

You know that Bill Gates is among the wealthiest men in the world. And has been year after year. But, did you also know that his entire fortune rests on a single investment of just \$50,000?

Oh, not in the way most people think. Sure, had he invested his \$50,000 on the day a disruptive technology called Microsoft made its IPO, he would have earned a nice return. And still be doing quite well.

But, Bill Gates wasn't simply a maven of technology. He was also a master of timing. He bought more than 5,000 shares per penny on his investment at the *private placement* stage -- long before most other investors even heard of Microsoft.

So, instead of turning his \$50,000 into a few tens of millions -- **he made \$100 *billion!***

Believe it or not, private placement opportunities to turn small investments into large -- and lasting -- fortunes are still available today. If you are in the right place. At the right time.

And that's why this is your

exclusive invitation to join those already enjoying the wealth.

Dear Investor,

In just a moment, I am going to offer you a very special invitation to become an exclusive member of America's most prestigious private placement investment forums.

As you will soon see, it is a forum where even in today's Bear market, you will soon have the rare opportunity multiply your money. Potentially, *many* times over. *Early*. And often.

And it is a highly leveraged forum -- where a mere \$10,000 investment could quickly yield a \$1,000,000 return. And an investment of a few dollars more could provide you -- and your family -- with "walk away wealth." For generations to come.

You see, at this exclusive financial forum, you will get a *first-hand, first-call* look at some of the nation's most exciting -- *and rewarding* -- early-stage opportunities. Each presented by cutting edge entrepreneurs -- who understand that when it comes to venture capital their top priority is *your* bottom line.

So, you can be up-close, personal -- *and very highly profitable* -- long before other investors are even aware the opportunities exist.

In short, at the quarterly forum I am about to invite you to join, you are on the inside. From the outset. Beating *The Street*. For pennies on the dollar.

With highly leveraged investments undefined that could soon provide you highly lucrative returns. Like these ...

Playing Monopoly in the Snow: Over 12 million snowboarders now maneuver the wintry slopes. And they spend over \$2.3 billion a year. One thing they don't *yet* spend their billions on is releasable snowboard bindings -- because, unlike those on skis, they are not *yet* mandatory. That, however, could soon change -- with legislation now pending and multiple lawsuits now in litigation.

That's why *Club* Members were so intrigued by a ground-floor company that happens to be the world's *only* producer of patented snowboard releasable bindings! When -- not *if* (according to industry experts), but *when* -- releasable bindings become mandatory, this emerging start up will have nothing short of a mammoth monopoly.

The potential profits? Multiply \$250 (the price of a pair of releasable snowboard bindings) by 12 million snowboarders -- and then project an estimated growth rate of 31% per year!

YOUR Bottom Line -- *Club investors have seen their returns rise by nearly 1/3 in less than a year (try that with Blue Chips)! And with rumors swirling of buy-out offers, now may be the time to get in quick -- before the stock takes off like an "alley oop in the halfpipe"!*

Making Money in Margaritaville: The opportunity rarely presents itself to make an early-stage investment in an already-profitable paradise island. Unless you are a Member of *The Club*. In fact, that is just what happened six short months ago, when an international partnership offered an equity position in the expansion of one of its most the prestigious developments.

Located on "*The Best Beach in the World*" (British Sunday Times), the development's club hotel is set to expand with a five-star Condominium and Spa. The partnership had already invested nearly six million dollars and was seeking only an additional million.

The return on investment: Nearly 40%, virtually overnight -- plus, of course, perks. The investment on such a return: Within three weeks of The Club presentation, the investment was fully vested!

Grace Bay is already sold out. But, the upcoming Club meeting will feature a luxury resort opportunity that could be even more lucrative and closer to home. Club Members are eagerly anticipating the details on this opportunity. And that's all the more reason for you to reserve your place at The Table now!

