecting your privacy and wealth during the 'War on Terrorism.'

On Profiting in the Dollar Bear Market: Robert Vrijhof of the Swiss portfolio management firm Weber, Hartmann,

Vrijhof & Partners on how to double your money or more on the fall of the dollar.

On Second Homes and Retirement Homes in Offshore Asset Havens: Greg Geruin, director of International Living's Panama office, on snapping up a 3-BR/3-Bath luxury condo (complete with maid's quarters) in a modern high-rise overlooking the Bay of Panama for \$145,000 - about 1/5th of what you'd pay in Miami just a three-hour flight away.

On Keeping More of What You Earn Legally and Safely: Leading international tax attorney and author Marshall Langer on the safest offshore tax shelters. Langer's Tax Exile Report is so powerful, in fact, that it was recently held up by a Senator in the US Senate and decried as 'a legal way to avoid taxes!' Guilty as charged.

On Making Your Assets 'Lawsuit Proof' and Free from the Threat of Seizure: David Melnik of the Queen's Counsel of Toronto and the former head of a major Swiss bank, on making your assets practically invisible to 'wealth predators.'

On Holding Secure, Virtually Untraceable Wealth: Jack Sturgis - Vice President of Dexia-Banque International a Luxembourg, on the advantages of private, secure offshore banking.

On Using Insurance as a Supercharged Tax, Privacy and Investment Tool: Colin Bowen of Isle of Man Assurance on how to use insurance as a tool for rock-solid asset protection.

On Precious Metals and Foreign Exchange Opportunities:

Foreign exchange specialist Michael Checkan on how to take advantage of the world's first government-guaranteed precious metals storage program.

On Offshore Funds and Hedge Funds: Christopher Aldous of Absolute Fund Management on how to use 'funds of hedge funds' for low-risk, high-profit returns.

Plus so much more...

In all, *The Sovereign Society's* Council of Experts is made up of 33 international experts in banking, finance, estate planning, asset protection, tax-reduction, and global investing. Their sole objective is to help members grow and protect their wealth through all sorts of environments - recessions and expansions, bull and bear markets.

To become a part of this elite group - and begin to profit from our global network of financial and legal contacts - Click on the subscribe button below to start your risk-free trial membership in *The Sovereign Society* today.

Hidden Investment Class # 3: The Financial Juggernaut That Is Making Informed Investors Rich

A major financial institution has recently listed its shares on the NYSE. Most investors have no clue they can own a piece of it because most investment writers aren't even aware of it. And those that are aware, are reluctant to write about it.

That's because this company is regulated by both the SEC and the CFTC

(Commodities Futures and Trading Commission). That means there are potentially a lot of hoops and hurdles for investment advisers. But if you know what you're doing, it's as simple as buying a stock - though it's far more profitable than most stocks.

Sovereign Society members are already seeing over 50% on this recommended investment since April... and they're now able to take advantage of its European counterpart too! And the profits on both have only just begun. What kind of profits? Well, remember how Fannie Mae made Peter Lynch a legend and his investors a great deal of money? Every thousand dollars invested in 1981 would become more than \$1.3 million by 2001.

Investors in these new shares stand to make an even greater killing since this institution represents what is rapidly becoming the biggest financial market in the world, even larger than mortgages...

It's very unlikely you'll learn about this kind of investment opportunity on your own. But at ***The Sovereign Society***, this is the type of 'insider's' opportunity in which we specialize. And later on in this report, I'll tell you how you can receive a FREE special report on this and other highly profitable 'hidden investments.'

But first, let me tell you about one more investment class where most investment advisers have been completely missing the boat. And how that may have cost you an opportunity to make as much as 18 times your money with very limited risk...
