

...keep reading. If not, you can simply stop paying. End of story. You can even get your money back. That's the way it should be...no hidden interests or secret agendas.

It's an approach that's worked well so far. In just our first three years, we've become one of the top five Investment Advisories in the country.

## **Let me explain more about how True Wealth works so you can decide if it's right for you...**

On the third Friday of each month I'll send you my monthly report by e-mail, giving you the details on the best current investment opportunity in the world. Soon after, you'll receive the same report by regular mail. I'll report on whatever investment has the best chance of big gains, with the least amount of risk.

It could be stocks, bond, real estate, or even other alternative investments that are easy to buy and sell.

Then, several times per week, you'll receive e-mail updates about what's happening in the markets, and specifically what's happening with the investments in our True Wealth Portfolio.

Over the past few years, we've done a pretty good job of finding good profits, even while most investors were losing a fortune. For example, take a look at the winners from our trading service...

- During the last bear market we recommended an investment in the second week of January. It was a retail business with operations in all 50 states, plus Puerto Rico and the U.S. Virgin Islands. In 7 days, traders who followed our advice could have made 300% profits.

- A few days later, on January 16th, we recommended a trade in one of the biggest electronics firms in the world. 19 days later, this recommendation realized a profit of 341%.

- A few months later, on April 23rd, we recommended a trade on one of America's most important telephone and Internet service companies. In 22 days investors who took this recommendation could have made 111% profits.

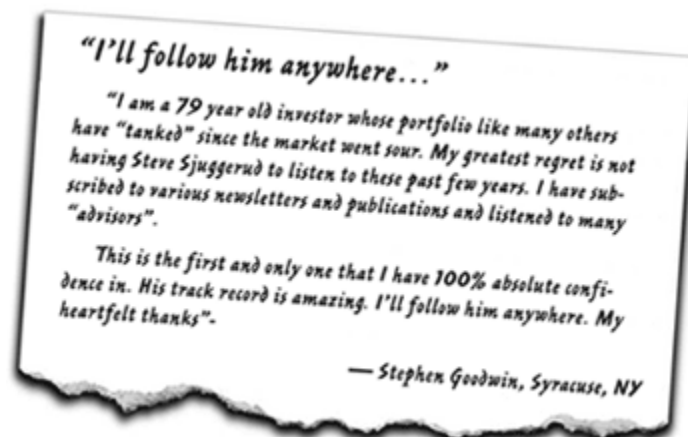

I know... anyone can cherry-pick a few winners. Everyone likes to tell you how much money they've made – but no one ever tells you about their losers.

What about our recommendations that didn't work out?

Well, our overall track record is unmatched as far as I know. Of the 25 investments in our portfolio right now, 23 of them have made very good money (See the box on page 11 for more details).

- We found super-safe CDs that paid 25% returns last year.
- We found a safe way to invest in companies that own real estate all over the country that have paid returns of 20%...51%...even 133%
- We found government-backed bonds that paid more than 60%

In fact, only two recommendations in our portfolio have dropped in value. One is a company called Cresud (down 9% right now). It's a small firm that owns tons of real estate in Argentina. In fact, I was just there last month visiting the company and touring the country, and I'm more excited than ever about the stock and its potential.

This company allows you to buy real estate in Argentina at about a 40% discount. A year from now this could very well be one of the most profitable stocks in any market.

The other recommendation in our portfolio that's dropped is a company called BHP Billiton, which is down 1%. BHP is the world's largest resources company. They make steel, petroleum, and various metals. I expect this stock to do extremely well too as commodity prices rise.

If you decide to try my True Wealth research service, here's something else we'll send you...

### **How to make 2,750% when commodity prices take off**

The commodity investment I showed you earlier is a safe way to play the booming trend in raw materials. You can use it with a nice chunk of your portfolio (I recommend about 8%) to easily beat stocks this year.

*What I want to tell you about now is much more speculative...*

**It's a way for you to make 10 or 20 times your initial investment as commodity prices move higher throughout the year.** You can make this investment through your regular broker too, beginning with only \$20.

Over the past three years, this investment has gained 688% – yet it still costs less than \$10. Let me explain...

I'm talking about a way to invest in a company that has made potentially the largest copper and gold discovery (it's literally the size of California) in the past 50 years.

As commodity prices move up, this company's share price will skyrocket. Already, this company has shot up...

- 41% in one week in December of 2000
- 28% in one week in October of 2001
- 31% in one week in October of 2003
- 88% during a single two-month period

The guy behind this company has a knack for turning speculative ideas into giant fortunes. He's done it

### Where to Put Your Money Now

Here are more specific details on some of the investments we've recommended recently...

• **169% on the strongest business in America.** I believe most stocks are too volatile and expensive right now. But there are three companies in the exact same industry that are growing profits at an amazing rate. One of these companies has already returned 51% profits. Another has already returned 62% profits. And a third has already returned 169% profits. Still, these three companies are among the cheapest in the entire stock market, and are still strong buys. You'll get the full details as soon as you subscribe to *True Wealth*.

