

Special Report

THE TRADER'S CODE

HOW A BLUE-COLLAR KID FROM
CHICAGO TURNED \$400 INTO \$200
MILLION USING A BEGINNER'S
SYSTEM ANYONE CAN LEARN

*BY FOLLOWING THIS ONE SIMPLE TRADING
RULE, YOU COULD TURN \$5,000 INTO 2.5
MILLION IN 3 YEARS!*

Dear Friend,

Like many kids growing up in blue-collar Chicago, one special boy viewed the city's commodity markets as his best shot at riches.

Before he was old enough to enter the trading pits, he persuaded his dad, a city engineer, to fill orders for him. According to *BusinessWeek*, it wasn't long before he lost his father's life savings.

But despite his early frustrations, he learned from his mistakes.

And through painful trial and error, he developed a simple trading system that allowed him to turn \$400 (saved from his pizza delivery job) into a staggering personal fortune of over \$200 million!

I'm going to show you how you could do the same...

In fact, in this letter, I'm going to reveal another simple **trading system that could double your money every three months**. Over and over again...

That's good enough to turn \$5,000 into \$2.5 million in three years.

This system is superior to any other wealth-building strategy I've ever seen. And it's so easy, a 12-year-old could use it.

Better still, this system can offer virtually unlimited profits with strictly limited risk.

And best of all, this amazing system works in good markets or bad, regardless of rising interest rates, international conflict or economic uncertainty.

I'll tell you all about it in just a moment. But first, let's get back to our young friend from Chicago.

**TRADER'S ARE MADE —
NOT BORN**

Fast forward 25 years...our boy is now a man. He's made over

\$100 million by trading commodities. His stunning trading success created an ongoing dispute with his childhood friend and business partner, Bill, who believed that he was "one in a million"...that his spectacular success was due to some rare innate talent.

But our self-taught pro thought otherwise. In fact, he figured if he could make a fortune trading commodities...anyone could.

So to settle the argument, he took out an ad in *The Wall Street Journal*.

"Traders Wanted," the ad announced.

He received over 1,000 applicants, of which he interviewed 80. He ultimately selected 14 people to enter his training program.

The new trainees included an actor, a security guard, a professional cardplayer, a low-paid bookkeeper, a financial consultant, a boy fresh out of school, a former exchange clerk and even a fantasy game designer.

He nicknamed the trainees "Turtles," because he visited a turtle farm in Singapore and saw thousands of turtles being raised in huge vats. He knew **he could make people into traders** just like that farm-raised turtles.

And so, after a brief two-week training program...**the Turtles began trading.**

How did they do?

According to *The Wall Street Journal*, the Turtles generated

approximately \$150 million in profits in their first five years of trading!

Remember: These were not professional traders relying on previous experience. They **were just plain, ordinary folks who decided to give trading a try**. For example:

- C.F. - a 19-year-old kid barely out of high school - generated roughly \$31.5 million in profits as a Turtle
- J.P. - a public accountant from the "boondocks" of Roanoke, Va. captured over \$35 million and now manages over \$1 billion!
- E.C. - a former exchange clerk - generated over 100% gains her first year, and now trades for very wealthy private clients.

Bottom line: Trading commodities is **NOT** a special skill reserved for a select few. It doesn't require an Ivy League education. In fact, **if you can add and subtract, you have the tools you need to become a successful commodity trader** - starting today!

Could that be of interest?

If so, keep reading. Because I'm about to show you a similarly **SIMPLE** commodity trading system that could **double your money every three months**. The Turtles heavily guard their system, reavealing it to no one...but I have mapped out a system that delivers similarly astounding results.

This system works in good markets and bad, and requires **ONLY** 10 minutes of your time each trading day.

Most important: While this system can offer **UNLIMITED profit**

potential...it does so with absolutely limited risk!

A NEW BOOM IS UNDER WAY!

My name is Kevin Kerr. If my name sounds familiar, it's because I'm frequently quoted on financial news programs on stations like CNN and CNBC, and in newspapers like *Investor's Business Daily*.

CBS MarketWatch alone has quoted me over 500 times.

I've been a professional trader for over 15 years. From the trading pits in Chicago and New York to commodity derivatives markets in London - I've seen it all. And years of watching fortunes being made have taught me valuable rules for investing.

It's also taught me to recognize opportunity. And the opportunity I see right now is absolutely phenomenal.

