

## Investing Precision: The Secret Weapon of the Super-Wealthy

How much money can you make trading **Super Stocks** ?

There really is no limit...

After all, once you're confident in their performance, there's nothing to stop you from rolling earlier profits into future trades by taking multiple positions.

Then, instead of making \$550 in profits on a single-position trade, like we did with our Philly Banking Index position, you could potentially make \$2,750 with five positions...\$5,500 on a 10-position trade...or \$27,500 when you take 50 positions.

But if you think profits of \$29,400 are impressive, you ain't seen nothing yet!

When you consider that market direction has no bearing on our success, you'll soon realize how much money you can make. After all, you already saw what happened to \$5,000 with 24.9% annual returns in "the tale of two investors." Let's take that one step further...and consider the profits you can make by playing the same **Super Stock** over and over again.

Let's use our two bearish picks on the Philly Banking trade as an example...

### One Index...Two Trades...119% in Profits

Looking at the long-term trend, I noticed that the 24 largest banks and lenders (including Citigroup, Bank of America, and J.P. Morgan) could fall heavily. So I recommended put options on the banking index.

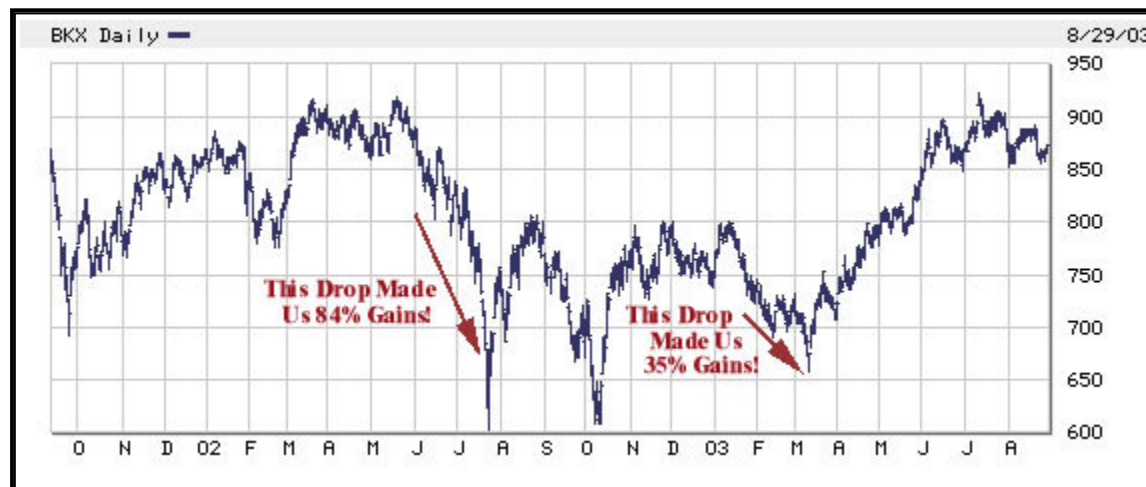

Boy, did this one pay off...

Shortly after this trade, the BKX index quickly trimmed 160 points off the index value, dropping it from 850 to 690 in a matter of days. We used this drop to lock in **84% gains**.

After taking these profits, I received another indication that the banking sector was headed lower, driven by the accelerating ominous events leading up to the war. So once again, I simply issued a buy on another round of put options.

The result?

**Another 35% winner in six days!**

With this system, you could play the same **Super Stock** over and over again...making a series of fast profits off consecutive trades.

The beauty of this strategy, like I said, is that **Super Stocks** represent a basket of companies all in the same sector. If one of the companies in this basket

should turn into a big loser (like MCI WorldCom in the telecom basket, for example), that company would be replaced with a better company.

**This ensures that these Super Stocks will never go broke!**

Of course, **Super Stocks** move up and down just like any other investment. But the fact that they're trading a collection of companies - and replacing any losers with new winners - virtually guarantees that they'll never sell off.

Knowing this, you can confidently play the series ups and downs in the same **Super Stock** - over and over - for tremendous profits.

Take our series of recommendations on the Small Cap Index for example...

## **One Index...Two More Trades...135% Profits**

When the markets were showing signs of strength, I discovered the easiest way to participate in the profits was using the **Super Stock** on the Russell 2000 Small Cap Growth Index.

