"You Can Invest as Little as \$200 and See This Figure Multiplied 8 Times in Less Than a Week. In This Report, I'm Revealing Wall Street's Greatest Secret --Scientifically-Selected Penny Stocks"

Dear Fellow Investor:

You can start earning money NOW -- without even relying on what the stock market does. How? By discovering little-known, explosively profitable penny stocks that don't depend on a recovery to go up. Some of these penny stocks offer you the opportunity to make such substantial profits so quickly, we call them One-Day Wonders. Look at these profits...

- DA Consulting -- 121% gain going from 28 cents to 62 cents in 24 hours
- NeoMedia rose from 23 cents to 41 cents -- up 78% -- in five hours
- Pacific Magtron -- up 52% in a few hours
- Smith Micro Software increased from \$1.75 to \$6.50-- up 271% in 48 hours
- Kentucky Electric Steel soared from 57 cents to 99 cents up 74% in eight hours
- K-Tel International rose from \$6.88 to \$32.62 in a few days -- that's a gain of 374%

In this Special Advisory, you'll discover exactly how we do this, how much money you could make, the kind of companies we are actively buying, what we look for and how we identify them before

they make their major moves.

Almost No One Knows About These Quietly Booming
Stocks -Invest as Little as \$200 -- Start Putting Profits

in Your Portfolio -- Quickly

I urge you to join the thousands of investors across America who are finally discovering the spectacular profits to be earned by investing in scientifically selected penny stocks. These remarkable investments are rapidly growing, profitable enterprises with indemand goods and services.

They are not creations of fictitious accounting, sleazy insiders or rip-off artist CEOs. Quite the contrary. Above all, they are *totally unknown* to your average investor. In the next few minutes, you could discover how to quickly put your portfolio in positive territory. You can get up to 6 FREE bonuses just for taking a norisk look. Thanks.

James Bon

Multiply Your Money 2, 3 or 4 Times Over in Weeks... Even Days

I've just found 4 <u>NEW</u> One-Day Wonder Stocks that have to make you a 100% profit in the next 4 months or everything I send you is FREE. They're in a FREE Report called *Overnight Riches: 4 Scientifically Selected One-Day Wonders.*

by James Boric,

America's Leading One-Day Wonder Expert

Dear Reader:

One-Day Wonder stocks could be the miracle cure your portfolio needs right now. What's so amazing about these scientifically selected stocks is not only the amount of money you could make with them, but how quickly you can make it. Sometimes you could literally double your money within 24 hours. And this is NO theory...

Listen to what Peter Lynch, one of the world's greatest moneymaking experts, has to say. Under his brilliant leadership, the Fidelity Magellan Fund turned \$1,000 into \$28,125. *Time* magazine called him "the nation's #1 money manager." Listen to what this internationally respected expert quietly reveals about which stocks make you the most money:

"The star performers on Wall Street come straight from nowhere. Most of them never got into the Fortune 500. A few are even unknown to me today... great growth companies come in endless varieties... investors who put blinders on are missing out on great deals..."

This is precisely our strategy. We look for safe, solid stocks Wall Street completely ignores -- until they come soaring up in price, making early investors 15 times their money. These stocks aren't affected by accounting scandals, illegal insider trading, phony brokerage reports or incompetent brokers who pad their

My Little-Known One-Day Wonders Can Return Your Losses in LESS Than a Week. I Call Them Wall Street's "Greatest Secret"

The most important

own pockets and don't know what they're talking about.

You can't rely on Wall Street anymore -- and I DON'T. In fact, it's small companies that are going to change the shape of Wall Street altogether. Because they aren't rife with hidden accounting problems and greedy CEOs. They're simple-to-understand enterprises that are honestly making money for their investors.

We've Put a Hugely Profitable Twist on This Strategy... We've Found an "Invisible" Penny Stock Market That's Quietly Piling up Profits

Not only do we find promising enterprises but we also closely monitor them to know when their business strategy is about to deliver on its promise. In other words, the stock is on the verge of lifting off within a week or less -- most often in 24 to 48 hours. These actual gains testify to the effectiveness of our approach. Imagine making 121% in a day with DA Consulting. Or 78% in

Characteristic of One-Day
Wonders is this: They have
NOTHING to do with the broad
market or the daily accounting
and insider scandals that
unfold on TV. These are
independent companies with
growing product lines, clean
books, able management and
robust profits that come from
selling in-demand goods, not
phony acquisitions.

