

Hit the Jackpot!

This 43-Year-Old Blackjack SECRET Could Triple Your Money at the Greatest CASINO on Earth...Wall Street!

"You can use these powerful gambling secrets to capture triple-digit stock market gains...starting with as little as \$500."

Dear Friend,

If you've ever set foot in a casino, you've probably heard of 'card counting'- the most potent and lucrative gambling strategy of all time.

But did you know these same secrets can work on Wall Street? It's true! With these professional techniques, you could quickly capture triple-digit stock market gains... starting with just \$500.

I'll explain more in a second. But first, let me explain what card-counting is...and how it could make you a fortune...in Vegas and on Wall Street.

You see, card counting removes all the emotion - and luck - from blackjack play...

...and provides the knowledgeable player with a decisive mathematical advantage over the dealer.

During the last 43 years, scores of ordinary people have used card counting to legally cheat blackjack dealers from Vegas to Atlantic City.

In fact, ABC News reported that a team of six MIT math students recently used a card counting system to beat Las Vegas for millions!

James Boric - Bringing Down the House!

James Boric didn't flinch when he lost every penny he ever gambled. But when he got his head handed to him by ruthless stockbrokers - that was the last straw. He committed himself to finding a way to bring Wall Street to its knees.

James spent years studying in the highly intensive curriculum at the Indiana University School of Business - where he immersed himself in the study of complex statistical analysis. During his studies, James discovered that by using a simple mathematical formula, everyday folks could consistently win big money, both at the blackjack table and in the stock market.

James went about building a scientific stock selection system - CXS - based on principles as profitable as the most potent gambling strategies of all time. Does CXS work? Well, in 2003 alone, CXS generated gains of 233%...221%...147%...146%...and MORE!

In fact, if you had invested a modest \$500 in each of the 2003 CXS stock picks, you'd now have over \$27,000!

But don't worry if you missed out on these gains, because CXS is getting ready to do it again. CXS has isolated an explosive penny stock that could TRIPLE YOUR MONEY in eight weeks or less! In an exclusive Special Report, My Single Favorite Penny Stock, James lets you in on what could be a once-in-a-lifetime opportunity.

He gives you the inside scoop on an \$8 stock that could easily skyrocket to \$24 or higher...very soon! The Special Report is yours...FREE. Read on to claim your copy. And please hurry - this is a limited offer.

Six MIT Math Students Take Vegas for Millions!

Now, these kids weren't even professional gamblers. In fact, they started out playing for fun a couple nights a week. But when they heard about card counting, they decided to use their math skills to beat the casinos.

They practiced their card counting system in backroom card games in Boston's Chinatown...and then hit the big time. Before long, they were making weekly trips to Las Vegas - sometimes carrying \$100,000 or more strapped to their legs.

For over a year, the MIT blackjack team lived a secret life as Vegas high rollers - once winning \$75,000 in 12 seconds on a single hand of blackjack!

Because of the 'action' they were giving the casinos, the team was treated like royalty. They got free tickets to the best shows and sold-out championship fights...free luxury penthouse suites...free meals in five-star restaurants...even their own butlers!

The MIT blackjack team ultimately took Vegas for OVER \$3 million

before being caught and permanently banned from the casinos.

\$3,000,000! Not bad. But for smart kids...

They Left a BIG PILE of Money on the Table!

You see, while card counting is effective at the blackjack tables - the very same scientific principles work almost MAGICALLY in the world of penny stocks.

And now YOU can use these POWERFUL GAMBLING SECRETS to capture triple-digit stock market gains...starting with as little as \$500!

In fact, the mathematics professor who invented card counting only played blackjack as a trial run. But he had his sights on the real action: Wall Street. And that's where he made millions! You could do the same. I'm going to show you how right now...

A Magical Three-Way Connection

My name is James Boric. I'm the editor of *Penny Stock Fortunes*, and creator of its CXS System, an explosive new stock-picking system based on the very same mathematic principles as card counting.

Now, I'm a bit embarrassed to tell you this, but I've always had a fascination with complex numbers. Things like geometry...statistics...algebra. I love all that stuff...

Even as a kid, I could work numbers in my head that teachers could barely figure out on a calculator. And as I got older, my interest in math only got stronger.

"Picking stocks is not supposed to be a roll of the dice, but it turns out that investors can learn a few tricks from card sharks."--*The Philidelphia Inquirer*

In fact, I worked my way through the Indiana University just so I could immerse myself in the advanced study of statistical analysis. I guess you could say I had my face buried in a book for quite a while. But it was time well spent...

