

## The Breakthrough Energy Stock All the Insiders Want to Own

When cheap oil finally does disappear, the world will search desperately for something... anything... to fill the void.

But wind, solar, hydrogen, thermal and more... most of these alternatives to oil energy are just NOT READY for prime time. They're either just too expensive to use or too different and complicated to develop SOON enough to make a difference.

However, among the most immediate options that DO work is the most incredible energy breakthrough by far... **liquid natural gas** (called "LNG" by energy market insiders).

Natural gas, as you know, has been around forever.

You have it lighting your stove, fueling your pilot light, maybe heating your water.

But there has always been a big downside to natural gas. It's hard to move it around. In gas form, it can't flow through a pipe like oil. And you can't pack it into the hull of a cargo ship like you can several tons of coal.

**"LNG" -- liquid natural gas -- changes all that.**

The gas is super cooled to a temperature of minus 260 F. You know that cooled gases turn into liquids. And in this new liquid form, natural gas is MUCH easier to handle. It takes up just 1/600 of the space it needed as a gas.

It's also shockingly cheap to move around. And because it's natural gas, it still burns cleanly. Even more cleanly than oil or coal. And the economics of LNG are perfect for the tricky crisis ahead.

Alan Greenspan recently told Congress that LNG is an ESSENTIAL "safety valve" for exactly the kind of tight supply energy crisis we're facing ahead. Here's what that means for you as an investor:

**Washington is ready to throw huge money behind LNG. Investors who get in early, in the right LNG-focused companies, could make a FORTUNE.**

The Big Oil companies are excited, too. At a recent energy conference, Exxon Mobil CEO Lee Raymond recently gushed (no pun intended) over the future of LNG. In fact, virtually all of the major energy companies have LNG research, facilities and exploration going on right now... they're getting ready to build more... and across Asia and Europe, this looks like the boom technology of the energy industry for years to come.

***There's no denying this will be one of the most important new energy sources of the new century!***

It's practically guaranteed by the fundamentals. Natural gas itself is already the fastest-growing energy market in the world . Nine out of 10 new electrical power plants burn natural gas. And consumption worldwide will double by 2025!

LNG will meet a huge and growing portion of that demand. It's already starting. World oil trade increases at 2.9% per year... while world LNG trade is increasing at more than TWICE that rate... or 6.7% per year! When "E-Day" hits in 2006... global LNG trade

should be about 34% HIGHER than it is right now!

Your opportunity to make money investing in the right LNG companies over the next 24 months is HUGE. Make no mistake.

However, you can't get rich playing LNG's future by buying stock in the majors like Exxon Mobil or any of the other Big Oil companies. They've just got too much else going on. It would be like buying an ocean to catch a fish!

But there IS one relatively UNDISCOVERED stock in the LNG market that's going to make a few very smart investors very rich. Safely. And very quickly...

## **The Purest Energy Investing Gains You'll Ever Make**

I couldn't imagine a more pure play on the incredible future of LNG than the stock you'll read about in your free copy of ***Crude Awakening: How to Survive the Total Global Energy Crunch of 2006.***

It's the same LNG stock my ***Outstanding Investments*** readers follow today. And here's what I like about it for you.

First, you have to know that liquid natural gas IS this company's business. It's their specialty. They do everything from primary exploration to delivering the end product to their customers' doorsteps. It's what they do best, and energy-investing insiders know it.

It's going to be the company leading the LNG revolution.

Yet you can still get it right now at a low enough level to make huge exponential profits when the shares take off. This company already has an \$18 billion market cap. Which makes them small enough to still have plenty of room to grow, but large enough to move fast on new exploration projects.

Already this company dominates its field !

Right now, this company's P/E ratio is a safe 14.6. The shares pay a 1.16% dividend. But these aren't the only things that make this an explosively profitable opportunity.

See, this company ALSO trounces the rest of the energy industry on the numbers... from stellar growth to incredible profit margins... conservative valuation to rock-solid financial stability... and amazing total returns on investment!

Here's something else. Over the past five years, every time this company has sold a cubic foot of natural gas... they've discovered another 3 cubic feet! This is called the "replacement ratio." It's a very important number in the LNG sector.

And on this number... no other company can compare !

Like I said, this is a perfectly sized company. It's big enough to finance huge exploration projects. But it's small enough to deliver you an exponential return on your investment when the stock -- and the whole LNG market -- starts to go up!