My One-Day Wonders Are Little-Known Stocks NOT On The S&P. They're Hugely Profitable Because They're Almost Invisible

They go up in price because of an important development within the company such as a major new agreement, record sales for a division or winning a big contract. All good reasons for a stock to shoot up. And the fact that they can do this in 48 hours is critically important to your prosperity. five hours with NeoMedia. How about a spectacular 572% in 72 hours with Transnational Financial Network? Then there's 271% in 48 hours with Smith Micro Software.

I'm talking about a true "invisible" stock market where gains of this magnitude are possible and common. I say "invisible" because the average investor doesn't realize that these stocks exist. Instead. they're trapped in big-name, big-cap stocks that offer endless broken promises and losses that melt your money away. I say enough is enough. You don't have to be a victim of all this corporate greed, crooked CEOs and accounting black eyes. We're certainly not. We're making money for our readers right now.

You Could Get Back a Big Chunk of Money in One Week or Less...

Over time, common stocks have historically returned in the vicinity of 12%. So to get back a 50% loss, if you earned 12% a year, you'd have to wait over four years. But remember, the market hasn't gone up 12% a year -- quite the contrary. We've had periods in the past where the markets returned little or nothing for almost 10 years. If you invest in just two One-Day Wonders that each double your money, let's say within a month, you'd get back your 50% loss literally within two weeks.

My Promise: You'll Make at Least 100% in the Next 4 Months -- Or Everything I Send You Is FREE. My System WORKS and I'll PROVE It to You NOW

I've just finished a new report, *Overnight Riches: 4 Scientifically Selected One-Day Wonders*, that tells you all you need to know about four spectacular new One-Day Wonder stocks my CXS Scientific Stock System has pinpointed. And I'll send it to you free. I must

emphasize my offer to you because no one else in America matches it. You must make at least 100% on your money within four months on these four stocks -- or everything I've sent you costs you NOTHING.

That's right, not a cent. Have I gone off the deep end? No, I'm just supremely confident about my stock selection system that I'll tell you about in the next few pages. I'm totally convinced that this system can lead you to spectacular profits -- quickly repairing the damage the market has done to your portfolio.

The profits you'll read about were NOT a result of luck -- there are too many consistent gainers for that. They weren't a result of a rising market -- no one has to tell you that. And they certainly weren't influenced by the daily ups and downs of the market.

Consider these extraordinary profits... and look how quickly they were earned. That's the key point. They're real-life One-Day Wonders.

Invest \$5,000 Monday -- Have up to \$23,700 by Friday... Gains So Huge, So Fast -- They're Simply Beyond Your Imagination

These profits were made in less than a week in a stock market that was either flat or going down. They're virtually unknown on Wall Street -- and that's great news!

572% Gain in Three Days -- Transnational Financial Network: This mortgage banker's share price soared from \$0.29 to \$1.95 in just three short days. Imagine putting in \$5,000 on Monday and taking home \$33,600 before the end of the week.

271% in 48 Hours -- Smith Micro Software: This stock closed at \$1.75. The next day things heated up, and finally two days later it closed at \$6.50... 271% in just two days.

151% Gain in Five Days -- Ableauctions.com Inc.: This Internet auctioneer quietly skyrocketed. In just five days, you could have more than doubled your money!

131% in Just 24 Hours -- AirNet Communications: You could have more than doubled your money when this communications company announced an improvement in its second quarter revenues. After that news, the company's share price shot up from \$0.58 to \$1.34 in just one day.

374% in Less Than a Week -- K-Tel International: \$6.88 turned into \$32.62 in less than a week when they announced a new method of distributing their products. Those who watched and monitored this situation in detail were handed an incredible 374% profit.

72% Gains Overnight -- AMERCO:

When this holding company for U-Haul and Oxford Life Insurance proved that rumors about the company were unfounded, share prices jumped 72% overnight. Loyal investors could have turned \$5,000 into \$8,600 in just a few hours!

121% Gain in Less Than a Day -- DA Consulting Group: This stock

When People Hear of Gains of 125% to 550% in 48 Hours, They Think It's Some Crazy Speculation. Absolutely Not

-- Here's Why...

Gains of this size are always equated with senseless risky

went from 28 cents to 62 cents on Jan. 15. That's a 121% gain in just one day.

Banking 78% in a Few Hours -- NeoMedia Technologies: It went from 23 cents to 41 cents the next day -- a gain of 78% in just hours.

Earning 74% in an Afternoon -- Kentucky Electric Steel: It went from 57 cents to 99 cents in just one day.

