

Urgent Terror Alert

1,300-Year-Old Gold DAGGER PLUNGES DEEP Into America's Financial HEART!

Osama bin Laden has promised 10,000 grams of gold for the killing of Paul Bremer or the military commander of the U.S. Armed Forces in Iraq. And another 1,000 grams for the death of a U.S. or British citizen. But that is only the beginning...

In the midst of this CRISIS, a handful of savvy investors are quietly taking positions in an incredible *NEW SECRET CURRENCY* that is likely to SKYROCKET 332%... 668%... or MORE as the U.S. dollar continues to fall...

Dear Friend,

Bin Laden's promise to pay his evil assassins in gold is only one part of a sinister plan already underway. Intelligence data, extracted through aggressive interrogation of al Qaeda operatives at Guantamano Bay Military Base, confirms a massive economic terror attack by radical Islam is under way.

And while the cold-blooded atrocities of Sept. 11 were horrific, al Qaeda's new plot could send the U.S. economy into an absolute death spiral!

There isn't much time. Let me explain...

Islam was founded around A.D. 700. And from the very beginning, Muslims used a gold coin called a Gold Dinar as their form of money. The Gold Dinar remained the official Islamic currency until the collapse of the Ottoman Empire in 1924... when it disappeared for 77 years.

But on Nov. 7, 2001 -- less than two months after the TERROR STRIKES of Sept. 11 -- the Islamic Dinar was officially relaunched by the Islamic Mint in West Malaysia and is now available to the public.

Although a beautiful coin, the Gold Dinar posses a DEADLY threat to the U.S. economy! In fact, its supporters believe the Gold Dinar will become the official currency of more than 1.5 BILLION Muslims worldwide. And radical Islam is urging Muslims worldwide to drop the U.S. dollar and adopt the Gold Dinar as their primary currency!

Gold Dinar, Syria ~ A.D. 730

Why? They are determined for the Gold Dinar to bring about the DEMISE of the U.S. dollar!

Almost nobody has caught on to this yet. **But the attack is very real!**

In fact, since the reissue of the Gold Dinar in November 2001, **the U.S. Dollar has dropped to a RECORD LOW against the euro... while the price of gold has SOARED from about \$280 per ounce to an eight-year RECORD HIGH of over \$425 per ounce!**

And this is just the beginning!

As the dollar continues to drop, the already shaky stock market is nearly certain to crash. Unprepared investors could lose BILLIONS!

But there is something YOU can do to save yourself... **because the radicals' plot has a FLAW in it!**

A shimmering flaw that could make you very rich... very soon!

You see, a **NEW Secret Currency** has just emerged on the market. A Secret Currency so brand-new that even Wall Street doesn't know about it yet!

And get this: The Secret Currency is NOT at the mercy of the falling U.S. dollar! In fact, as the U.S. dollar FALLS LOWER... the Secret Currency **SOARS HIGHER!**

And in the coming months, as the dollar continues to fall, the Secret Currency is likely to SKYROCKET 332%... 668%... or more!

Now, with your permission, I'd like to send you a **Free Special Report**. It's called:

"The Secret Currency: How to Beat Bin Laden to the Punch -- AND Capture Gains of up to 668% or More as the U.S. Dollar Falls!"

The report will show you exactly how you can join a handful of investors already taking positions in the NEW Secret Currency that is poised to SKYROCKET 332%... 668%... or more as this vicious plan unfolds.

Let me tell you more!

Terror, Inc.

It's no coincidence that Osama bin Laden chose to strike the World Trade Center on Sept. 11...

Why?

Because, the World Trade Center represents the heart and soul of the U.S. economy. And destroying the U.S. economy is the main pillar of bin Laden's strategy to bring down the United States.

Look: **Bin Laden runs al Qaeda like a Fortune 500 corporation.** And he is VERY aware of the U.S. financial situation. He understands our vulnerabilities and how to exploit our current economic situation.