You see, during my studies, I uncovered a remarkable three-way connection between blackjack, mathematics and the stock market.

In fact, I discovered that the very same mathematic principles used to win at blackjack could also be applied to the stock market - and especially PENNY STOCKS - with amazing results.

I knew I was on to something big. I dove in head first, and went about creating a scientific system that would give me an advantage in the stock market.

It took three years of tinkering - and testing. But what has emerged is CXS - a powerful scientific stock selection system that could...

TRIPLE YOUR MONEY in 8 Weeks or Less!

Like card counting, my CXS System eliminates the need for 'hunches' or 'luck,' and transforms stock picking into an exercise in pure science.

What kind of results does my CXS system produce? Take a look...

In 2003, my CXS System nailed 30 winning picks out of only 41 tries -

an astounding accuracy rate of 72.3%...with an average gain of over 34%!

My readers had the opportunity to take in individual stock gains of:

- **233% in 2 months on SIRIUS Satellite Radio (SIRI:NASDAQ)! It went from \$0.65 to \$2.17!**
- **146% in less than 2 months on China Yuchai (CYD:NYSE)! It went from \$7.50 to \$18.50!**
- **221% on Coeur d'Alene Mines (CDE:NYSE) in less than 6 months! It went from \$1.71 to \$5.49!**

The list goes on and on! And get this: If you had invested just \$500 in each of my 2003 CXS scientifically selected stocks, you'd now have over \$27,470!

If you had invested \$2,000 on each stock, you'd now have OVER \$109,000!

And if you had put down \$5,000 on each CXS scientifically selected stock - you'd now have OVER \$274,700!

But don't worry if you missed out on these gains - because 2004 is shaping up to be the best year yet for CXS. And while blackjack offers players the BEST ODDS in VEGAS...

...Penny stocks provide individual investors with the single-best opportunity to accumulate massive wealth in the stock market.

Just take a look at other penny stock gains:

- **572% on Transnational Financial Network in 3 days!...**

- 271 % on Smith Micro Software in 48 hours!...
- 151 % on Ableauctions.com in 5 days!...
- 1,092 % on DF China Technology!...
- 1,121 % on OXiGENE Inc.!

And you know what the best part is? With penny stocks...

It Doesn't Take Millions to Make Millions!

In fact, you can start with as little as \$500, and capture the same TRIPLE-DIGIT gains as the multibillion-dollar Wall Street gurus!

You see, my CXS System evens the playing field! It eliminates the need for luck...and uses a powerful scientific system to generate winning pick after winning pick.

"In a casino, the longer you play, the more you will lose. In the market, the longer you play, the more likely you are to win."

- The Motley Fool

CXS literally takes the advantage away from the 'house' - and puts it squarely in your hands. And that's important, because when it comes to dealing with Vegas, or Wall Street, the deck is stacked against ordinary folks like you and me.

Make no mistake: The casinos - and the brokerage houses - are looking for a sucker. And I know from painful firsthand experience that being a sucker is no fun.

You see, for years, I was the biggest sucker on the planet!

I LOST EVERY PENNY I ever gambled at the casinos. And worst of all, I got my head handed to me by crooked stockbrokers. I'd still be

suffering if I hadn't realized something I bet YOU already understand:

The House Is Your Worst Enemy!

Now, when I say 'the house' - I mean the guys who run things. You know who I'm talking about! The snooty bosses with all the connections. The smug Wall Street insiders who get all the hot stock deals. And, of course, the casinos.

They're all the same! And make no mistake: The house ALWAYS has the advantage!

The average guy is ripe for the picking - and to play Vegas or Wall Street straight up would be crazy. You gotta give yourself an edge! CXS will do just that! In fact...

CXS Puts the Odds in YOUR FAVOR!

Listen: There are over 9,000 stocks trading every single day. With all those companies to choose from...your odds of hitting the right stock at the right time are slim to none.

But my CXS System changes that...

You see, while card counting tells the savvy blackjack player which hands offer the best odds of success, my CXS System isolates the one or two stocks out of 9,000 that offer the best chance for BIG, FAST PROFITS!

Using a proprietary 10-step process, CXS scans the vast universe of over 9,000 stocks and whittles it down...step by step...until I have

ONLY the very best one or two stocks to choose from.

My system literally snatches the edge away from the house...and gives you the decisive scientific advantage you need to make QUICK and EASY PROFITS!

Right on the Money - 54% in 23 days!

That's exactly what happened with CIENA Corp. (CIEN:NASDAQ).