You see, a **new boom is under way**. It's in commodities, natural resources, and foreign currencies. And I'm not the only one who thinks so...

- *The Wall Street Journal* reports that institutional investors have been pouring money into commodities this year. Ospraie Management and Catequil Asset Management recently allocated over \$1 billion to the commodity markets
- Paul Tudor Jones (one of the 25 richest guys on Wall Street) and George Soros (the 54th richest man in the world, according to *Forbes*) are allocating sizable portions of their

- assets to commodities after having ignored them for years.
- And according to CNN, even ultra-conservative "buy-and-hold" investor Warren Buffett has moved a significant portion of his portfolio out of traditional stocks and into foreign currencies.

Why are these smart investors making this move?

Because trading commodities, natural resources, and foreign currencies **offer opportunities for wealth building unavailable in the stock market.** In fact, **over the past two years, commodities have done more than eight times better than traditional stocks.**

And guess what? This is just the beginning!

You see, after 20 years of going nowhere, commodity prices are taking off. The CRB Index - which represents a broad basket of commodity prices - is at its highest point in 20 years.

And since the beginning of 2003, according to *The Wall Street Journal*:

- Copper prices are up 78.5%
- Natural gas is up 10.2%
- Cotton is up 12.9%
- Soybeans are up 61%
- Platinum is up 38.4%

- Silver is up 39.5%
- Oil is up 12.9%.

Governments around the world (including the United States) are printing money like crazy to jump start the economy and stave off deflation. The United States alone pumped an extra \$500 million into the economy in the past three years.

The result?

More dollars are chasing commodities, and **the DEMAND** for raw materials like oil, copper, steel, silver and natural gas **is soaring**.

At the same time, there has been limited production of raw materials over the last 20 years. *The Wall Street Journal* reported:

"A lack of new plants, pipelines, and ships to deliver raw materials to keep the world economy running is helping to keep commodity prices high..."

Bottom line: We have SKYROCKETING DEMAND combined with a very LIMITED SUPPLY - and prices are going through the roof!

Will this continue? You better believe it!

In fact, Rand Financial Services Vice President Stanley Bedows told *The Wall Street Journal* that "**When you get price spikes in a market like this, the sky's the limit.**"

According to *BusinessWeek*, Karlis Kirsis, managing partner of World Steel Dynamics Inc., says, "The days of cheap raw

materials are gone."

And Jim Rogers, best-selling author of *Investment Biker* and *Adventure Capitalist*, predicts a multiyear bull market in commodities.

Make no mistake: **The profit opportunity is enormous** - and it will continue for the next year, if not longer. People who get in now can expect staggering returns in the next 12 months.

What's the best way to profit from commodities?

Let me show you a simple system that could allow you to turn \$5,000 into over \$2.5 million in the next three years...

A SIMPLE SYSTEM THAT COULD MAKE YOU RICH!

Our young Chicago boy who turned \$400 in pizza delivery tips into \$200 million in trading profits is named Richard Dennis. He has since stopped trading, since his clients bothered him...but his Turtles carry on - they became some of the most successful traders of the last 20 years!

But what about other investors - the ones who can't learn from Richard or the Turtles? **Can anyone trade commodities successfully?**

The answer is YES! As Richard Dennis proved with his Turtle

experiment, **ANYONE** can make money - **BIG MONEY** - in the commodity markets.

“Surging prices in staples such as oil, gold and corn are catching investors’ eyes. The rewards can be great, if you know how to play.”

—Business Week, August 24, 2004

Buying commodities is no different from buying stocks. A simple call to a broker gets the job done. All you need is a proven system and the discipline to follow that system.

Bottom line: It's easy, even for beginners. And I've taken my 15-plus years of commodity experience and boiled it down to a simple system a 12-year-old could follow!

My investment advisory service is called **Resource Trader Alert (RTA)**. We focus on commodities, natural resources and foreign currencies. We make money by recommending things like oil, soybeans, gold, silver, Canadian dollars, sugar, and even coffee!

“Trading provides one of the last great frontiers of opportunities in our economy. It is one of the very few ways in which an individual can start with a relatively

RTA uses a proprietary set of technical indicators and charts to track the daily price movements of commodities, natural resources and foreign currencies.

The RTA system is like a moneymaking machine. We don't get every pick right, but by cutting losses quickly and letting

our gains soar, we generate staggering total returns.

For example:

In 2003, **RTA** nailed 24 winning trades picks out of 34 tries. That's a 71% accuracy rate!