Just take a look at this statement from bin Laden himself, posted on the Al Jazeera Arab News Web site on Oct. 19, 2003:

Sunday 19 October 2003, 3:15 Makka Time, 0:15 GMT

"My congratulations to you on your blessed efforts and jihad.

"You have indeed slaughtered the enemy and have pleased the hearts of all Muslims, particularly the Palestinian people. You will be rewarded by God the Almighty. Thank you for your jihad and may God help you.

"...[America has] a budget deficit for the third consecutive year. This year, the deficit reached a record peak of more than US\$4.5 billion.

"Praise be to Allah."

As despicable as he is, bin Laden is very financially sophisticated. He knows that the United States is struggling with a huge trade deficit -- AND a huge budget deficit. And he realizes the U.S. dollar is weak and getting weaker all the time. That's why attacking the U.S. dollar -- and sending the U.S. financial markets into a violent

plunge -- is at the center of his plan!

And bin Laden isn't alone in his scheme to crush the U.S. economy! In fact, he's trained thousands of militant jihad warriors to carry out his evil plot... even if he is captured tomorrow!

Economic Jihad Is Gaining Momentum!

According to the International Policy Institute for Counter-Terrorism in Herzlia, Israel, Abdel Aziz Rantisi, the assassinated leader of the terrorist group Hamas, had recently published a written statement on the Hamas Web site calling on Muslims all over the world to wage economic jihad against the United States. In his statement, Rantisi said that hatred of all Americans is a religious duty for all Muslims, and that targeting the U.S. economy will destroy the United States.

Make no mistake: Radical Islam wants to destroy the U.S. economy with every single ounce of hate in their bodies.

And now, the Gold Dinar gives them a powerful way to send the U.S. dollar -- the ultimate symbol of American wealth and economic prowess -- crashing!

Can radical Islam convince Muslims to use the Gold Dinar instead of the U.S. dollar?

You better believe it!

Look: If bin Laden can convince desperate people to strap on DYNAMITE and blow themselves to bits in the name of Allah, you can be ABSOLUTELY certain radical Islam can convince

people to trade in U.S. paper dollars for real gold!

Why? It's pretty simple...

The Muslim World Is ANGRY at the United States -- And It's Not Just the Terrorists!

Many Muslims believe that the United States is responsible for the enormous devastation suffered by hundreds of millions of Muslims during the Asian Currency Crisis of 1997. This ANGER will provide a powerful incentive for Muslims to get even with the United States by selling dollars and buying Islamic Gold Dinars.

Just take a look at this quote from the Islamic Mint Web site:

"... he heard the Messenger of Allah say: 'A time is certainly coming over mankind in which there will be nothing [left] which will be of use save a dinar...'"
-- Imam Ahmad ibn Hanbal

I think it's obvious. These folks don't just want the dollar to drop, they want the U.S. dollar to disappear . Permanently!

And just listen to what Malaysian Prime Minister Mahathir Mohammed had to say:

"If we want to avoid being short-changed we must have a currency that has intrinsic value... If we want to protect ourselves we must evolve our own payment system, our own trading currency."

Let me read between the lines for you:

Mohammed believes that the U.S. financial system is responsible for the Asian Currency Crisis of 1997. And he is urging Muslims to drop the dollar and use the Gold Dinar.

Radical Best-Seller List

There is a book by a radical Muslim, Umar Ibrahim Vadillo, called *The Return of the Gold Dinar*.

According to *Wired* magazine, author Vadillo explains via e-mail.

"You want to be radical? You don't need to blow up the bank, just burn your bank account. And for that you are going to need an alternative. What is the alternative? Dinar."

What is Vadillo saying? I think it's very clear. He's telling his readers that if they want to hurt America, they don't need to blow up a bank or carry out a suicide attack. They simply need to drop the U.S. dollar... in favor of the Gold Dinar.

The 92-page paperback is practically flying off the bookshelves in the Muslim world, and it's also getting worldwide exposure via the Internet.

Momentum is growing behind the push for the Gold Dinar. And there's something else driving the Dinar. Something very powerful indeed.

