

The Supper Club

Dear Friend,

I'm writing to you today to tell you about a most unusual club for a most unusual investor. In the next few pages of this letter, I'll give you all the details. But there are three important things you need to know about this club right away:

- (1) Membership is by invitation only;**
- (2) The investment opportunities you'll be privy to could literally make you a millionaire;**
- (3) Membership is reserved for a special kind of investor.**

Now as I said, in just a few minutes, I'll give you all the details. But first I should introduce myself. My name is Karim Rahemtulla. Perhaps you recognize my name. I'm the editor of the IPS Strategy and Global Equities Strategist for the Oxford Club, one of the country's premier wealth protection associations.

Prior to that, I served as editor of Taipan, a financial advisory that specializes in new, emerging companies. And also as editor of Home, Inc., a unique publication that provided readers with home-based business ideas and moneymaking marketing solutions for their businesses.

But I'm also an accredited investor. I like to invest in deals, public and private. I like to evaluate deals and companies. It's what I've

been doing for the past 20 years. In fact, you could say it's in my blood. You see, I was born into a family of businessmen and merchants. And from an early age I was taught the basics of making money. That knowledge has always stayed with me. And it's helped me enjoy a very comfortable lifestyle. I live where I want, work when I want to and spend most of my time traveling around the world.

The fact is, investing in businesses can be a great way to make a lot of money.

Multiply Your Wealth Many Times Over

Now I serve as Executive Director for **The Supper Club**. Now that name may seem a little odd, but I can assure you the investment opportunities you'll see and hear about as a Member are very exciting, not to mention full of potential to multiply your wealth many times over. That's because the moneymaking opportunities you'll learn about are not your run-of-the-mill investments. They are much greater than that. Here's what I mean.

You probably recognize the name Bill Bonner. He's the president of Agora, Inc., which publishes more than 40 newsletters, fax services and e-mail advisories. In fact, Bill writes his own daily e-mail called, the Daily Reckoning. He's also a founding Member of The Supper Club. But here's something you probably don't know. Bill is not only a publisher but a very serious investor. And what he enjoys investing in most are very unusual, but very lucrative business deals and real estate ventures.

For example, about one year ago, Bill and some of his associates

formed an Internet advisory company. It cost them roughly \$50,000 to get started. And so far, the company has already pulled in over \$1.2 million. In fact, each month the sales numbers look better and better. In one month alone, the company brought in over \$350,000.

Then there was the small specialty book company Bill bought five years ago for \$1 million and sold for \$6 million. Or the land deal in Nicaragua where Bill, along with other investors, bought a very valuable stretch of beachfront property. Each investor put in \$50,000 for a total down payment of \$800,000. The best part is, sales have already exceeded \$3 million.

Now I could go on and on telling you about our personal successes. The point is, it's these kind of investments that can turn a few thousands dollars into a few millions dollars. But here's the best part. As a Member of **The Supper Club**, you'll have the opportunity to get in on the ground floor of business ventures and opportunities that could quite possibly make you a very wealthy person.

What If You Had A Chance To See and Profit From These Deals

Imagine if you had the chance to participate in the kinds of deals I just described. Take the real estate deal. You could have made a clean 50% return in less than a year (and there's more to come). Or the Internet advisory service that has grossed over \$1.2 million dollars in less than 12 months.

What's more, as an investor, you'd have a tidy income stream from several very good businesses. And you'd own assets worth far

more than you paid for them. And perhaps most importantly, you'd have equity ownership in a number of very good businesses. Equity you got early on, while the price was still cheap. Equity that you can sell at any time to the highest bidder. Now imagine hearing about new business ventures on a regular basis. Suddenly your earning potential multiplies.

Private Meetings...By Invitation Only

Bringing you a wide range of investment opportunities is by far one of the greatest benefits of Membership in **The Supper Club**. In fact, you get the chance to invest in at least 16 different business ventures a year.