What Makes These Stocks Go up So Quickly? And How Do We Find Them Just Before They Soar? Answer: Our Scientific CXS Stock Selection System

Here's the first part of our unique CXS Stock Selection System. You've probably heard someone who's enjoyed great success say, "I've worked for 20 years and all of a sudden I'm an overnight success." The identical principal applies to One-Day Wonders.

investments. Let me explain why this is totally false when it comes to what we do. One-Day Wonder Stocks are actually solid, cash-flow-positive companies with a demonstrated history of earnings growth and able top management.

We Buy Them Right Before Their Plans Pay Off... in a Big Way

By monitoring them on a daily basis, talking to management, knowing their businesses inside and out, we're able to purchase them at a point right before their business strategy pays off and right before the rest of the public finds out that they even exist. That's the critical moment -- the summation of their efforts.

This is **ALWAYS** when the greatest gains are made. The transition from unknown to known. That's precisely what we look for. Although the stock

The enterprises we meticulously track were founded with the idea of producing a unique service or product. When their strategies reach that critical mass -- and the payoff is just around the corner -- that's when we jump in with both feet and grab

goes up in price within a few days or less, months or years have been devoted to working on a successful business that creates an opportunity of this magnitude.

as much stock as we can get. Timing is everything in investment success -- and these stocks are proof of it. Let me give you three specific real-life examples of how seemingly small events almost no one notices can trigger huge stock increases...

4Kids Entertainment -- From \$1.29 to \$90: They license rights to entertainment companies. And they had shrewdly acquired the rights to market the Pokemon name in America. We knew the payoff time had arrived. This stock went from \$1.29 to \$90. And it completely relied on that one magic moment of success we had so carefully tracked. \$1.29 to \$90 is nearly 70 times your money.

Pacific Magtron International -- Up 52% in a Day: They received a \$1 million investment from some smart insiders. The stock was about to soar. It was obvious. Here was an opportunity to make spectacular returns in a day. The stock rose from 52 cents to hit 79 cents. Imagine earning 52% in a just a few hours.

Drugstore.com -- 65% Gains in Under Two Months: The last of the great dot-commers racked up gains in no time at all... and the average investor never even knew about it. Wall Street declared the Internet sector dead, but that didn't stop our subscribers from getting in on this great opportunity in this "untouchable" industry. Thanks to the CXS System, subscribers had the chance to pull in 65% from a "black

sheep" of Wall Street.

Forget the Unpredictable Market -- Get Some Sleep and Pile up Profits... We Make It Easy to Invest in These Stocks

The most important point is this: These gains occur because of an event within the company such as the launching of a new blockbuster product, the consummation of an acquisition, the signing of a key agreement or any number of other positive developments. NOT because of the stock market. And since the stock is so unknown and so low in price, the moment Wall Street notices it, like they did with 4Kids, the stock can soar beyond belief. That's the beauty of One-Day Wonders. Best of all, we do all the work. We tell you when to buy and when to sell. It's easy to invest in One-Day Wonders.

But that's not all. Another key element of our system is RAS -- our Risk Avoidance Strategy. It's an extraordinarily simple way of minimizing your risk.

RAS simply means that you invest a small amount in the beginning. When you have a gain, you withdraw your original investment so you're now investing only your winning profits. Your original capital remains safe. Why everyone doesn't do this is a complete mystery to me.

There Are Around 9,215 Public Companies. The Average Brokerage House Tracks Maybe 15 to 25 of Them. This Leaves an Untapped Gold Mine for Us...

Our One-Day Wonders have **NOTHING** to do with what Martha

Stewart knew or didn't know or how sleazy brokers regularly mislead investors by putting them in falling stocks their fat-cat clients are selling. And that's exactly why I call these stocks "the invisible stock market." Almost no one knows about them. That's why we're the first to reap such rich gains.

The essence of our success is finding little-known stocks with enormous value built into them that no one knows about. At best, the average brokerage house follows maybe 15 to 25 companies. Considering that between the Nasdag and NYSE, you have around 9,215 companies, they haven't even scratched the surface. Catching these One-Day Wonders requires continuous monitoring, contact with management, watching public filings and getting top-level information from the leading experts in their industries and our extensive "off-therecord" contacts. This is essential. And we have an entire staff that does this.