If you had put \$5,000 into each trade (including the losing picks), you could now have almost \$120,000!

If you had put \$1,000 into each trade, you could now have almost \$24,000!

And if you had put \$10,000 into each trade, you could now have over \$238,000! In 2003 alone, our readers pulled in stunning gains, including:

- 173% on Canadian dollars
- 285% on silver
- 260% on T-notes
- 154% on Swiss francs
- 402% on Anooraq Resources Corp.
- 72% on heating oil
- 122% on soybeans

The list goes on and on. And 2004 is shaping up to be even better. In fact, in 2004, **RTA** readers have already been able to nail gains of:

- 129% on soybeans in 18 days!
- 68% on wheat in 19 days!
- 100% on silver in 5 days!

- 119% on crude oil in under one month!

Now, please understand: **RTA** doesn't get every recommended trade right.

But the important thing to remember about **RTA** is this: **No individual trade matters. The only thing that matters is the system.** If we get a recommended trade wrong, we cut our losses quickly and move on. And the winning picks far outweigh the losers.

Remember Babe Ruth? The guy struck out from time to time. But his winning hits more than made up for his losing tries.

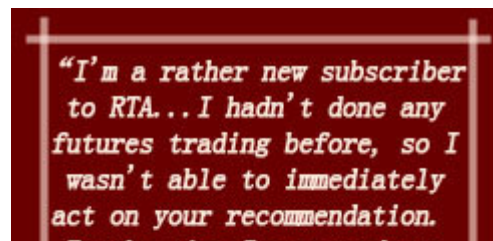

Same with Barry Bonds. And all the great hitters. These guys are not afraid to get one wrong now and then.

Why? Because **strikeouts are an important part of their system!**

It's the same with **RTA**. And that's why **RTA can be the perfect trading system for beginners.** If you follow the system, there's no need to worry about any single trade.

We miss a few here and there. But the winners can more than make up for the losing trades.

Remember: In 2003, we nailed 24 winning trades picks out of 34 tries. That's a fantastic 71% accuracy rate. Even so, we still got 10 trades wrong.

"I'm a rather new subscriber to RTA... I hadn't done any futures trading before, so I wasn't able to immediately act on your recommendation."

But the losers didn't matter! At the end of the year, when we added up the winning picks and subtracted the losers, **RTA** readers could have realized total gains of over \$9,000!

That means that **RTA** readers didn't have to worry about each individual trade. They simply follow our proven system...and haul their gains to the bank!

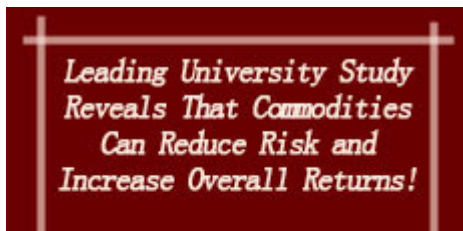

If you had put \$5,000 into each **RTA** trade recommendation in 2003, you could now have over \$100,000. And that includes losing picks!

Bottom line: Follow the **RTA** system, and your wealth can grow. Period.

Now, I want to give you a glimpse of **RTA** in action. But first, let me tell you about a powerful - almost miraculous - **wealth-building feature** that **RTA** utilizes.

5 REASONS WHY OPTIONS ARE PERFECT FOR YOU!

RTA does not trade stocks. Nor do we buy commodity futures contracts.

Instead, we buy options. Here's why:

While trading commodities is extremely lucrative, buying commodity futures contracts can be

very risky. In fact, you could loose more than your original investment.

Options are different. Options offer the same staggering profit potential of futures **WITHOUT** the dangerous risk. With options, your risk is strictly limited to the small amount you invest. Period.

You probably know what options are. They are the right to buy or sell a particular stock or commodity at a certain price for a limited amount of time. A "call" option gives you the right to buy the underlying investment...and a "put" option gives you the right to sell.

1. **Leverage**: You can purchase an option for a fraction of the cost of buying the underlying commodity or stock. This means you can start trading with a smaller investment, as low as \$500.
2. **Unlimited Gains** :Your profit potential can be unlimited! You can make big money in options, even as a beginner!
3. **Limited Risk** : Your risk is strictly limited to the small amount you invest.
4. **Profit in Good Markets or Bad** : With options, it doesn't matter whether prices are going up or going down. You can make money regardless of interest rate fluctuations, political considerations or economic concerns.
5. **Easy**: Trading options is easy! All you need do is call your broker and relay the simple trading instructions we provide.

