

## **Hidden Investment Class # 4: Forbidden Profits from the Fall of the Dollar**

Most US investment advisers, publications and programs have a narrow focus on the US markets. That was fine during the bull market. But it's proved disastrous in the bear market, as investors lost 35% to 79% in the major US indexes in a few short years.

But it gets even worse...

The US dollar is now in the beginning stages of a major bear market. The trade deficit grows by more than \$1 billion a day, the federal deficit is due to reach \$500 billion in 2004, and the public debt is nearly \$7 trillion - not counting off-balance-sheet liabilities like Social Security! This means the US Greenback is heading into a prolonged tailspin - just as happened in the mid '80s, when it lost nearly 50% of its value in less than three years.

Yet, if you're prepared, you can turn this potential disaster into 3-digit, even 4-digit profits - just as *Sovereign Society* members were able to do on two separate occasions.

In 2001, we began to warn members that the dollar's hey days were coming to an end. We recommended that members purchase 62-cent Swiss franc call options.

**Less than two years later, readers saw their options soar 797%!**

Then we did it again...

In May 2002, we reiterated our bearish view of the dollar and said the euro stood to gain the most against the greenback in the coming year. We

recommended 90-cent euro-calls.

**The result was 1,794% gains in the next ten months!**

Don't expect to get these kinds of opportunities from your financial adviser or the media. Most tend to think that - unless you're a multi-millionaire - you don't qualify or you're not quite 'smart enough' to understand options.

Yet, buying them can be as easy as placing a stock trade. And as far as risk is concerned, with both these trades, you could have risked less than \$1,000 and made between eight and eighteen times your money.

### **A Chance to Learn About - and Profit from - The World's Best Kept Investment and Financial Secrets**

Regulators and Wall Street special interests have made it difficult for you to find out about many of these top-performing investments and hugely profitable financial strategies. But there's no reason you have to miss out any longer.

#### **Break through Wall Street's Wall of Silence And Discover the Best-Performing Investments in the World**

Much of the big money being made in the markets today is being made far away from the traditional avenues of investment.

They hide the world's best performing offshore funds from you by restrictions on advertising. But, as I've shown you, you can legally

find out about and invest in them with information from ***The Sovereign Society***, including funds that have bulled ahead 56% in the last three months and 668% in the last five years.

They tell you that you don't qualify for some of the most profitable alternative investment classes in the world, including CTAs that have multiplied more than 400-fold in the last 28 years. But select ***Sovereign Society*** members have found out how to get around this restriction with a top-performing CTA that requires just a \$5,000 investment and a net worth of no more than \$65,000.

They completely missed the boat on some of the strongest trends in the US and abroad. Yet ***Sovereign Society*** members have learned of - and invested in - the biggest new financial trend in the world today. This overlooked Chicago-based company has given select members profits of 61% in the last five months, with the potential to make the kind of returns early investors in Fannie Mae did, when that company soared 135,600%!

They restrict your choices to the same old US stocks and bonds - even when they're overvalued and plummeting in a bear market. Yet ***Sovereign Society*** members have been able to risk less than \$1,000 on select currency options that then rocketed 797% and 1,794%.

But you no longer have to be kept in the dark about these and other, exclusive, top-performing investments. You can read about these and other elite investments in the just-published special report *The Black Book of Forbidden Investments: Secret Securities That Crush Stocks in Bull and Bear Markets*. The report is yours free with a risk-free, trial membership in ***The Sovereign Society***. Supplies are limited,

however. So please go to the subscribe button below to claim your copy right away!

### **Don't Believe Wall St. for a Moment When They Say They're Looking Out for Your 'Best Interests'**

The scandals at Worldcom, Tyco, Enron, and Adelphia were just the tip of the iceberg. The widespread deception of investors at Morgan Stanley, Salomon Smith Barney, and Merrill Lynch were not isolated incidents. Now, it has been revealed that certain US mutual funds have been slipping shares at favored prices to favored investors - at the expense of all other investors.

Yet regulators still want you to the same overvalued stocks and funds only. Backed by the securities industry, they make it very hard for you to find out about the very top-performing investments in the world - including funds that have returned 668% in the last five years, stocks up 131% in the last 13 months, and special investments bringing home profits of 787% to 1,794% in the bear market.

Some of these are in the US - just not readily available to average investors. Others are in jurisdictions like the UK, Hong Kong, Switzerland, with far stricter corporate governance and regulation standards than the scandal-plagued US securities industry.

And in the US, who is regulating the regulators anyway? Richard Grasso until recently was the chairman of the NYSE. His pay package totaled over \$200 million. Nothing wrong with that in itself - except that he was getting paid all that money by many of the companies he was supposed to be watching!

On Wall St., the foxes are guarding the henhouse and they've been making a meal of trusting investors. If you're tired of the deception and bear market losses, let the ***Sovereign Society*** show you the best-performing, safest and most closely guarded investment secrets and financial strategies in the world.

Unbiased global investment recommendations plus asset-protection, tax-reduction and financial privacy techniques that can help you quickly rebuild the damage done to your portfolio by the bear market. Please go to the subscribe button below where you can receive a risk-free trial membership today and receive three FREE investment, asset-protection and financial-privacy reports in the process.