CIENA is in a telecommunications business. They make multiplexing systems that add capacity to long-distance fiber-optic lines. And like most of the telecommunications industry, CIENA's stock price took a *severe beating* when the telecom bubble burst. But CIENA was only one stock out of hundreds that were hurt during the telecom crash.

"James, I just read this report and I wanted to tell you I turned \$53,000 into \$129,000. Thank you."

- David Neal, PSF Subscriber

The big question was which companies would recover...and when? My CXS System provided the answer. CXS scanned over 9,000 stocks in a single day, and selected CIENA as the stock we needed to recommend.

Rather than randomly putting money down on beaten-down stocks...we isolated the one stock with the best odds of success.

You can probably guess what happened. CXS was right on the money! We got into CIENA at \$3.11 per share - and readers who bought this recommendation pulled in 54% gains in 23 days!

How did we do it?

Well, CXS is a proprietary system...and its 10 secret ingredients are reserved exclusively for Penny Stock Fortunes readers.

But, without giving away the entire CXS secret process, let me give you a quick peek at how my CXS System puts the odds in your favor...and the profits in your pocket!

First of all, CXS will only consider recommending/including established companies trading on major exchanges. We avoid fly-by-night stocks that could disappear in a heartbeat. This limits our risk...and allows us to avoid devastating losses that destroy some penny stock investors.

Second, we only select stocks with substantial trading volume...at least 100,000 shares per day. This allows you to get in and out of CXS stocks easily and safely. And lets you seize profits with lightning-quick precision.

Third, we only choose high-growth stocks priced under \$15 per share. Since our objective is to multiply your money quickly - finding low-price stocks is key. After all, it doesn't take much to send a \$2 stock soaring to \$6, \$8 or even \$10 per share...fast!

Consider Integrated BioPharma (INB:AMEX)...

This little-known company skyrocketed from 7 cents per share to \$9.60!

Folks who got in early turned \$500 into \$68,571...\$1,000 into \$137,142...and \$5,000 into \$685,714!

Those are the kind of stocks CXS aims to find. Unfortunately, not

many people hear about situations like this. With over 9,000 companies trading daily, the opportunities to get in on stocks like Integrated BioPharma are few and far between.

And make no mistake, Wall Street would rather keep stocks like this quiet...and keep the money for themselves. They'd rather keep the odds in their favor...

CXS changes that! It puts the odds in YOUR FAVOR! It narrows down a massive universe of 9,000 stocks...and presents you with the one or two very best opportunities to triple your money in a matter of months...weeks...or even days!

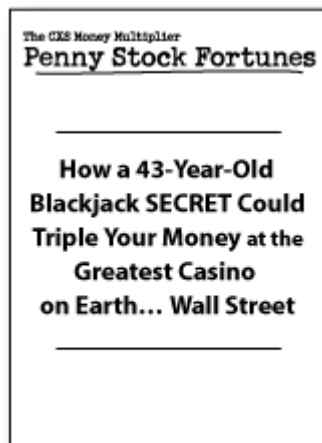

Imagine: The thrill and confidence of knowing the odds are in your favor! Knowing that you are NOT at the mercy of chance or happenstance...knowing that you are the MASTER and CREATOR of your own financial kingdom.

It's absolutely awesome! But why not experience this for yourself...risk-free!

Here's the deal: I've arranged a risk-free trial for you...

No commitment. No obligation. Just a simple no-risk trial...so you can see for yourself how CXS puts the odds in your favor, and delivers gains of 86%...146%...221%...233%...and more...over and over again!

And by the way, there's something I want you to have, just for trying CXS...risk-free...

FREE Special Report #1: How a 43-Year-Old Blackjack SECRET Could Triple Your Money at the Greatest Casino on Earth...Wall Street!

Prepare to pick the brains of a professional gambler!

My CXS scientific stock selection system applies similar principles as the most powerful and lucrative gambling strategies of all time. And, in this exclusive report, I reveal the 10 SECRET ingredients behind my CXS System.

I'll tell you exactly how it works. And, more importantly, I'll show you exactly how you can start using it - IMMEDIATELY - to rake in stunning TRIPLE-DIGIT GAINS!

Make no mistake: The information in this report will give you the tools you need to LEGALLY CHEAT Wall Street - day after day after day! And I truly believe these 10 secret ingredients alone could make you a multimillionaire very soon.

And there's something else I want you to have. If you give CXS a risk-free trial today, I'll also send you a second Special Report.

FREE Special Report #2: My Single Favorite Penny Stock

People ask me all the time: 'James, if you had to buy just one stock that could make you the most money...what would it be?'

Here's my answer! Selected by my scientific CXS System, this is the ONE AND ONLY stock where I'd put SERIOUS MONEY if I were going to roll the dice tomorrow morning.