You see, we gather together four to six times throughout the year, in different locations across the U.S., to hear first-hand the details of at least three to four moneymaking opportunities. The meetings are private, for Supper Club Members only. The investment opportunities you'll hear about have not been disclosed to the public yet.

Ground Floor Opportunities

In fact, these are deals that you would not normally have access to. But it's because of the reputation of **The Supper Club** and its long list of contacts and industry professionals, that you'll have the opportunity to get involved with these deals. Deals like:

- GetIntegrated, a professional employment organization that provides outsourced human resource needs to small and medium sized-businesses. The company was started in 1998

with just \$200,000 in initial funding and is already profitable. What's more, GetIntegrated's future is very promising, serving a \$37.7 billion market. Some Members of the Supper Club were so impressed with the company's moneymaking potential, business strategy and marketing plans, they got in for a total of \$650,000. Now all they need to do is wait for their investment to pay off.

- APD is tapping into the \$50 billion power and energy market with the invention of it's patented technologies in rechargeable batteries and fuel cells to provide reliable standby power for computers, laptops, palmtops, cell phones, and pagers. The company's well-formulated business strategy shows revenues to exceed the \$511 million mark in just under five years. They've got a well-seasoned and experienced team of professionals with a proven track record of successfully bringing products to market. Supper Club Members were excited with APD's product line and have already invested over \$1 million into the company.
- Costa Maya Real Estate Venture, offers investors a chance to get involved with the development of a beautiful stretch of beachfront property along Mexico's Caribbean coast. The Mexican government has targeted Costa Maya for development and has already started working on basic infrastructures including roads, electricity, and a major docking pier. Property and real estate prices along the coastal area including Cancun, Tulum, and Playa De Carmen have appreciated more than 300% in the past ten years. This rapid growth and increase in real estate prices should continue south to Costa Maya, making it an excellent investment. Once again, some Members of the Club were so thrilled with the

future potential of this real estate deal, they offered up \$150,000 in investment funds.

Only The Best Deals Will Do

Here's something else you should know about **The Supper Club** . The investment opportunities you'll learn about have been pre-screened by myself and our Supper Club Advisory Board, who look to see if the deals have potential.

You see, we don't waste our time learning about deals that are just pie-in-the sky ideas. We're looking for you to make money off of these investments. That means if a business doesn't have a descent shot at making money or doesn't have a well thought out and actionable business plan, then it gets tossed out the door.

For example, one company that we were looking at, an Internet-based business, was operating on a business model that had practically no chance of success. Problem was, they had too much competition. And it would be hard for them to maintain their pricing structure, which was their only competitive advantage.

Basically the company provides programming, Internet, telephony, and off-site utility metering services to residential developers. They sign developers up to exclusive contracts at prices that seem cheaper today. But the reality is, their prices will be quite expensive in the future as the prices for the services they provide actually fall every year.

Our advisory panel immediately recognized the flaw in their business plan and sent them packing. Then there was a manufacturing company that made building products and supplies

from recycled solid waste. A clever product idea and strong management team. But when we dug a little deeper, we learned the company wanted to sell shares at \$5 each to investors because a stock promoter advised them the shares would trade between \$15 and \$30 on the first day, on 75 million shares outstanding with no revenue.

Needless to say, this certainly isn't a deal we'd want Members to be involved with, so we suggested they find some other group of people to sell the idea to. But on the other hand, if a deal looks like it could be a moneymaker, then we invite the founders to come in and give us the full details on it at our meetings. It's this, on the spot, first-hand exchange of information that is often the critical difference you need to determine whether or not you've got a winner on your hands.

A Network of People...Helping You Profit

But there's another equally compelling and important benefit of these meetings: the expertise, experience, and investment know-how each Member brings to the table. Here's what I mean. You've probably invested in deals before, or made some money in the stock market. Or perhaps you've ran or owned a business yourself. Point is, you know a thing or two about making money. And what you've learned over the years could help another Member make the right investment decision.