On May 2, I got the indication that the recent market rally could be sustained for another few months, so I recommended IWO August 45 Calls to participate in the rally. Just six days later **the calls were up 61%**, and I couldn't help but tell my readers to take profits off the table.

On June 10, I got the same bullish indication, so we bought another round of IWO August 45 Calls - only this time they made even more.

My readers held onto them for 29 days and **made 74% in profits**. The chart below tells the whole story...

## Safe During Any Market Conditions

I could go on and on about the **58%, 88%, and 112% gains** our **Super Stock** investments have generated in this last bear market, or the **15%, 18%, 22%, 31%, and 52% gains** earned during wartime market conditions, or the **91%** and **120% gains** we made throughout the Wall Street insider-trading scandals. But I don't have to, because as you can clearly see, the market's behavior is completely irrelevant to our profits.

All you need is a time-tested proven strategy to dissect and analyze each and every market segment...giving you a strong indication of where that sector is going...and the exact **Super Stock** to profit off this move.

That's exactly what you get with the *Strategic Options Alert*.

Whether the market's a bull or a bear, specific market segments are always on the move. Zeroing in on the ones set for a surefire up or down move, irregardless of other market conditions, could consistently make a lot of money...very quickly.

## Finally, a Strategy That Works in Today's Market

Before I tell you how to get this moneymaking information coming to you for **FREE**, I must make it clear from the outset that this service is not for everyone.

For one thing, it's a serious system for active investors. It uses a new investment strategy based around specific **Super Stocks** ...that are baskets of stocks that you most likely haven't used before.

Something else you need to consider...

This system is trading in its purest form. There's no "buy-and-hold" here. When a sector is ready to make a move, you'll need to get positioned quickly in the correct **Super Stock** and ride it until the fervor fades. When the ride is over, we'll tell you to get out with whatever profits you may have.

Sometimes you'll be rewarded with **27%** gains in a matter of days - like the gains our Biotech play produced. Other times you'll make **58%** in three days - like our play on the gold index...or **88%** in 22 days, like we did with our banking play.

My point is, **Super Stocks** require the right mindset. You're in only for the ride up or own.

Typically, it's a quick one...rarely a buy-and-hold situation.

Yes, it's fast paced. Yes, there's risk (this strategy isn't right all the time, but it's right enough for you to do very well). You need to have a strong enough discipline to cut the losers short and let the winners ride.

## The Time to Get in on This Deal Is Now...

It's clearly possible you can double your money *each month* using my **Super Stocks** .

It's also possible to triple, quadruple - even earn 10-to-1 returns when you stick with the system over a number of months. So long as any one of the 90 **Super Stocks** we follow continue to trade in predictable patterns, trading them when the timing is right offers you a safe way to profit.

As a subscriber to my ***Strategic Options Alert***, you'll know that I'm constantly monitoring all 90 **Super Stocks** ...each and every trading day...waiting for the exact timing to make a move.

Once I get a strong signal, you can be sure I'll get to the bottom of what's happening...research every conceivable reason as to why the sector is due for a big move... even check the news and balance sheets of the major stocks within that sector to decipher the reason for the forecast.

If everything adds up - you can profit...just as many ***Strategic Options Alert*** subscribers have done in the past.

I have no reason to believe this remarkably simple strategy is about to stop dropping these powerful clues anytime soon.

Just to prove to you how profitable my Super Stocks are, I'd like to send you my newest e-report - **FREE** of charge - titled "**Ten Ways to Double Your Money Off the U.S. Housing Market.**"

According to Federal Reserve data, there's \$32 trillion of debt in America. Nearly \$9 trillion of that belongs to households. Over \$10 trillion of it belongs to America's financial sector. But the biggest debtors in America's financial

sector are government sponsored enterprises (GSEs) like Fannie Mae and Freddie Mac.

This presents you with a massive profit opportunity, because there's a special series of **Super Stocks** that'll allow you to profit off this national debt crisis.

This special e-report reveals 10 ways to profit right now off the current status of the housing market...featuring a series of highly-leveraged **Super Stock** recommendations.

As I said, I'd like to send you this e-report (with your permission) for no charge...and since it is such an urgent subject matter I will send this report to you right away...as soon as you subscribe. We just want to make sure to get you off on the right foot.

But I'm getting ahead of myself here...