My ***Outstanding Investments*** readers are already seeing gains

pile up on this stock. **But I expect 300% or more on this stock over the months ahead.** Don't miss this opportunity. This is "ground floor" right now... but it won't be for long!

Read the full details about this company immediately in your FREE copy of ***Crude Awakening: How to Survive the Total Global Energy Crunch of 2006.*** And then read the rest of the six FREE reports in my new **PEAK-OIL PROTECTION LIBRARY** which I'll rush to you at no charge. Just click the "Subscribe Now" button below to get started!

Here's another explosive opportunity you don't want to miss!

## **As Good as the Golden Days of Texas Oil Fortunes!**

In the golden age of Texas oil... you could practically tap a new well just by kicking over the right rock. There was that much oil sitting that close to the surface.

Those days are over for oil.

**But right now there are over 700 trillion cubic feet of coal bed methane gas just sitting in coal beds all across the United States and Canada. At least 100 trillion cubic feet of this gas is recoverable already.**

I've uncovered an explosively profitable coal bed methane company that you need to know about now, while there's still time for you to invest early for profits. All these revealing details are also included for you in the free ***Crude Awakening: How to Survive the Total***

***Global Energy Crunch of 2006 report.***

But before you send for the report, I want you to think about this...

Unlike most of today's big oil deposits, coal beds are huge and flat. They also sit very close to the surface. And virtually ALL coal beds also contain methane gas.

Methane, propane and butane ARE the main gasses in natural gas. And with natural gas demand exploding... new **coal bed methane** technology will give ENORMOUS new opportunities to smart investors!

Just like in the old days of easy Texas oil wells, the fact that most coal beds sit close to the surface means gas developers do NOT have to drop deep drills to get at the gas. It's right there, within easy reach. Which makes it very cheap to get out of the ground.

That's not all. There aren't many exploration costs, either, because most of the coal beds in the United States and Canada have already been discovered. So all that's left now are the costs of processing and recovery.

Low costs, ample supply and the sudden new technology make this an incredible opportunity for you to invest in the coal bed methane breakthroughs already hitting the market as you read this special report!

**The Biggest Methane  
Moneymaking Opportunity  
of the Next 20 Years**

One of the best-positioned coal bed methane companies ready to take advantage of this used to be an outfit operating out of Colorado.

I say "used to be" because this little company just got swallowed up. Bought out for more than \$700 million.

The buyer was an even more impressive and much more profitable Canadian oil company. They bought this smaller outfit lock, stock and barrel. And now this new company is ready to make you and anybody else who invests a whole lot of money on the coal bed methane craze that's coming.

It was a brilliant move that helped this important oil company reverse a decline in their own natural gas reserves. Especially since this same mother company plans to keep on buying resource-rich U.S. companies in the same Colorado region.

In an early morning conference call, this parent company's owner told me, "We see this as a footprint in an area with a lot of growth potential."

By buying this smaller company, the parent company not only gets the Colorado coal deposits and the fields of natural methane gas... but they also get INSTANT expertise in coal bed methane, because all of the bought company's experts have stayed on board!

The new company's senior vice president says, "The human assets are as an important a part of this transaction as the physical assets."

That's a huge edge in what amounts to one of the most exciting

new fields in the energy market. Plus, the Canadian company gets the benefit of U.S. government funding, something they can't qualify for by doing business north of the border alone.

**This takeover company also has a foothold in the breaking "oil sands" market, conventional natural gas and oil and energy refining.** So the new purchase barely puts a dent in their debt-to-equity ratio, which is a healthy and conservative 30%.

I'm urging my ***Outstanding Investments*** readers to grab shares of this major energy company and its new stake in coal bed methane. I urge you to get invested too. This stock will be a HUGE moneymaker when coal bed methane production kicks into gear!

Like I said, you can get all the details in your FREE copy of my new ***Crude Awakening: How to Survive the Total Global Energy Crunch of 2006 report.***

And then you can discover even more incredible energy market moneymakers in the rest of the SIX FREE reports in the **PEAK-OIL PROTECTION LIBRARY**, *which reveals nearly a dozen other stocks certain to boom during the monumental thrust for new energy in the months and years ahead!*

## **The Secret to 668% Gains in as Little as 11 Months**

The money you'll make on the two investments in the free ***Crude Awakening: How to Survive the Total Global Energy Crunch of 2006*** is just the beginning.