The Koran Says: "Buy Gold!"

One of the main pillars of the Islamic faith is the observance of Zakat, which dictates that Muslims must give at least 2.5% of their income to the poor. And get this: Zakat can only be paid with REAL MONEY! That means that Zakat cannot be paid with a PROMISE to pay, which is what a U.S. dollar is!

Let me repeat that: The U.S. dollar is NOT a tangible asset. Rather, it is a promise to pay -- an IOU -- backed by the full faith and credit of the U.S. government. But, as a promise to pay, it cannot fulfill one of the main pillars of the Islamic faith!

The Gold Dinar meets a religious need in Islam! The dollar does not! Religious leaders are now pushing Muslims to use the Gold Dinar. As you can imagine, religious pressure can be extremely persuasive. And this one single fact could drive Muslims to drop dollars and buy Gold Dinars.

1.5 Billion Muslims...Dumping Dollars for Gold

Let's consider the effects on gold -- and the broader financial markets -- as Muslims start to unload their U.S. dollar reserves to buy Gold Dinars. There are approximately 1.5 billion Muslims worldwide. AND there is a limited supply of gold in the world.

So, as the demand for gold increases, and as the available supply starts to dwindle... the price of gold will soar!

And we're already seeing this happen. Listen to this:

Gold hit about \$850 per ounce back in the 1980s. It then entered a

19-year bear market... and the price of gold dropped to about \$250 per ounce...

BUT: Since the launch of the Gold Dinar on Nov. 7, 2001, the price of gold has SOARED to an eight-year record high of over \$425 per ounce... while the U.S. dollar has dropped to a record low against the euro!

But this increase is just the beginning!

In fact, I believe we are at the very beginning of a bull market in gold... the likes of which the world has never seen. In the coming months, the already weak dollar will continue to drop, and gold will continue to rise. People who position themselves early will become wealthy... with little effort... and very limited risk.

Make no mistake: NOW is the time to BUY GOLD!

But what is the BEST WAY to profit from gold?

Should you buy Gold Dinars?

Well... you could. But there is a MUCH BETTER ... MUCH EASIER... and MUCH SAFER way to profit from gold!

And, in a minute... I'll tell you about the New Secret Currency that could generate 668% gains or more as gold takes off.

But first, let's look at a couple more reasons WHY AN EPIC GOLD SPIKE is imminent!

Forget About Bin Laden...The U.S.

Government Is Driving Gold Higher!

Even if bin Laden's strike on the U.S. economy fails, the price of gold is still headed through the roof. You see, the price of gold and the dollar generally move in opposite directions.

And, the U.S. government is now in a position where it **WANTS AND NEEDS** an even weaker dollar.

The United States is experiencing the worst trade deficit in history... and the largest budget deficit as well. A weaker dollar would allow the United States to compete internationally by providing cheaper goods, which would help reduce the trade deficit. And it would also help the economy, boost job creation, reduce deflationary pressures and ease the debt burden by cheapening the dollars owed.

These factors are all a political positive from a U.S. perspective, and with an election coming up this year, the dollar is going to continue to drop... while gold continues to rise.

And here's another reason gold prices are going to take off...

In 2002, the Shanghai Gold Exchange opened and started free trade in gold for the first time in China's history. And even more recently, China legalized gold investment by private citizens!

Considering the high savings rate in China, gold is a logical investment. And the demand for gold is soaring in China!

It's estimated that the equivalent of \$36 billion in Chinese private investment could move into gold in coming years. Plus, the Chinese

government is moving to increase its low 2% gold reserves. If these predictions come to pass, China alone will consume 40% of the world's entire gold production for years to come.

The Japanese are piling into gold as well... because their banks are being crushed under the weight of roughly half a TRILLION DOLLARS of bad debts!

All of this points to a rapidly increasing demand for gold... a demand that will send gold prices to historic highs... and turn a handful of early investors into overnight millionaires!

And Here's the Kicker...

As I said before, there's a limited supply of gold in the world. In fact, if you gathered up all the gold that has ever been discovered, you could fit it ALL into a very large room!