The first step is to get you on board - and get those first few profits under your belt. Then, as you see how the game is played, you'll gain the same level of confidence in the system our current subscribers have...and you'll see all the different ways to boost your returns and keep the cash rolling in.

## **That Rare First Chance to Be Ahead of the Curve**

I sincerely hope you see the full potential of this opportunity...

Since this is the first time I've been able to tell the whole story, I expect interest in this system to be tremendous. Today, you have that rare first chance to be ahead of the curve and participate in the profits of **Super Stocks** ...the newest wealth-generator on Wall Street.

If you're interested, I'd like to invite you to join our exclusive group of subscribers...

Before you decide that this system is for you, remember I want you to be comfortable with the service. Again, I specialize in a very specific strategy. Understand also that a trading system this powerful and exclusive does not come cheap. It's \$995 per year to subscribe. No special deals or deep discounts.

Without question, it's worth the price and more. After all, you'll learn how to make fast profits ranging from **27%** to **603%**, all in a safe and consistent manner, simply by following established trends. How much is this powerful investment information worth to you?

Since there is already so much demand for my ***Strategic Options Alert***, this current offer will fill up very quickly. I don't want you to join us unless you are serious about the opportunity my Super Stocks offer. A one-year order will cost you just \$995. If you join for two years, you'll get a discounted rate of \$1,795 - a \$195 savings.

I urge you to join today. I send out about one alert per week...a minimum of 48 alerts per year. There's no telling when the next big winner will come. If you're looking to recoup lost profits from the bear market, I can show you how with the power of my **Super Stocks**.

**Check Out *Strategic Options Alert* on a Trial Basis.**

**If you're still at all apprehensive, I'll offer you this option:**

Instead of paying **\$995** for ***Strategic Options Alert*** all up front, you can pay **\$249** for a three-month subscription using the credit card of your choice. That way you can check out the service on a trial basis and still get your hands on a copy of my **FREE** special report "**Ten Ways to Double Your Money off the U.S. Housing Market.**"

If we don't hear from you after three months, I'll assume you're happy with the profits you're making and your credit card will be automatically billed every quarter until you tell us to stop.

If you're not happy after three months, simply tell us to stop your billing cycle. And if you decide to cancel within 30 days, we'll refund every penny of your subscription cost... no questions asked! Even if you cancel, your e-report is yours to keep. I'm offering you ***30 days to test this strategy for FREE*** because I don't want a few dollars to come between you and the wonderful opportunity before you.

If you're at all interested in this opportunity, I urge you to make your decision quickly. Given the outstanding success we've enjoyed throughout this year - and since this is the first time I've told the full story about **Super Stocks** - I suspect that interest in this opportunity will be enormous. Please don't risk losing your chance to get in on the action.

If you're serious about making money in today's market environment, I urge you to act today. Make a modest investment in your future wealth, and sign up now!

With best regards,

Daniel Denning  
Editor, *Strategic Options Alert*

**P.S.** And to make this an even sweeter deal, if you sign up for *Strategic Options Alert* now I will throw in an additional crucial e-report, "**Essential Profit Strategies of a Strategic Trader** ." This e-report will only be available for the first 500 people who subscribe so reserve your copy and your space today.

**P.P.S.** Typically, this is where I'd give you one final reason to subscribe to my *Strategic Options Alert*. But thanks to all the profits my members are making trading **Super Stocks** , I'll let them have the last word...

*"Dear Dan*

*I've been a Trader Alert member for just a short while. So far I've realized \$22,000 on Euro call options and just bagged 335% returns on your Morgan Stanley puts in 13 days. As you know, there are other advisers out there charging \$5,000 for their services and I feel that the service we get from Dan is as good or better. Keep up the good work. We're counting on you."*

*-Subscriber, R. L. Schanbarger*

---

*"Hi Dan,*

*Just thought I would let you know that I made 81%, 603% and 159%. Thanks for the recommendations and keep up the good work."*

*-Subscriber, J. Kean*

---

*"I have been with you for two weeks now and have made close to \$10,000."*

*-Subscriber, J.A.D.*

---

*"Good call on the FRE puts. I saw a potential move on FRE and had just purchased some LEAPS puts two days before you came out with your recommendation...I purchased for \$2.55 the day of your recommendation and sold late this morning at \$5.20 when it started moving backup. Thanks."*