My ***Outstanding Investments*** readers pile up gigantic gains like these over and over again... including gains like the **137% we just clocked on KeyWest Energy...** plus another **162% on Intrepid Minerals...**

In issues of the ***Outstanding Investments*** monthly newsletter... and in the regular e-mail alerts we send to subscribers... investors have learned how to haul in **87% gains on Fox Energy... 332% gains on Glamis Gold... and 151% gains on Wheaton River Minerals...**

We socked away **158% gains on Tocqueville Gold... 194% gains on American Century Global... and 114% gains on Newmont Mining...**

***Outstanding Investments*** has a simple approach to making money.

My readers and I believe that there is a fortune to be made in real, tangible assets. I'm talking about the very stuff that civilization is built upon !

*Oil and gas, precious metals, mineral, and steel. Silver, gold, even wheat and soybeans...*

In up markets and down, we've proven that moneymaking approach over and over again!

For instance, we also just logged a **199% gain investing in heating oil... we picked up another 174% gain investing in wheat... 125% gains in coffee... and another 304% gain on investments in the future of soybeans...**

With the population exploding, economies diversifying and countries like China and India stepping up to the plate 1 billion customers strong... *there has never been a better time in the history of markets to make your fortune on real resource investments!*

**166% gains on Coeur d'Alene Mines... 104% on Harmony Gold... 118% on Cameco Corp... and 114% on Anglo American PLC...**

Then there's the money my readers had the chance to make on **Metallica Resources**. We saw investors piling into gold back in 2001 -- and now saw it was time to make our move!

We spotted tiny Metallica and recommended it in February of that year. **By January 2002, we told readers to take profits... anybody who did walked away with INCREDIBLE gains of 668%... in just 11 months!**

The good news in all of this is that this amazing boom across the resource market is just getting started. There are literally MILLIONS OF DOLLARS IN INVESTMENT PROFITS out there in resources just waiting to be made!

The good news is that as one of my ***Outstanding Investment*** subscribers, you can be there early to make those kinds of enormous returns. It's as simple as getting into the right investments at the right time.

I can help you do both. And I'd like to invite you to get started risk-free as immediately as possible. Let me start by rushing you a FREE copy of ***Crude Awakening: How to Survive the Total Global Energy Crunch of 2006...*** plus the rest of the SIX FREE reports in my new **PEAK-OIL PROTECTION LIBRARY**.

Of course, I'm hoping this will just be the beginning of a *long run* of serious investing successes for both of us...

## It's Your Turn to Make These Kinds of Massive Gains

Besides the huge gains you make investing in *liquid natural gas*... the gains from coal bed methane companies... and the huge returns I expect you to make in dozens of other energy-related opportunities in the months ahead...

I also expect you to make a fortune, along with the rest of my ***Outstanding Investments*** readers... from silver, gold and other commodity investments... from undiscovered mining shares... and explosive opportunities in shipping, resource service companies and a lot more...

This is a vital moment in market history.

I've got many MORE incredible opportunities lined up.

And I would hate for you to miss them.

Companies few other investors know anything about... companies ready to break away from the mainstream and surge toward huge profits for investors... companies completely free from the dangers that weigh down conventional, better-known Wall Street stocks...

You can discover many of them almost instantly, just by sending for the SIX exclusive reports you'll discover FREE in the **PEAK-OIL PROTECTION LIBRARY** I hope to send you.

Now, I can't promise you profits. Like any investments, there are risks and past performance is no guarantee of future profits. Losses do occur...

But let me do something else for you, too.

Let me sign you up for a risk-free trial offer for my monthly investment advisory letter, ***Outstanding Investments***. For the first 90 days, it can also be free. Because you don't pay anything if you're not 100% satisfied it will make you money.

You don't risk anything by giving it a try. Decide you don't like it and you'll get a complete refund on your modest subscription price... *but you'll get to keep all of the FREE reports you receive in your* **PEAK-OIL PROTECTION LIBRARY**.

No questions asked. Sound fair?

I hope so. Because this is a once-in-a-lifetime moment that lies ahead. It's a once-in-a-lifetime opportunity for investors to make their fortunes. And I'm seriously hoping you won't pass this opportunity up.

Especially not now. If I'm right about the fate of world oil, you can just imagine what else could happen as this crisis unfolds...