• **133% on America's malls.** We recently found a business called Simon Property Group

twice already in recent years...

**1)** In September of 1993, he discovered a massive nickel deposit that earned investors a 3,876% gain by May of 1996. A \$5,000 investment would have turned into \$198,800.

**2)** Then in 1996 he made another discovery that helped investors turn an initial investment of \$6,000 into \$250,000. That's a 4,067% return.

Today, this fellow is at it again.

"I'm not in the business of giving investment advice," he told Bloomberg News recently. "On the other hand, this is one of the major copper and gold discoveries in the world."

(NYSE symbol: SPG) that has paid 133% gains to own mall space and collect rents. This is not an ordinary stock. 90% of the money the company makes must be paid back to investors just like you and me. We've found a few other companies with similar operations that are paying us nice returns too, including the biggest office building owner in the country. These investments are easy to own. You'll learn how as soon as you subscribe.

• **63% gains on "boring" government bonds.** We recently saw an unbelievable opportunity to make great money in a super-safe, "boring" government bond. I met with local bankers and government officials, then explained to readers how to capitalize on this amazing opportunity... without ever leaving home. So far, we're up 63% in an investment that's about as safe as you can get.

• **Get paid to own gold... and much more.** We also found a way to get paid to own gold. It's up 77% so far. And we found a way to profit on America's best companies - without touching their stocks - up 50% so far. We've found several places to stash lots of super-safe money. These positions have given us solid returns too, of 65%... 62%... and 51%... just to name a few.

Right now, our *True Wealth* portfolio has 25 positions. Only two of these investments have lost money (one is down 9%...the other is down 1%). The other 23 are showing great profits.

No comprehensive engineering studies have been completed yet... but early results show that the recent find is massive. The engineering firm

My goal is to make you money in all market environments. And that's exactly what we've done for the past four years. There are a lot of great opportunities out there right now. I hope you take advantage of these situations along with us in the coming months.

AMEC, who did the initial studies, reports that this area potentially holds 21 million ounces of gold and 38 billion pounds of copper – a deposit that would be worth more than \$65 BILLION in today's market.

And with a potential output of \$1 billion per year, this find could single-handedly double the gross national product of the country where it's located.

But what's most important for investors – besides the nature of a large find such as this – is its geographic location. This massive gold and copper field is only about 50 miles from the world's largest consumer of copper.

**"Last July I Was at \$275K...and Going Down..."**

"In April 2000 I turned my \$400k IRA over to a very well known guy in Boca Raton, FL and sailed off into the sunset (I'm a merchant seaman). Last July I was at \$275k and still going down. I started buying Steve's recommendations.

A couple times I bought something else and got burnt. Now I buy nothing unless Steve recommends it and I went from 275k in July 2002 to 330k today-- and that takes into account the couple of bad ones I bought listening to someone else. What more can I say, Steve's good at what he does, my IRA is going back up, and all for only 99 bucks."

— Jerry Dillinger

Already, some of the biggest professionally managed funds (like Scudder and Tocqueville fund families) have made this investment one of their largest holdings.

And the man behind this company is pitching in about \$5 million a month of his own money.

Is this investment right for you? Only you can decide. One thing is for sure: It is loaded with risk.

But if you take a trial subscription to my investment research, we'll show you a unique way to make this investment. It's much safer than buying the stock outright. (We'll show you how to do that too, if you're interested.)

Everything you need to know is included in our new research report called **The Gold and Copper Find of the Decade.**

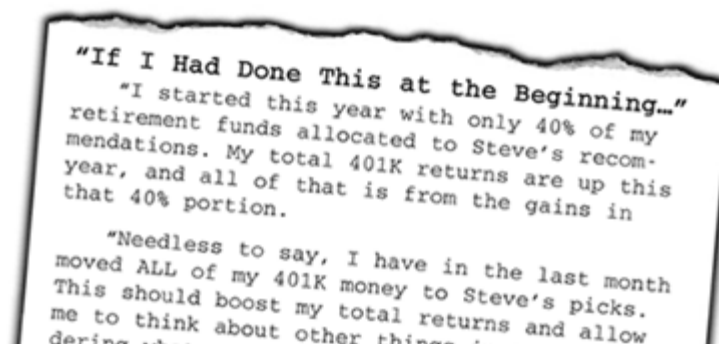

**You'll get this report free with your trial subscription to my True Wealth Advisory Service.**

What would you expect to pay for research that consistently makes subscribers solid profits – and that could make 10-times what you can expect to get from traditional stocks with less risk... and up to 2,750% or more with the **Gold and Copper Find of the Decade?**

If you subscribe with this introductory offer, you'll save considerably on our regular rates.

Normally, one year of my research costs \$199. I think that's a very fair price considering 1) the time and effort I put into this work and 2) the fact that you receive more than a dozen super-safe and very profitable investment recommendations.