In my opinion, this stock is virtually a sure bet. Here's why:

As you may know, America is growing older. People are living longer. In fact, it's very common for people to live to be 98 or even 100 years old. But...because people are living longer, the need for NURSES is increasing rapidly.

Think about it: The older people get, the more health care assistance they need. And now, hospitals, emergency rooms and nursing homes all need MORE nurses.

But here's the problem: The United States is ALREADY SHORT between 110,000 and 126,000 nurses - and the deficit is growing.
According to Joyce Thompson, a professor at the University of Pennsylvania School of Nursing, the nursing deficit could reach as high as 400,000 in the next few years!

This is creating a medical crisis of epidemic proportions!

Emergency rooms are at risk of shutting down. Surgeries are being delayed. And thousands of people are not receiving the critical, lifesaving nursing care they need.

That's where my FAVORITE PENNY STOCK comes in.

My favorite penny stock supplies hospitals, nursing homes and health care providers with nurses. In fact, they have one of the largest temporary medical staffing networks in the country - and are perfectly positioned to benefit from the growing nurse deficit.

And here's the best part: This stock was recently trading at \$29 per share.

But...they are in the process of restructuring their database and payroll system. That costs money. And instead of spreading the costs out over several years, these guys decided to take the accounting hit right on the chin - up front.

Because of the restructuring, they haven't been able to meet their estimated earnings. So the stock has taken a beating. It's now trading around \$8 per share.

This presents an incredible buying opportunity!

You see, according to my CXS scientific system, the company's fundamentals are still as strong as ever. The stock price is down because of the restructuring...and that's a TEMPORARY situation!

When people realize that this stock is on sale for a mere \$8 - it could come roaring back to \$29 per share!

Imagine a rubber band that you've stretched too far. When you let the rubber band go, it snaps back into its 'normal' position.

This stock is exactly like that rubber band stretched too far. And when it snaps back - savvy investors could become very wealthy in a matter of days!

Just consider the gains my PSF members have seen...

Recent CXS scientific stock selections have generated gains of 146%...221%...86%...147%...73%...65%...233%...and MORE. This stock could put those gains to shame...very soon!

Wall Street: The Other Las Vegas

He's been called the greatest stock trader of all time. But Nicolas Darvas was NOT a stodgy Wall Street professional trading on inside information. In fact, he was the highest paid DANCER in show business!

Born in Hungary, Darvas studied economics at the University of Budapest. He then fled to Turkey in World War II, where he trained eight hours per day to become a dancer.

Darvas and his half-sister Julia became a highly paid dance team in the United States. In 1953, Darvas and Julia appeared with Judy Garland and Bob Hope - and by 1956, they were touring the world. Despite his tremendous success as a dancer, it was in the stock market that Darvas accumulated great wealth. Darvas recognized that Wall Street was nothing more than a giant casino ripe for the picking.

"I began to see Wall Street for what it was - a gambling house, peopled with dealers, croupiers and touts on one side, and winners and suckers on the other."

Based on this revelation, Darvas developed a simple mathematic stock-picking formula and turned \$25,000 into OVER \$2 MILLION in 18 months!

Darvas published two books, *How I Made \$2,000,000 in the Stock Market*, and *Wall Street: The Other Las Vegas*. Time magazine acknowledged his success with a feature article in May 1959 - and his groundbreaking work

forced the American Stock Exchange to change their rules!

Please understand: Darvas was not a Wall Street insider. He was just a street-smart guy who figured out how to BEAT THE SYSTEM. Now you can do the same!

In his Special Report *How a 43-Year-Old Blackjack Secret Could Triple Your Money at the Greatest Casino on Earth...Wall Street* James Boric reveals his 10 secret ingredients behind his powerful CXS scientific stock-selection system. The system that delivered gains like 65% in less than two months, 74% in only five months, 146% in under two months and 233% in only two months and a day!

This report will give you the tools you need to capture triple-digit stock market gains, starting immediately! This Special Report is yours...FREE! Please read on for details! This is a limited offer, so please hurry.

I urge you to act now...reserve your risk-free trial. The moment I hear from you, I'll email you the Special Report *My Single Favorite Penny Stock*. The report will tell you everything you need to know to get in on this once-in-a-lifetime opportunity.

And as promised, I'll also send you the Special Report *How a 43-year-old Blackjack Secret Could Triple Your Money at the Greatest Casino on Earth...Wall Street*.

In a moment, I'll tell you how to reserve your risk-free trial membership...and your FREE reports. But first, let me introduce you to...