-- **A coming 50% global shortfall in energy supplies:** After "E-Day," the GAP between rising energy demand and plummeting energy supplies will just get wider. At today's rates, it will grow by at least 5% per year. **That means that within a decade, we could face a shortfall in available energy by as much as 50%!** That means serious consequences. It also means a mad scramble for

the kinds of energy-focused stocks I'll discover for you in issues of ***Outstanding Investments***.

**-- OPEC will try to SEIZE all the purse strings:** As country after country peaks out in energy production, OPEC will certainly look like the "last man standing." Suddenly, they'll have all the cheap, exportable oil reserves. But don't make the mistake of thinking OPEC is the only game in town. *In fact, I can show you a half-dozen EXTREMELY LUCRATIVE energy investments that most of the world hasn't even heard of yet. But they will, absolutely. It's only a matter of time!*

**-- Expect many more brownouts and blackouts:** America's aging power grid is already in trouble. What happens after "E-Day" when the grid doesn't have enough cheap juice to meet demand? Simple. It crashes. *Expect many more brownouts and blackouts in the months ahead, just like in L.A. and New York City during hot summers! But expect to make a FORTUNE on the energy companies that will help America stock and rebuild that grid.*

**-- Brace yourself for the new cold war between the United States and Russia:** In the war on terror, the United States planted an incredible 19 new bases around the oil-rich regions of the Caspian Sea, just north of Afghanistan. The bases are permanent; we're not budging. But Russia also wants free access to those reserves. The days of soldiers glaring across fences are *back!*

**-- Get ready for a new "hot" war with China:** Even with oil prices skyrocketing, we'll still need our cars and our refrigerators and our electricity. But so will China, India and the rest of Asia. And they're willing to fight for that right. Japan and China are already squaring off over oil rights deep in the South China Sea. Taiwan, Indonesia

and others will follow. America can't sit this one out. What happens if we find ourselves in the thick of it? *War means even more pressure on oil and other resources!*

**-- We're looking at oil as high as \$150 per barrel. Others say closer to \$190:** Imagine paying \$7 or \$8 for a gallon of gas. Then double that to nearly \$15! In hyperinflation, every hard asset that isn't nailed down gets snapped up. Prices on everything skyrocket. And the dollar falls apart. The only way to protect your money and your future is to transfer wealth into the real resources that will become so rare in the crisis ahead.

Remember how it was in the 1970s? Nobody was ready for the OPEC crisis. Even gas station owners couldn't imagine gas selling for over 25 cents a gallon. When prices shot over \$1, *the station owners had to tape a "\$1" card in front of the panel that registered prices!*

I don't want you to get caught unprepared.

Even more important, I want to make absolutely sure you're ready to make the gains the rest of my ***Outstanding Investments*** readers plan to pile up as the "E-Day" crisis ahead unfolds.

**Give me permission to me send you your first issue of *Outstanding Investments*, risk free.** All you need do is click on the **"Subscribe Now"** button below. The moment I hear from you, I'll rush you your first issue and the SIX FREE reports in your complimentary **PEAK-OIL PROTECTION LIBRARY**, including ***Crude Awakening: How to Survive the Total Global Energy Crunch of 2006.***

You can try all of it very easily. And very soon. Absolutely risk-free.

But there's more.

**Besides your trial issues of my *Outstanding Investments* monthly letter... and the FREE SIX reports... you'll ALSO get:**

**FREE Personal Weekly Investment Updates, via E-Mail:** If you're online, you're going to love this because... besides sending you the monthly *Outstanding Investments* issues... I'll also send you weekly updates on the stocks we're watching, on our portfolio and on new opportunities that just can't wait until the next issue. **This is a \$950 value, but it's yours FREE!**

**FREE Unlimited Calls to My 24-Hour Investment Hotline:** I will immediately send you a telephone number for my special investment hotline. This is only for *Outstanding Investments* subscribers. You can call this number anytime you like and as often as you like. There's no catch. It's just an excellent way for you to stay up to the minute on everything inside the *Outstanding Investments* core portfolio. **This is a \$549 value, but it's yours FREE!**

**FREE Private Access to My Members-Only Web site:** Whenever you want, look up past recommendations... log on for new articles, breaking stories and valuable updates... check the portfolio or share secrets with fellow readers... it's anonymous, private and available to you around the clock. **This is a \$259 value, but it's yours FREE!**

**FREE Subscription to The Daily Reckoning:** If you don't have

this or know about it yet, get ready. New York Times best-selling financial author Bill Bonner might not always tell you what you want to hear. He might not always agree with the mainstream nabobs of the marketplace. But nearly 400,000 readers around the world agree... *This is one of the most valuable daily sources of information for investors, online or off.* **And it's yours FREE, just for trying *Outstanding Investments*!**