Right now,  
however, you can  
get a full year of  
my research for  
only \$99 – **that's  
half off the  
regular price.**  
One year of my

work includes:

**1)** 12 issues of my **True Wealth** investment advisory newsletter. On the third Friday of every month, you'll get my full report on the best ways to make money without taking big risks. You'll get this research by e-mail and regular mail.

**2)** Investment Report #1: **The World's Best Commodities Investment – How to Beat Traditional Stocks by 10 Times or More.** This report explains the full details on how to easily and safely invest in commodities, using a new investment vehicle created by one of my favorite money managers. You can make this investment with just one call to your regular broker. You can get started with less than \$20...and I predict this investment will beat regular stocks by 10 times or more by the end of 2004.

**3)** Investment Report #2: **The Gold and Copper Find of the Decade.** Complete details on a much more speculative way to invest in commodities, again through your regular broker. This report explains the next investment opportunity from the man who recently helped investors gain 3,876%.

**4)** Plus, you'll get my e-mail updates every Tuesday afternoon, and updates from our other research staffers several times per week at no extra charge.

## How to make money this year while others are losing

I'm not going to try to tell you I know exactly what's going to happen in the markets in the next six months. The truth is, no one knows.

But I DO KNOW  
that regular U.S.

stocks right now are risky and extremely expensive. Here's what I mean...

If you add up all the earnings and subtract all of the losses of the 100 biggest companies on the NASDAQ stock exchange, you get a total of ZERO! In other words, these companies aren't making a penny in profits.

And here's another indicator of just how risky traditional stocks are right now...

*The Wall Street Journal* reported just last week that "Corporate executives sold \$4.9 billion of their own companies' stocks in February, the highest level of monthly insider selling since May 2001."

In other words, the people who run U.S. companies are selling stocks at record levels. Think about that. *These are the only folks who really know what's happening with their particular businesses.* If they don't want to own their own stock, neither do I.

The last time insider selling was this high, the market crashed 12% for the year (as measured by the S&P 500 Index)... and 24% the following year.

The point is, if you've got lots of money in traditional stocks, you are taking big risks – with little chance for decent gains.

**"Dr. Steve's  
recommendations rebuilt my  
401K."**

**– Jim Sturgill, San Diego, CA**

Over the past 3 years, our *True Wealth* advisory has helped thousands of people not only avoid losing money, but actually make very good profits, even during the worst bear markets. Here's what a few of these folks have told us recently...

The way I look at it, you have two choices for the coming year.

**1)** You can stand by and do nothing, and possibly see your savings, U.S. stocks, and other U.S. dollar investments become worth less than they are right now

**2)** Or you can make a simple investment in commodities, and make some of the easiest money you've ever made in your investing career. It's easier and safer to do than it's ever been in the past 100 years.

Imagine how smart you're going to feel a year from now when you look at your portfolio and see incredible gains, while all your friends and neighbors are at the mercy of the volatile stock market.

### **"More Money Than All the Others..."**

"True Wealth has made me more money than all the other newsletters I have subscribed to. I have also recommended it to one of my colleagues, who really likes it. A very loyal long-term subscriber..."

- Dr. Roger Simms, Milwaukee, WI

### **"I Just Want It Noted:"**

"I just want it noted, that I participate in upwards of 10 financial newsletters, for over 10 years and counting. Steve rates at the TOP. Steve is bright, humble, timely, incisive, and I rip the pages open when his newsletter pops up on my email, as I can't wait to see what advice he sends monthly.

Steve is one of the best, and anyone not using him, is following the wrong advice."

- Gregory Weber, Boston, MA

### **"How Come it Took So Long?..."**

"I'm afraid, I'm getting "hooked" on Steve's reports and can't wait for the next one. How come it took me so long to discover True Wealth?"

- Dr. Gary Smaldore, MD, Richmond,

Higher heating bills won't bother you. Neither will increases at the gas pumps. Because when the prices of these commodities goes up, so will your bank account, in a big way.

Of course, you don't have to take my word on any of this. See for yourself over the next 6 months. If you're not happy for any reason with my work, you can get a full refund. No questions asked. Nothing to return.

VA

**"My Favorite..."**

"Mr. Sjuggerud's recommendations make up most of my portfolio. In short, Mr. Sjuggerud is my favorite of about 9 or 10 investment advisors I read."

- Michael Patrick Lipman,  
Flagstaff, AZ

Order right away by clicking the "subscribe now" button below.

Sincerely,

Dr. Steve Sjuggerud, PhD

P.S. I almost forgot to tell you about one more important resource we'll send you when you try True Wealth. It's the ONE thing I insist every investor read before taking any of my recommendations. In short, it's a report detailing **an investment technique I know will help you make more money with every investment** (stocks, bonds, real estate, etc.). Never again will you wonder when to buy or sell—or how much to own. Not 1 in 1,000 investors knows this technique – yet I know

it will help you make more money with every investment you make. Order today and receive your free copy. Click the "subscribe now" button for complete details.