So, as the demand for gold rises -- and the available supply shrinks -- panic will strike as people scramble desperately to buy gold.

Just imagine the hysteria that will occur when Muslim countries start to demand gold as payment for oil! People worldwide would rush to move out of U.S. dollars... and into gold!

But unfortunately, there won't be any gold left!

The BBC Reports That al Qaeda Is Already Buying Gold!

Al Qaeda is already stocking up on gold. And why wouldn't they?

The more gold they have... the less available for the United States. And I can assure you: When Wall Street finds out what is going on... they will STORM the gold market... looking to buy every bit of gold they can find.

Please understand: An astronomical rise in gold is under way! Since the launch of the Gold Dinar in November 2001, gold prices have risen over 55%... and are hitting eight-year highs!

But it's only the beginning!

I believe we are at the very early stages of an epic gold bull market -- the sort of bull market that most investors have never seen. **It's been more than two decades since gold soared over 2,400%, from \$35 an ounce in 1971 to a peak of more than \$850 in the early 1980s.**

The coming year could put those gains to shame as gold demand escalates worldwide... And if you get in early... you could literally join the mega-wealthy practically overnight!

So... WHAT is the best way to buy gold?

WARNING: Not All Gold Is Equal!

I grew up around gold.

In fact, my father was the famous gold bug C.V. Myers. I was by his side in the 1970s when he told investors to buy gold at \$35 per ounce... and

Sourpuss or Stock Market Genius?

When Bill Bonner, author of the *NY*

then watched as gold jumped to over \$850 per ounce...

People who listened made millions!

But despite the incredible profits people made in the 1970s, I have NEVER seen a better opportunity to profit from gold than the one that exists... right now!

My name is John Myers, and I'm the editor of *Outstanding Investments*, an investment advisory bulletin specializing in natural resources. Things like oil... natural gas... water... and, of course, gold.

We cover the world, digging for profit opportunities that Wall Street has no clue about. In fact, when Wall Street finally does shows up, we're already there waiting for them to drive our profits into the stratosphere!

And that is exactly what is about to happen with an amazing new opportunity...

...which I call the Secret Currency.

Times # 1 Business Bestseller - Financial Reckoning Day, predicted the dot.com collapse, *Money* magazine called him a sourpuss, but *Worth* magazine says he's a genius. He said the 'New Era' was a fraud as early as the autumn of '99, when almost everyone thought it was for real. Six months later, the New Era was history.

We'd like to offer you **The Daily Reckoning**, an irreverent mix of contrarian commentary and as one reader points out '*...monetary sense in a world gone fiscally mad...*' Nothing else like it on the Internet... and it's free. Now, without giving away the secret, I can tell you the Secret Currency is, as you might suspect, a form of gold. But it's not your typical gold investment. It has nothing to do with Gold Dinars, gold coins, gold mining stocks, options, futures or gold bullion. In fact, it's much better!

And I can assure you: You've never heard of this... because it's brand new! And it offers a staggering profit potential like:

668% Gains in 11 Months!

I started calling for my readers to buy gold back in 2001... about the time the Islamic Mint started talking about issuing the Gold Dinar. I knew something big was on the horizon. And one of the first opportunities I spotted was a tiny gold and copper miner called Metallica Resources.

I recommended Metallica Resources in February 2001... 9 months before the launch of the Gold Dinar.

As I mentioned, the Islamic Mint issued the Gold Dinar on Nov. 7, 2001...

Just two months after the launch of the Gold Dinar, in January 2002, I told my readers to take profits on Metallica... and we locked in gains of 668%!

"I almost 'bailed out' awhile ago when gold and oil took a dip, but followed your advice and stayed with it. I'm up 28% with only your recommendations in my portfolio."

-- Bill B., Outstanding Investments Subscriber

That's 668% gains in 11 months!

Was the Gold Dinar responsible for these massive gains? It sure didn't hurt... but as I said before... there are many factors driving gold prices higher...