**And, of course, your FREE PEAK-OIL PROTECTION LIBRARY:** I'll also rush up to SIX FREE reports in the special library of valuable opportunities I've been telling you about. You'll get well over a dozen specific moneymaking investment ideas inside these reports that you can act on immediately, just by making a simple phone call to your broker. **This FREE library is worth at least \$240, but it's yours FREE!**

That's hundreds of dollars worth of "extras" you'll get... FREE! Just for accepting my risk-free invitation to try ***Outstanding Investments***.

And remember...

Should you decide ***Outstanding Investments*** isn't for you for ANY REASON... you can just cancel. You'll still get to keep everything I've sent you. PLUS I'll also send you a check to repay every cent of the subscription on the issues you've already tried. No questions asked! You have a full 90 days to make up your mind. And you keep everything regardless!

**This Is My Chance to Put My  
Money Where My Mouth Is!**

I'm sure you know you could pay a lot for this kind of information elsewhere...

In some circles, as much as \$5,000 or more. I know people who have paid as much as \$100,000 per year just to get this kind of dedicated, thorough investment attention.

But ***Outstanding Investments*** itself has a current subscription rate of just \$159 per year. What's more, if you agree to give ***Outstanding Investments*** a try risk-free... you can lock in a special rate of just \$99 per year.

**That's a savings of OVER 38%!**

Even better, try us for two years, and we'll slash the price even further! Normally, you'd pay \$318 to get my service for 24 months (two years). But if you're ready to try my special invitation today, I can get you that two-year subscription for just \$189. That's an incredible savings of \$129.

And remember...

**Even if you decide to cancel your *Outstanding Investments* membership, you KEEP EVERYTHING... including your FREE PEAK-OIL PROTECTION LIBRARY... and all the other moneymaking information you get from the gifts I mentioned above...**

I hope you'll hurry and give this special invitation a try. The clock is ALREADY ticking on "E-Day." Investors have a lot less time to move on this than they think!

Most people will miss out on this. A few will act now and make a fortune.

I hope you'll be in the second category. But I have to hear from you SOON.

This is your chance to get in on these golden new energy technologies... and protect your wealth from the RADICAL shakeout ahead.

Send for your FREE copy of ***Crude Awakening: How to Survive the Total Global Energy Crunch of 2006*** plus the rest of the six FREE reports in my new **PEAK-OIL PROTECTION LIBRARY**. Simply click the "**Subscribe Now**" button below and you'll quickly see what I mean. There's an enormous amount of investment money to be made. I'd hate to see you miss out.

**Let me hear from you right away!**

Sincerely,

Addison Wiggin  
Publisher, ***Outstanding Investments***

**P.S.** Here's another way for you to make 600% or more on the coming crude oil crisis... it's a shipping company that moves crude oil and other petroleum products around the world.

This company operates more than 150 tankers... and carries an enormous **10% of all the world's seaborne oil!** China's thirst for shipped oil already has this company's net income soaring! It's up

253% over last year.

But there's more to come. This company just took over one of the world's leading shippers of liquid natural gas! Yet it's still the perfect time for you to get in. You can read about this company in upcoming issues of ***Outstanding Investments***. Or find out more right away, by sending for the FREE reports in the **PEAK-OIL PROTECTION LIBRARY** I've been telling you about. The library you'll get contains up to six FREE reports...

- 1. Crude Awakening: How to Survive the Total Global Energy Crunch of 2006***
- 2. Make 500% on the Great Money Flood***
- 3. The Only 5 Stocks You'll Need in the Next 5 Years***
- 4. Two \$5 Resource Stocks That Will Take off in Uncertain Times***
- 5. Security & Profits: The Richest Oil Opportunity in America***
- 6. My No Sweat Strategy for Profiting From the Coming Oil & Gas Boom***

And if you place your order in the next 24-hours I will throw in an additional online bonus report: "***A Secret World of Wealth-Building: Grow Rich With Natural Resources***". Sign up today and I will send this special online report to the e-mail address of your choice.

The sooner you accept my no-risk invitation, the sooner I can rush you this special FREE library of SIX investing reports... plus all the other FREE investing tools I told you about above. So let me hear from you as soon as possible. **Just click below to get started!**