Now let me show you how everything comes together to generate impressive gains for our **RTA** readers. And please, as you review the following example, keep in mind how very simple this all is...

196% IN 14 DAYS!

This is a perfect example of how **RTA** readers can profit from a simple fluctuation in commodity prices. Did you ever think you'd make money trading soybeans?

To most people, that sounds like something for an expert. But it's not - it's very simple...take a look:

In April 2004, soybean prices had climbed to near-historic highs. Grain growers were hoping that soybean prices might stretch past \$11 a bushel.

The last time that happened is almost a distant memory, a bonanza that occurred in 1988, when bean prices rose to within a penny of \$11 a bushel only to crash, falling all the way back to \$3.50.

So with soybean prices nearing record highs again, I figured a major correction could be in the works.

In addition to the high prices, I discovered that small speculators were buying into the high prices, while commercial traders (those actually in the grain business) were shorting grain. They were looking for prices to fall as well.

So, on April 8, 2004, **RTA** sent readers simple instructions:

- **Action to take** : Buy July \$8.60 soybean puts (SN4P860) for just under 7 cents (\$337.50) or lower,

looking for a sharp downward correction prior to option expiration on June 25. Your maximum risk is \$337.50 per option plus transaction costs.

Now, all that may sound a bit complicated. But all our **RTA** readers did was call their broker and relay the message.

That's it! It's as easy as buying a stock or mutual fund!

How did things turn out?

Just five days later, soybean prices dropped. And our puts went up in value.

RTA sent readers this instruction:

- **Action to take** : Contact your broker and instruct him to sell half of your July \$8.60 soybean puts (SN4P860). Our suggested entry price was just under 7 cents (\$337.50). Currently, this option is going for \$550, a 62.9% gain.

RTA readers who followed these instructions made about 63% in about five days!

Pretty good. But it gets even better! As you may have noticed, we kept half our soybean position. And I'm glad we did.

By April 22, just two weeks after our initial buy, soybean prices had dropped further. It was time to cash in. **RTA** sent readers the following instructions:

- **Action to take** : Sell the remainder of your July 2004 \$8.60

soybean puts contract (SN4P860). Between the two trades, we more than doubled our money with an average gain of 129.5%. With the volatility in today's market, you may be able to get a better gain. Let us know how you made out with this trade.

Our **RTA** readers pulled down 196% on this half of the Soybean trade!

Think about that. If you had invested \$5,000, you could now have nearly \$15,000. And that's in just two weeks!

Now, let me ask you: Did that seem complicated? All **RTA** readers had to do was relay the trading instructions to a broker.

They didn't have to analyze or evaluate. All they did was follow the **RTA** instructions...and haul their money to the bank!

The system is easy, and it works. And I can promise you this:

The feeling of grabbing 196% gains in just a few days is exhilarating. There's nothing like it!

But listen: Don't take my word for it. Find out for yourself...right now!

“TRADER’ S WANTED! ”

Richard Dennis proved that anyone could make money from his system. And the 14 folks who took him up on the offer generated over \$150 million in their first five years trading!

I'd like to help a group of people get rich as well.

And I'd like you to be a part of it.

I truly believe that **anyone can make money** using my **RTA** system. In fact, my **RTA** readers - **many with no experience in commodities or natural resources - are already making money like crazy.**

So here's the situation: I've arranged a **special risk-free trial**. I'll be accepting enrollment for the next 11 days.

If you would like to experience the thrill of trading a proven system, this is your chance.

During your **risk-free trial**, you'll receive regular trading alerts via e-mail or fax.

All you need do is pass the trading instructions on to a broker. Or, if you're more comfortable, you can "paper trade"...and evaluate the results without risking a penny.

Imagine turning on the evening news and finding out you made big bucks as the price of Oil moved up. Imagine the thrill as you find out that the falling U.S. dollar just tripled your money!

Imagine how you'll feel when the price of corn becomes your personal profit machine!

I think you'll discover that turning a few hundred dollars into a million dollars or more is very possible.

Remember, in 2003 alone, **RTA** readers who put \$5,000 into each trade could now have over \$100,000!

People just like you have become wealthy using a system like **RTA**. And you can do it, too. There is one catch, however. You see, while ANYONE can do this...most people won't.

Let me explain...