And the good news is, it's just the beginning of an epic bull market in gold!

Since January 2002, my *Outstanding Investment* readers have been able to pull in 95% average gains! And 79% of our closed positions have settled on the plus side!

Over the last few years, we've seen gains of:

- **332% on Glamis Gold!**
- **151% on Wheaton River Minerals!**
- **158% on Tocqueville Gold!**
- **118% on Cameco!**

The list goes on and on! Just take a look at some of our current portfolio holdings:

- **American Century Global, up 180%!**
- **Coeur d'Alene Mines, up 250%!**
- **Atacama Minerals, up 90%!**
- **Harmony Gold, up 115%!**
- **Newmont Mining, up 105%!**
- **Anglo American PLC, up 100%!**

As you can imagine, many of my *Outstanding Investment* readers are very happy. In fact, some of them are getting flat-out rich!

Now... I'd like very much to help you profit from gold, as well.

In fact, I'd like nothing better than to see you become an overnight millionaire in the coming gold bull market. It can happen! And it will... for a handful of people who are in the right place at the right time.

Will you be one of them? It's really up to you!

You see, I have isolated a NEW way to buy gold... an amazing opportunity called the Secret Currency. It's hands-down the best way to profit from gold I've ever seen! Let me tell you about it now.

The Secret Currency

As I mentioned before... I grew up around gold. I watched my father make investors staggering wealth in gold back in the 1970s... And I've already delivered my readers massive gains in gold of 668%... 332%... 158%... 245%... 110% and more over the last couple of years...

"It's difficult to be unhappy when all of the recommendations I hold from OI are up a minimum of 36%."

-- Jeff B., Outstanding Investments Subscriber

But forget about those gains. They are child's play compared to what the Secret Currency could generate!

Look: I believe the new Secret Currency is the most incredible, and profitable, gold investment ever! Here are three reasons why:

1. The Secret Currency is NOT physical gold. While physical gold is

stunning, it presents several problems. If you own physical gold, you have to worry about storing it, transporting it and insuring it. You also must worry about the quality of the physical gold you are buying. The Secret Currency offers an investment in pure gold without the problems of owning physical gold. You don't have to store it... transport it... or insure it!

2. The Secret Currency is NOT a gold mining stock. Now, don't get me wrong. I love gold mining stocks... but a gold mining stock is a stock first, and gold second. And I believe that current economic conditions -- along with the emerging Gold Dinar -- could drive the U.S. stock market into the tank, possibly taking gold mining stocks down as well. The Secret Currency is not a mining stock... and it is not subject to stock market fluctuations. When the price of gold goes up, the Secret Currency goes up. It's as simple as that!

3. The Secret Currency is LIQUID. You can buy and sell the Secret Currency easily. And this makes it a safe, practical place to store wealth. I think you'll find it better than any CD or savings account on the face of the Earth... with 10 times the profit potential!

Your Turn to Taste Massive Gains of 668%... or More!

Every few years, a bull market in natural resources makes a few investors rich while Wall Street and the media miss the opportunity. And Wall Street won't tell you about the NEW Secret Currency because they don't know about it

"[With Tocqueville Gold] I posted 140% gain -- great pick!... 'Only' 64% [with Northgate] -- another winner... Great job!"

yet. And by the time they find out and rush to buy in, it will be too late!

-- Charles B., Outstanding Investments Subscriber

Gold has risen by 55% since the launch of the Gold Dinar in 2001... and my readers have already seen 668%!

Imagine what will happen when the price of gold doubles... or triples... or more!

Imagine how much you could make! But you must get in early!

Right now, the demand for gold is being driven by several factors worldwide... And very soon, the price of gold could skyrocket to levels higher than those we saw in the 1970s... when **early investors made up to 2,400%!**

I can assure you: As the dollar continues to sink... and gold prices continue to rise... Wall Street will jump on gold in a frenzy. But unfortunately for them, it will be too late!

Guess what? YOU will already be there... waiting... and ready to ride the surging price of gold to staggering... STAGGERING... wealth!
