

A NEW see-clearly solution only for *Dr. Douglass'* readers!

**'Keep hawk-like eyes well into
your 90s - plus protect your
vision and eye health for
years.'**

- William Campbell Douglass II, M.D.

Dear Friend and Reader,

As you know from reading my newsletter, I devote a lot of ink to pulling the rug out from under conventional medicine's profit-driven, 'band-aid' approach to all kinds of health questions...

And nowhere is this more apparent than when it comes to your eye health.

The plain truth is that when it comes to your vision, the medical mainstream focuses on compensating for problems instead of truly healing your eyes...instead of addressing most forms of visual deterioration. And why shouldn't they? That's where all the money is.

Think about it. When a patient with Age-Related Macular Degeneration (ARMD), walks through the door, it's much more profitable for doctors to simply throw up their arms in defeat. They reach for the prescriptionpad, surgery schedule, or catalog of

designer eyeglass frames instead of researching and recommending the little-known, inexpensive natural options the mainstream typically shuns...

But I'm writing today to tell you that just because you're not seeing these safe, effective, and affordable alternatives for eye health - and just because they're not pervasive themes in the mainstream channels, that doesn't mean they don't exist. In fact, such - safe, natural, and time-tested nutrients do exist and can help you:

- Address the causes of ARMD, a big concern for those over 60
- Reduce eye pressure -
- Lessen eye fatigue for longer reading sessions
- Strengthen night vision for safer driving
- Protect your eyes from the harmful effects of both ultra violet rays and environmental toxins

I'm going to introduce you to some of these safe, natural secrets to better vision in just a minute. But right now, I want to explain to you why...

**When it comes to your vision,
what they don't know can hurt you**

In my opinion, what conventional eye doctors should do before prescribing drugs, glasses or surgery is ask patients a few basic questions about their diet and daily nutrition. Of course, this presumes that today's eye doctors actually know something about how deficiencies in certain nutrients can cause deterioration of your vision...

Quite frankly, most of them don't. But let's focus on the positive, shall we? The good news is that I've been aware of this vision/nutrition link for decades - why do you think I've been able to maintain such excellent, glasses-free eyesight? And I've been kicking around since before the Great Depression! Well, now I want to tell you all about it...

The hidden cause of many vision maladies that most eye doctors turn a blind eye to...

You see, regardless of whether most mainstream eye doctors know it or not, like so many other aspects of your health, diet and nutrition can have a profound effect on your vision. That's right: What you eat now - and what you've been eating your whole life - could be affecting your vision (for better or worse).

However, today's sugar-rich, ultra-refined foods are nearly devoid of the nutrients the human eye needs for optimum visual acuity and resistance to disease. That's right - unless you've got a time machine and are doing your grocery shopping at the markets of a century or more ago, you're likely not getting the vitamins, minerals and other compounds your eyes need to see clearly and promote your eyes health. Even if you've been doing your best to 'eat healthy'...

This is why I'm writing to you today: To recommend a simple, inexpensive way to give your eyes everything they need in the way of vision-boosting nutrition, every single day. It's called Ultimate Vision Support - a brand-new, once-a-day dietary supplement from Real

Advantage Nutrients. It's specifically formulated to give you a

steady infusion of the nutrients, vitamins, and minerals they need to resist the effects of ophthalmic problems...

Or to make sure you keep your good eyesight for as long as possible!

You may recognize some of the specially chosen ingredients in new Ultimate Vision Support - but others are cutting-edge substances you definitely won't find in run-of-the-mill 'grocery store' vision supplements. More than the typical bilberry- or lutein-based formula, Ultimate Vision Support contains 27 vision-boosting substances from around the world - in the optimum and completely safe dosages for a real difference you can clearly see. This complete spectrum of time-tested nutrients are what set this revolutionary formula apart from the others, and what makes it worthy of both the Real Advantage name and my endorsement.

But in real-world terms, new Ultimate Vision Support is designed to help maximize vision to help you to...

Sit back from the TV, drive at night without fear - and not lose your golf ball in the middle of the fairway...

Your vision doesn't have to suffer the ravages of time. Given the right natural substances, you can clearly see the world through the eyes you used to have (or wish you had). How can the 27 targeted nutrients in new Ultimate Vision Support safely give your peepers the clarity, sharpness, and depth perception you need to maintain your active lifestyle - or that you may never have had in the first place? In three powerful ways...

FORTIFYING YOUR EYES WITH

FREE-RADICAL FIGHTING POWER

I'm sure you've heard of free radicals. In real-world terms, they're like little molecular assassins whose sole mission is killing healthy cells in every organ and tissue in your body - especially your eyes! In fact, lifelong free-radical damage is suspected to be at the root of age-related macular degeneration (ARMD), today's leading cause of blindness in those over 60.

Though destructive free radicals are byproducts of our normal metabolism, they can be made billions more in number by external influences like the sun's ultraviolet rays and toxins in our environment. That's why new Ultimate Vision Support contains more than a dozen of the strongest natural antioxidants (free radical fighters) on Earth.

Ingredients like:

- A powerful 5-part vitamin A complex including alpha- and beta-carotene (and others) - all proven vision-boosting nutrients. New Ultimate Vision Support contains more than 3 times as much of the vitamin A family of nutrients as most other vision supplements.
- Precious metals (to your eye health anyway) copper, manganese, magnesium and zinc, the combined effects of which give you superb antioxidant power. Many other vision products fail to include these crucial metals in their formulas at all.
- More than twice as much (as some other supplements) amino-acid-based n-acetyl-l-cysteine, a premier free-radical-fighting anti-toxin and immunity-booster.