And in turn, what other Members have learned could help you. Sharing our knowledge and expertise with one another has become one of the driving forces of **The Supper Club**. In fact, we think it's one of our secret weapons for narrowing down which deals make

the most sense.

It works like this. When investment opportunities are presented, Supper Club Members talk through the particulars of the deal with each other, figuring out which ones have the most potential. And we ask presenters important questions such as:

- How long will it take to turn a profit?
- Does the presenters' business model make sense?
- What is the exit strategy for investors?
- What are the barriers to competition?
- How are they going to get (and keep) customers?

If the particulars of the deal check out, then Members decide whether they want to invest or not. Don't get me wrong. I'm not saying the group invests as a whole. We are not an investment club, where we pool our money and hope for the best.

Members invest as individuals. If you like the deal, you join in. How much is up to you. You can be in for a small percentage of a business, or you can buy up the lion's share. You only enter the deals that interest you most and for as much or as little as you want. But you get to use the collective knowledge and wisdom of the group, to help you make the best decision.

You see, all too often, when you're trying to make an investment decision - particularly when it comes to investing into a business venture, you make that decision by yourself. You don't have a "sounding board" so to speak to help you work through the issues involved. At best, you may ask your attorney, accountant, or tax advisor for some guidance.

But never do you get to use the experience and expertise of a room full of people who have the first hand insights into each deal. This works to your advantage in two ways:

- (1) It can help prevent you from losing money on a bad deal;
- (2) It can increase your chances of success because you'll have help deciding which deals are the most profitable, and make the most sense for you to participate in.

But of course, you don't have to use the combined knowledge of the Members of **The Supper Club** to decide which deals are right for you. It's just that if you want input from others, you can certainly use **The Supper Club** to help you with your decision.

Only A Special Kind Of Investor Makes the Cut

Now, if you remember, I mentioned at the beginning of this letter, there were three things about **The Supper Club** you needed to know: (1) Membership is by invitation only; (2) the investment opportunities can make you very rich; and (3) Membership is reserved for a special kind of investor.

I've already told you about the types of investments you'll see and hear about as a Member of **The Supper Club** . Now let me tell you about the special kind of investor we are looking for to join our group. First and foremost, we're looking for a serious, sophisticated person who wants to make a lot of money. If you're timid or shy about investing in business ventures that could dramatically increase your wealth, then this isn't the kind of Club you should join.

Second, you must be willing to entertain the idea of making money by diversifying your investments. In other words, if you think the only way to make money is to invest in the stock market, then **The Supper Club** isn't for you.

Third, you should have access to large amounts of capital. In fact, you need to be an accredited investor. But I should point out two things about this requirement: (1) Not all the deals you'll hear about are for accredited investors only, but a large percent are. (2) Being an accredited investor is a legal requirement of the SEC. Most investors don't realize this, but this requirement is actually for your protection.

You see, the SEC realizes getting in on the ground floor of business ventures is by far, the fastest way to build a substantial amount of wealth. But the deals carry risk...risk that the average investor may not understand or doesn't have enough cash on hand to recoup any losses they may incur. Now that you understand the kind of investor we are looking for, and if what I've told you about **The Supper Club** sounds like something you'd love to be involved with, then please consider this your official invitation to join our group.

Remember there's no other way to "get in," than to be invited. And our Membership is limited to those investors who meet the criteria I mentioned above. Please note: an opportunity like this doesn't come around very often. In fact, you may not hear from us again this year. But I will tell you this. Most people who are invited to join do so without hesitation. You see, they realize that just one investment they learn about through **The Supper Club**, could return thousands... even millions of dollars.

Best of all, because of the kinds of deals you'll see as a Supper

Club Member, you could see your earnings potential climb very quickly. Sometimes one deal is all it takes.