I'm sure you will agree, those are the types of private placement bonanzas any venture capitalist would love to sink his teeth into. They have all the essential ingredients for success: high barriers to entry ... disruptive technologies ...and the three most important ingredients of all: Timing, timing, and timing

In short, they offer the same kind of *golden* opportunities that, in little more than a decade turned \$10,000 investments in early-stage start ups like Intel, Cisco, and Microsoft into \$10 million returns!

And, let's face it, in today's market -- with its illusory investments and elusive returns -- savvy private placements are one of the shrewdest ways to true and lasting wealth. You buy up pieces of small, private ventures *before* they become public. And, then, when they hit The Street, you head for the penthouse suite.

So, if building long-term, durable wealth appeals to you, then in the next

few minutes, you are about to learn how you can still get in on these money-multiplying opportunities. And much, much more.

But, first, please allow me to introduce myself -- and *your* forum ...

Introducing The Supper Club: The Right People at the Right Place -- for the Best Deals and the Highest Returns!

My name is Karim Rahemtulla. As the Executive Director of *The Supper Club*, it is my distinct privilege to invite you to become an exclusive Member of what I guarantee you will soon discover truly is: "*America's most prestigious private placement investment forum.*"

In fact, in just a moment, I'll tell you how, as a select Member of my new Supper Club "Executive Circle," you can now join The Club for less than you would spend on the average investment advisory newsletter.

But, I'm getting ahead of myself. So, first, let me tell you why I am so absolutely convinced that *The Supper Club* is such a perfect fit for you -- and that you are such a perfect fit for *The Supper Club*.

You see, when you attend a quarterly *Supper Club* meeting, you join forces with a select group of sophisticated investors -- each of whom, like you, has achieved success in his or her own professional field of endeavor.

So, they bring to The Table not only peer value and financial savvy, but

"The Supper Club is the place to be for quality private investment opportunities. Being among a diverse set of sophisticated investors is priceless when dissecting and evaluating these opportunities."

-- Orsini and Lisa S. (Members)

also a veritable wealth of professional experience. And, their shared expertise in evaluating entrepreneurial presenters can make the difference between a missed opportunity undefined and a major return ...

- At one recent *Supper Club* meeting, the CEO of a high-tech company presented the opportunity for Members to get in on the ground floor of a new gas flow technology that could multiply the yield of computer chip production -- *and generate revenues of \$56-million, within two years*. The technology seemed esoteric, the opportunity obscure -- *until a Supper Club Member with experience in the field explained that if the company's technology increased chip production by just 1%, it could quickly dominate the \$300-million market -- very likely for years to come. Needless to say, savvy Supper Club investors quickly got on board. And the door is still open to you to get in early on what could soon yield a major return on a very minor investment!*
- The CEO of a medical industry start up presented Members with the opportunity to buy into an expanding national network of non-invasive computer imaging facilities for full-body, diagnostic scanning. The presenter was looking for a minimum \$32,000 investment -- *with a five to 10 times potential return, in just 40 to 48 months*. The offering seemed reasonable, the exit strategy looked sound. Still, there were questions about barriers to competitive entry - *until a New York cardiologist Member zeroed in on what he called "the sizzle": The company's technological edge in CT coronary angiography (CTA) has already made it the industry leader nationwide! So, that makes this the most unique of all investment opportunities: You have the chance to get in on the ground floor of an industry leader -- at private placement prices. Now, that's what I call "\$izzle"!*
- For a Canadian inventor with a disruptive new technology for dominating truck wall manufacturing (a \$2-billion market), Member reception was positive from the start. Especially after the presenter

promised full repayment of the stock purchase price out of first profits -- while the investor kept the stock. To some, however, it sounded almost too good to be true -- *until a Member who had made his fortune in transportation made a highly significant comment -- "This technology could launch a whole new industry" -- and commitment. Within two hours, Members had cornered the market on a major share of the initial offering! Could this be the next disruptive technology ... like Dell Computers -- where a \$100,000 private placement yielded \$30 million in just 12 years ... or e-Bay -- where just \$40,000 yielded \$40 million in less than a decade? I don't know. But the Canadian start up is still selling stakes for just \$10,000. So my advice to you would be: If you think there's even a chance to reap those kind of potentially prodigious returns -- "Get truckin"!*

Now, please don't get the idea that every entrepreneur fares as well as these three. You'll find that, like you, your fellow colleagues at *The Supper Club* Table didn't get to where they are in life by simply taking "yes" for an answer. Nor are they apt to spend their gold on all that glitters.