BOOSTING BLOOD FLOW AND REGULATING EYE PRESSURE

Like your other organs, eyes can only function their best when they're nourished by a steady and sufficient flow of nutrient-rich blood - and when they're not abnormally taxed with excess internal pressure (called intra-ocular pressure or IOP). In new Ultimate Vision Support, you'll find several key ingredients aimed at promoting optimal eye-artery circulation, plus some specifically targeted nutrients for relieving excess pressure, including:

- The ancient Far-Eastern secret to good circulation, arterial and eye health ginkgo biloba.
- A generous allowance of multi-purpose vitamin C. Also a powerful antioxidant, this common and versatile vitamin has been shown to boost immune function and preserve good health in many organs and tissues - including the eyes.
- Four powerful antioxidant flavonoids, including the potent quercetin, which may have a natural anti-inflammatory properties. And new Ultimate Vision Support is also fortified with rutin, a circulation-boosting flavonoid that's widely considered useful in promoting clarity and long term eye health. Rounding out the 'flav four' in this powerful new formula are green tea and hesperidin, a pair of arterial strengtheners that have long been used (especially in the Far East) to improve and maintain optimum vision and immune system function. Yet as powerful as this potent pair is, most vision supplements don't even include them.
- Essential B-vitamins like thiamine (thought to relieve IOP), riboflavin, folic acid, niacin and vitamin B12 provide for optimum maintenance of your ocular tissue - especially the cornea and the crucial myelin sheath around the optic nerve.

Ultimate Vision Support is one of the few vision supplements on the market that includes this family of super.

NOURISHING YOUR EYES WITH SUBSTANCES THAT PROMOTE VISION

Though fighting the free radicals that destroy your vision and ensuring that your eyes have optimal circulation, pressure, and nerve function are vitally important to your continued good vision, there are still other safe, natural substances that can actually make your vision better.

In my new Ultimate Vision Support formula, you'll find several of these - among them.

- A powerful pair of carotenoids - lutein and zeaxanthin - that are absolutely crucial to proper vision. But since neither of these substances are produced by your body (they must come from diet or supplementation), deficiencies are common. Giving your eyes an infusion of these potent nutrients can make a big difference in your eyesight!
- Protein-based taurine, a naturally occurring amino acid that's necessary for the chemical reactions between your brain and optic nerve that produce normal vision. Taurine is also instrumental in protecting your eyes from the harmful effects of both ultra violet rays and other environmental toxins.
- Tasty, blueberry-like bilberry, a fruit that's long been used to address all manner of visual concerns by reducing eye fatigue and aiding in night vision. In my own practice, I've never seen much in the way of stellar results with bilberry. However, despite my skepticism with regard to the usefulness of bilberry, I've chosen to include it in the formula. Partially because most

people expect to see it included, but mostly because it is safe and possibly effective.

These are just a handful of the incredible natural secrets for better eyesight and immune system function that I've included in Ultimate

Vision Support. All 27 of the hand-picked ingredients in this revolutionary formula function in one (or more) of the ways I've just told you about...

And together, they form the most complete, effective, and affordable nutritional supplement available for vision support and enhancement - I guarantee it. Here's how to get some for yourself right now...

**Real value, real quality, backed by
real experience, GUARANTEED...**

With new Ultimate Vision Support, I've found a way to easily and affordably give you all the everyday essentials for optimum vision - regardless of whether you're aiming to preserve or enhance your already-good eyesight. All you need to do is order - with no risk to you!

And since it's made by Real Advantage Nutritionals, I'm certain of the safety, effectiveness and quality of every single ingredient in it...

Because as you may already know, if a product bears the Real Advantage name, it has passed muster with me. This safe, powerful, effective 27-nutrient Ultimate Vision Support formula is no exception. It is the very best that a vision-supporting dietary supplement can possibly be, and it's a lot less money than some

simple 6- or 8-ingredient vision supplements you'll find at health specialty stores!

I'm so confident in this revolutionary formula that like everything else in the Real Advantage line, I'm backing it with my no-risk 'Ultimate Guarantee.' That means that if you aren't 100% satisfied - if you don't SEE a real difference in your visual clarity, night vision, depth perception and color vision - I want you to have a complete refund of your money, including shipping and handling.

That's right: All your money back, at any time, for any reason - period.

Try it and see - 100% risk free

By subscribing to my newsletter, you've put your trust in me. And because of this, I want the products and formulas I endorse to work for you. If that means the only way I can be sure you'll get a chance to discover their benefits is if there's absolutely no risk to you in trying them, then so be it.

That's really the whole point behind my ironclad no-risk 'Ultimate Guarantee.' It's my way of saying: 'This product is safe and effective, and I'm sure it will help you - but if it doesn't, I don't want you to have lost a dime in trying it.' It's that simple.

So whether your vision isn't as good as it used to be or you've got peepers as sharp as a

fighter pilot's (and want to keep them that way) - I want you to try my new Ultimate Vision Support today, risk free.

Because, of all your senses, vision is the hardest one to live a quality life without.

Seeing a brighter future - for your eyes,

William Campbell Douglass II, M.D.

P.S. Not only is new Ultimate Vision Support a great value, it's also backed by the strongest money-back guarantee in the business - mine.