You'll Be Part of A Special Group of People

As I mentioned earlier, the kinds of deals you see and hear about in **The Supper Club** are the kinds of opportunities most investors could only dream about. What's more, you'll be part of a special group of people - the major players in business you hear so often about, but would probably never otherwise get to meet, let alone profit along side. They're the people with the midas touch who seem to get wealthier and wealthier with every deal.

And the reason that's so is because they're connected. They see the types of deals most people never get to see. Joining with us is a major step up for any investor used to buying stocks and bonds. And being able to participate in deals that can have an overwhelming impact on your wealth and future success is a tremendous advantage.

If you'd like the opportunity to participate in deals that could return many times their investment, then I'd urge you to join our group. And you can do so for far less than you might normally expect Membership of this high caliber to cost. In fact, Membership in **The Supper Club** costs \$5,000. And when you consider you'll have as many as 16 different investment opportunities through the year...opportunities that could make you a millionaire many times over, the cost of Membership is a mere drop in the bucket.

But I'm not going to ask you to pay \$5,000. In fact, with this special introductory offer, you can see for yourself what **The Supper Club**

is all about for a fraction of the full Membership price. You see, you're invited to attend our next meeting, which is being held on August 28th in Boston at the Ritz-Carlton Hotel for a one-time fee of just \$1,500.

The companies that we are looking at for presentation are very promising. But the best way for you to judge their moneymaking potential is to hear the details in person. That's why we're making you this special offer: Come, see and hear these deals for yourself for the one-time meeting fee of just \$1,500. **To order now, click the "Subscribe Now" button below!**

Then if you like what you see, as I'm sure you will, and want to join our group as an official Member of **The Supper Club**, we'll apply the \$1,500 as a credit to the regular Membership price of \$5,000. That means you pay \$3,500 to receive all of the benefits and privileges of Membership including:

- (1) Exclusive invitations to all Supper Club meetings where you'll hear 3-4 investment opportunities and, if you choose, invest in them.
- (2) Video presentation of each meeting express mailed to you if you can't attend a meeting. So no matter what, you'll have every opportunity to participate in any deal that is presented to Supper Club Members.
- (3) Monthly communiqué - e-mailed to you to keep you up to date on the latest deals we're evaluating.
- (4) Special Supper Club Network Dinner where you can network, mingle, make contacts and build relationships with fellow Members.
- (5) Members Only Exclusive Breakfast Meetings, which are held prior to the investment presentations. Here's where you

can talk through the deals to help you formulate your questions, concerns and comments.

- (6) Insight and input from fellow Members and a chance to give input as well. As a group helping one another, you'll make smarter decisions and more of them.

The Chance To Join A Wealthy Group of Investors

I'm sure when you join us in Chicago, you'll see **The Supper Club** is everything I said it would be and more. In fact, here's what a few Members have to say about **The Supper Club** ...

"The variety of companies you offer are fascinating...I definitely benefited from the discussions with the presenters..." - E. Ferguson

"The caliber of the deals was everything I expected. The presentations and the materials you provided were the best yet..." - J. Potts

"I very much enjoyed meeting the presenters up close...it's one of the better aspects..." - W. Diez

Time is of the essence. So if you'd like to join us in Boston on August 28th, I'll need to hear from you right away. All you have to do is fill in the Invitation Form below and return it to me with your check or charge for \$1,500 and we'll rush you out the Membership package containing the details of our August 28th meeting. I look forward to seeing you in Boston.

Yours truly,

Karim Rahemtulla

Executive Director, **The Supper Club**

P.S. The next meeting is fast approaching and I want to send you the executive summary and business plans on the deals being presented in Boston. But to do so, you need to send in your application along with your one-time payment of \$1,500 right away.

Click the "Subscribe Now" button below.

P.P.S. Since this is a special one time only offer, your \$1,500 is not refundable. But remember, if you like what you see, your \$1,500 will be applied to the regular membership price of \$5,000. You'll pay only \$3,500 to become a full-fledged Member of **The Supper Club**.

R.S.V.P. FOR THE NEXT MEETING