As former (and current) CEOs, CFOs, COOs, LOIs ("Living Off Investments"), lawyers, accountants, and such, they are past masters at crunching numbers. And, in many instances, their seasoned advice to startup presenters has made the critical difference between success and failure from the ground floor up.

In short, the Members of *The Supper Club* I am inviting you to join are your kind of people. Looking for your kind of profits. And working together to find the kind of lucrative private placements that turn limited risks into lasting rewards.

And, at each step of the way, you'll be more than amply aided by *The Club's* stringent "*Five-Point Screening Process*" for qualifying potential

presenters.

In fact, it was this unique *Screening Process* that helped keep *Club Members* from falling prey to the whole dot-*bomb* IPO fiasco that left so many other investors holding portfolios full of empty promises. I don't want to ride this horse into the ground, but let me put it this way: Thanks to this *Process*, I've never once offered *Supper Club Members* a dot-com that went bust. Period.

That's how incredibly effective *The Club's five-Point Screening Process* actually is -- and what it can mean to your portfolio. Here's why ...

***The Supper Club's "Five-Point Screening Process" for
Potential
Presenters Assures that Only the Best Pass the Test!***

By now, I am sure it's clear to you that with a membership as savvy and sophisticated as *The Supper Club's*, those who present their wares must be equally as serious.

Yet, other *Club* executives and I realize that our Members, perhaps not unlike yourself, simply do not have the time, or, the readily available expertise, to fully evaluate the wide variety of deals eager to come to The Table.

"The Supper Club does a remarkable job of screening potential companies and giving us only the best. The hardest part is narrowing down the choices."

-- Gary R. (Member)

That's why *The Supper Club* has set the investment community standard with its unprecedented, and unrivaled, Five-Point Screening Process.

Once you see it, I believe you will fully understand why only the best past the test. And you will also understand why the *Supper Club's* exclusive

imprimatur has become the trusted hallmark of serious opportunities with significant returns.

To me, in fact, it is what separates *The Supper Club* from any other investment forum in America today. Allow me to explain:

1. The Supper Club draws upon the resources of top analysts worldwide to narrow the field of private placement presenters.

As an affiliate of the Agora Financial Group, *The Supper Club* has key contacts in virtually every country around the world. They range from investment bankers to M&A experts to the top personnel of some of the world's leading brokerage houses.

Particularly in the age of the Internet, the *Club's* communications with these key contacts traverses the globe 24/7/365. When one of these advisors makes a recommendation for an early stage applicant, *The Supper Club* knows it can hand you a potential winner.

- ***Case History in Brief:*** Recently, one overseas investment advisor informed *Supper Club* executives of a new ground-floor product he said, "Could revolutionize an industry like plastic did." *Supper Club* screeners recommended a presentation. *Supper Club* Members liked what they saw, committed over \$500,000 in one afternoon. Note to you: From all appearances, this opportunity defines the meaning of a "transformational technology." Could it be the kind of earth-shaking private placement that helped a young man named Bill Gates turn a \$50,000 investment into a \$100 billion return? That's your decision. Call now, and we'll put you in direct contact with the principals.

2. The Supper Club's own staff of financial experts -- in the office and out in the field -- carefully reviews every applicant's dossier.

The Supper Club's staff makes certain that each presenting company has a viable business plan ... that each has room to expand into a lucrative market ... that each principal has a track record of integrity and is readily available for Member inquiries ... and that each company has a clear, credible -- and highly profitable --early exit plan.

3. The Supper Club's wide ranging contacts throughout the industrial infrastructure enable it to secure in depth, expert advice on even the most obscure products and services.

The Club staff has a philosophy that says, No one is an authority on everything -- but someone is an authority on every thing. And, since some of the most promising investment opportunities come from the most unusual sources, the key is finding the right authoritative "someone" to review even the most esoteric product or service.

- ***Case in Point:*** *Remember what I told you about the "gas flow technology"? Sometimes, it turns out that, as in this case, the authoritative "someone" was sitting right at The Supper Club Table. In fact, in the not too distant future, it could be you!*

4. As The Supper Club's Executive Director, I personally interview each and every applicant before he or she is invited to make a presentation.

Frankly, I am not terribly comfortable elaborating on this particular point.

So, please allow me simply to say that I have been dubbed a "Market Maven" by CNBC. I am the editor of one of Agora's most influential investment newsletters. And my rather extensive travels have enabled me to amass one of the financial world's most impressive Rolodexes -- providing me and my associates valuable high-level contacts to help you and other Members assess the finest private placement opportunities.

I would like for that to suffice for now, but my colleagues tell me it's not fair for me to ask you just to take my word for it. So ...

"I am truly impressed with the quality of Karim and how he manages The Supper Club. His approach allows you to uncover deals that you might never be able to acquire on your own." -- Linda S. (Member)

"Karim and company are very professional and exceptionally well informed." -- David C. (Member)

5. The Supper Club Members, themselves, serve as the ultimate safeguard, assuring that every presenter is qualified, capable, and well-informed.

I alluded to this earlier, so I won't ride it into the ground. At the beginning of every *Supper Club* forum, I remind the Members that it is *their* money they are going to invest -- or not. And, that the personal trust factor has to be a key element in their final decision.

"As you watch the presenters," I always make it a point to advise, "always ask yourself, 'Are the key personnel -- those guys up front talking to you -- there to make money for the company, or from the company?'"

I think that's important. And it is something that only you can decide for yourself. That's why, as I have already mentioned, *The Supper Club* is up close, and personal. It's hands on. And heads up. Because, it's your money. And the more you know ... well, the more you make!

- ***Case History in Brief:*** *At one recent meeting, a Charter Member made a saving "catch": Buried within an unapproved, last-minute,*

business plan addendum was a short paragraph stating that if the company proved profitable, it could buy back its stock for 5% above the purchase price. End of game. No hits. No runs. One major error. No investors left on base. In this case, a penny saved was a penny earned -- for you to use on other more lucrative investment opportunities!

With a selection process that air tight and fool proof, I think you'll agree it's little wonder that *The Supper Club* has built a sterling reputation for offering only the highest quality private placement investment opportunities.

In fact, with your permission, I would like to briefly share with you some revealing excerpts from a letter written by one of those high quality investment opportunities to *Club* Members who had just attended his presentation (As you can understand, I have taken out the company name to protect confidentiality.)

Just take a quick look at this letter, and see if this isn't the kind of company -- and top executives -- you feel you could count on to help multiply *your* money ...

***An Actual Letter to Supper Club Members
from a Recent Supper Club Presenter --
The Proof is in YOUR Profits!***

Dear Supper Club Member,

*We have had an excellent year, (revenues have
nearly doubled this year from last year to an*

estimated \$7 million, with approximately \$300,000 in net profits), and our funding needs at this valuation are now significantly reduced.

Further, the October, 2002 issue of INC. Magazine named us the 217th (up from 345th a year ago!) fastest growing private company in America based on a 1997 -- 2001 growth of 1011%! (In fact, the growth for years 1998 --2002 is approximately 1,700%.)

Other companies that made INC. Magazine's list of the top 500 fastest growing companies in the past were Microsoft, Oracle, and Charles Schwab, just to name a few.

By the way, the results of the clinical study with our [Product Name] for treating macular degeneration are being compiled by the Veteran's Administration for submission to The Journal of the American Medical Association. That is one of the most widely read medical journals in the world. There was significant improvement in vision for patients with macular degeneration ... the #1 reason people lose their sight in the world.

When you compare investment opportunities, consider the fundamentals: Is the company profitable? What is their 5-year revenue growth track record? Do they have clinical proven

products on the market? And, finally, do they have a reasonable upside potential or greater in the future?

I think you will find we pass the test hands down!

Sincerely,

Larry Alexander

Now, I think you will agree that this is the type of letter -- and company track record -- any serious investor would like to see on a daily basis. Especially when you realize that this company is not burning one single cent of invested funds. Which means that every penny you invest will go straight to their profits -- *and your returns!*

But, before you reach for your checkbook, let me sweeten the pot even more.

One of the aspects that make this company such a uniquely attractive investment at this point in time is that it actually projects real -- *and growing* -- profits from Internet operations. That's right, this company has not only survived the "dot.bomb" -- it has prospered.

So have its investors. *And now, so, can you!*

In fact, it is growing revenues at exponential rates (1011% from 1997 to 2001). And that's not surprising, when you consider they get between 3,000 and 5,000 individual Web visitors a day -- and have more than 1 million in all.

Imagine ... A New Multi-Billion Dollar Industry -- With You in on the Ground Floor!

Right now, this company is developing a unique new line of nutraceuticals addressing such major, widespread health problems as arthritis, macular degeneration, and cardiovascular disease. Their goal is to duplicate the multi-billion dollar pharmaceutical business model using advanced, science-based -- all natural --nutritional products. In short, just what the "Baby Boomers" now want!

Their target market is the 71% of Americans who have used a vitamin, mineral, or herbal product -- within the past three months alone. Not a bad client base! In fact, consumers spend \$120 billion annually on pharmaceuticals -- and this company has positioned itself as the leader in the industry.

Let me put the profit potential of this company into perspective for you: The macular degeneration product the CEO mentioned in his letter already has been granted a full patent and trademark by the US Patent and Trademark Office (How's that for a high barrier to entry?) And, if this product is able to penetrate just 1% of the market -- it will achieve \$70 million a year in sales!

Does that sound like your kind of profits? Then I wish you could have been at our meeting to hear this presentation for yourself. But, I'll tell you what -
- *the minute you become a Member, I will personally put you in touch with the CEO, so you can decide for yourself how much of the early action you want in on.*

The fact is, at meeting after meeting, year after year -- with one highly qualified private placement opportunity after another -- it is not surprising that *The Supper Club* continues to get ringing endorsements from its

satisfied Members.

Let me share just a few with you -- so that you can see for yourself why *The Supper Club* has become the serious investor's forum of choice ...

The Supper Club Can Help Put Money in Members' Pockets -

-

But, it Won't Put Words in Their Mouths. So, Here's Some Serious Advice You Can Bank On!

The fact is, *The Club's* remarkable track record of Member satisfaction speaks volumes. But, the truth is, it doesn't have to ... because the satisfied Members prefer to speak for themselves:

"Anyone interested in investing, and who has done their homework by reading Agora affiliated newsletters such as Strategic Investment and Daily Reckoning is now ready for the next step -- attending a Supper Club meeting."

-- Aubrey S. (Member)

"I find The Supper Club to be potentially the most valuable and profitable service I have. The quality of the Members, the presentations, and the opportunities are excellent."

-- Tim A. (Member)

"The quality of the presentations was very good. I enjoyed, in

particular, the 'Members Only' discussions and the ability to informally discuss opportunities with fellow Members."

-- Scott B. (Member)

"The Supper Club approach allows you to uncover remarkable deals that you might not be able to uncover on your own. For \$5,000, an unbelievable bargain!"

-- Linda S. (Member)

"Awesome. The Supper Club is one of those rare organizations that delivers what is promised ... and even more! I was skeptical that a group would find unique investment opportunities and present all the facts, good and bad, and be 100% objective. I would recommend The Supper Club to everyone who is looking for places to invest that won't subject you to the con game called the stock market!"

-- Jeff P. (Member)

I think you will agree, that is peer approval at its most appealing -- and most profitable. But, even so, it is just part of *The Supper Club's* entirely unique *"Peer Value Advantage."*

Allow me to explain ...

Peer Value: Why Supper Club Membership is Limited to A Select Group of Serious Investors

With accolades like those (not to mention

the opportunity for million-dollar returns on thousand-dollar investments -- and a full retinue of expert advisors 24/7/365), I know you can see why I'm so convinced this forum was made with you in mind. It's that good.

But, by this time, I also know you might also be wondering 'what's the catch' and waiting for the other shoe to drop. Well, there is no catch undefined but there is a caveat. And, I want to share it with you now.

"The Supper Club is a great way to investigate potentially great opportunities. And, one of the key points is the ability to network with other Accredited Investors who have a wide range of valuable expertise."

-- Bob G. (Member)

You may have noticed that from the outset of this letter, I have said that *The Supper Club* offers you an "exclusive" investment opportunity. Well, here's why -- and what it means to *you* ...

First, as I'm sure you know, *The Supper Club* accepts only Accredited Investors.

It's an SEC regulation -- one that even we, as Free Market economists -- can essentially support. You see, while the SEC realizes that, especially in today's volatile market, private placements can provide a very promising -- and remarkably rapid -- road to wealth, there is also a certain degree of risk involved that the average investor may not be quite sophisticated, or solvent, enough to fully absorb.

That's why, when you join *The Supper Club*, you know you are in the select company of other Accredited Investors like yourself who have an annual income of at least \$200,000 or a net worth of at least \$1 million.

Secondly, at each meeting, *Club* Members make key decisions that can, quite literally, turn thousand dollar investments into million dollar returns. Many times over. Virtually overnight.

Often, as I mentioned earlier, these decisions involve relatively obscure disruptive technologies, with sky-high barriers to entry. Like those that launched Microsoft, Intel, or -- bringing the opportunities closer to home -- the snowboard binding and truck bedding breakthroughs I mentioned to you to earlier.

When that happens, *Club* Members need to know that they are in the company of seasoned, successful professionals -- established experts in their fields, who know how to gauge the lay of the land before they play their hand.

That's one of the reasons you are being invited to take your place at *The Supper Club*. In short, for what you bring to The Table -- as well as what you are very likely to take away.

And finally, you need to know that from its inception, *The Supper Club* has been intended to serve the exclusive needs of a select few serious investors.

For you, this means having the opportunity to take a hands-on approach with the top personnel of presenting companies. For us, it means providing you with a uniquely broad package of benefits -- tailored and targeted to your specific needs.

And for everyone involved, it means that as an exclusive Member of *The Supper Club*, you are guaranteed that there will never be a dilution of top quality investment opportunities, expert analysis, and around-the-clock personal service.

In fact, that's why my Director of Membership, Vickie Beard (trust me, that's a name you will soon get to know -- and like) is at *your* beck and call. She keeps her finger on the pulse and her ears to the phone to make sure that we not only meet -- *but anticipate* -- your every need. That's a promise.

So, what are you waiting on? If it's an *Executive Invitation* ... please consider it done!

***Come and Enjoy Your First Supper Club Forum --
Then Make Your Final Decision!***

The regular annual fee for *Supper Club* membership is \$5,000. Not inexpensive, but certainly not exorbitant for membership in a club that offers you the opportunity to make millions of dollars. Potentially many times over. In exclusive early stage investments. (Remember Bill Gates turned his \$50,000 into \$100 billion!!!)

Now, I'm sure you would agree that *The Supper Club* annual fee would be a bargain at twice the price. Especially when you realize it covers in full your annual membership dues and your participation in quarterly *Club* meetings at some of the world's top-rated resort hotels.

"I attended the meeting as a prospective Member. I was so impressed by the quality of the companies presented, the organization of the meeting, and the collective knowledge of the Members that I joined as a new Member before the meeting was over. Not to have done so would have been a lost opportunity."

-- John J. (Member)

Plus, it entitles you to all *Supper Club* communications, special briefings, and quarterly forum presentations -- for the next 12 months. And it covers

your free video presentations of each quarterly forum.

But, of course, I don't want you to pay twice the price. In fact, I don't even want you to pay the full price. And that's why I have prevailed upon my colleagues to give you the very first *Executive Circle* introductory discount *The Supper Club* has ever offered.

I know you are going to be excited by this ...

***Join The Supper Club Now -- And Take Advantage of the First-Ever
Executive Circle 75% Membership Discount!***

Join now -- in response to my exclusive *Executive Circle Invitation* -- and I will personally reserve your place at *The Supper Club* Table not for \$5,000, not for \$3,000, or even for \$2,000 -- but for a special introductory price of just \$1,250. *That's a full 75% off the usual up-front membership fee!*

It's part of *The Club's* Easy Pay Quarterly Billing Option Plan. It's designed to let you pay as you go -- *and watch your investments grow!* That's how confident we are in our presentations -- *and your profits! (and you can do it all online -- see below!)*

That means you can now take part in the next quarterly forum ... meet the Members ... enjoy the amenities the top-rated hotel resorts -- and evaluate presentations from four to five of *The Club's* executive-level private placement presenters -- *at the lowest price ever offered!*

Plus, that low introductory fee also includes the full *Club Personal Service Package*: The insiders' communiqués, the presentation commentaries and videos, the executive critiques, and your Members Only access to *The*

Supper Club Website 24/7/365.

And, it assures that if you ever miss a *Supper Club* meeting, you will be rushed a full set of video tapes covering each and every presentation ... the Member/Presenter Q&As ... and the highly valued, no-holds-barred Members Only private sessions. So, you may miss out on a meeting -- *but you won't miss out on the chance to multiply your money!*

And, remember, *The Supper Club* charges no administrative or management fees. Nor, like other investment houses, does it take a percentage of the money you invest in presenting companies. *So, a full 100% of your investment goes into your own portfolio!*

Now, that is absolutely the most enticing offer *The Supper Club* has ever made. (Consider it a perk for having a new friend in a high place!) And yet, there is still one more benefit that can soon be yours, just for acting now ...

**Join Now, Just in Time for The Supper Club's
"Winter Wealth Forum"
At the beautiful Bahamas Atlantis Resort!**

Join now -- in response to this first-ever *Executive Circle* Introductory Offer -- and you will get in under the deadline (and the sun!) for *The Club's* exciting 1st Quarter, 2003 meeting at the Bahamas beautiful Atlantis Resort Hotel.

My executive staff and I have already selected three of the four top presenters. And I can assure you that each of them could provide you an entirely unique opportunity to multiply your money. Early. And Often.

Plus, I guarantee that what you see at *The Supper Club* Table will change irrevocably the standards you set for the growth of your money. Once you

join the sophisticated investors who comprise this forum, you will return home knowing beyond doubt that you have become an important part of something extraordinary.

I guarantee it.

So, I urge you, don't delay one more moment. Call Vickie Beard, now (410) 454-0463 or simply click below to join online today and take advantage of this special *Introductory Offer* of 75% off the usual *Supper Club* annual fee.

Sign up -- *and get ready to cash in* -- now on some of the most exciting private placement opportunities you will ever be offered.

See you in the sun!

Very truly yours,

Karim Rahemulla,
Executive Director
The Supper Club