We also have the considerable logistical and financial support of one of America's largest, privately held publishers with revenue in excess of \$90 million a year. For the average

Test Out Our

Convince Yourself of the
ENORMOUS Profits You
Can Quickly Earn

If you're like me, you're totally fed up with investment advice that results in nothing but losses. This sort of thing wouldn't happen if the world was fair -- but you and I know that it's not. Big shots on Wall Street have gotten away with criminal acts that should earn them 10 to 15 years in the slammer -- but that's another story.

This Is Advice That Comes With a Money-Back Guarantee. I'm That investor, it's virtually impossible to stay on top of these changing events. And the secret to succeeding is to NEVER miss a single bit of information. Why have we been so successful?

Every Penny Stock Must Pass These 7 Hurdles and They're Only Part of Our Proprietary Scientific CXS Stock Selection System

Our scientific CXS Stock Selection System is the essence of our success. I've told you about just one aspect of it. It's been refined to the point where we can make the bold offer saying that you can make 100% on your money in the next four months -- even in this volatile market.

You see, the CXS Stock Selection System uses certain mathematical formulas along with other important criteria such as powerful sales momentum, whether management has a big chunk of their own personal money tied up, reasonable stock options, positive cash flow, a

Sure It Will Work for You

When you decide to join us, I want you to do so with complete confidence. That's why I suggest the following. If you prefer, before you put a cent in the stocks we recommend, put them in a paper portfolio where you can track their progress. This way you can test out our advice without investing a cent. I suggest this because I want you to see what we can do in advance. Show the picks to your friends. Get the advice of others. Listen to the opinion of someone you know and trust.

My Promise: You Have to Make 100% on Your Money in 4 Months -- Or Everything I Send You Is Completely FREE

We couldn't survive with an offer like this if we weren't right more often than not. I can't think of a single other service

history of successful new product introductions in growth fields, years of being in business, a low-priced stock and a low company profile in an industry that has a bright future. In fact, every recommendation you get from us must meet or beat one of the following cash creation criteria:

that offers you the same.
Why? They simply don't have
the confidence in what they tell
you. They may think that
they're right -- but they're NOT
willing to bet their own money
on it. We are!

1 • Rock-Solid Foundation -- We don't want promises, we want performance. And you want profits -- now. So only strong, healthy companies -- already making money -- are recommended. In fact, we recommend only companies growing both their gross and their net revenues at rates superior to their industries.

Example: We found a major bed-manufacturing company that was growing its sales at a double-digit clip. Its earnings were up huge, and it was trading for 42% less than its peers. It was just a matter of time before this fundamentally sound stock rose big. And it did. **Penny Stock Fortunes** readers had the chance to rake in over 73% in profits -- quickly and safely.

2. A Top-Quality Management Team -- Before we recommend a company for your consideration, we like to talk directly to the people in charge. We look for entrepreneurs with fire in their eyes... bean counters with their feet on the ground... and overachievers with energy to burn. How important are those considerations? Well, where would Intel have been without Andy Grove... Dell Computers without Mike Dell... and McDonald's without Ray Kroc? Their burning ambition

can make you rich.

Example: A recent *Penny Stock Fortunes* recommendation is one of the few survivors from the dot-com era. And it's no wonder why. This company has a solid team of executives running the business. Sales are increasing at a 27% clip. It's bringing in thousands of new customers and it's making a bid to become one of the few Internet companies to turn a profit. That's why we recommended it at \$2.50 and told readers to sell at \$4.14, a 65.6% gain.

3. Moneymaking Products -- We don't like "great ideas" that sound wonderful but will never make a penny. We've just seen a ton of companies with stuff like that, and we avoid them like crazy. We want to see money in the bank because they're making a fortune on a proprietary service -- precisely like the four stocks in my FREE report Overnight Riches: 4 Scientifically Selected One-Day Wonders.

Example: Take One-Day Wonder Stock #2. You'll read about it in a moment. It's in an \$89 BILLION industry. Sales and net income are both rising quickly, and investors are just starting to find out about this moneymaking machine. Get in now and watch your money multiply quickly!

4 The Stealth Stage Advantage -- We all know about the Stealth Bomber; it flies below the radar until it suddenly breaks into view and blows everyone away. Well, when we find a low-price stock at the Stealth Stage, the mainstream has NOT yet discovered it. Timing is everything. You want to be first in line. That's critical. If a stock is

relatively known, we avoid it.

Example: You'll soon discover One-Day Wonder #1 is a prime example. When you think of medical epidemics in the United States, how many people think "nurse shortage"? You should. We're short over 120,000 nurses right now. And that number could swell to 400,000 by 2020. One-Day Wonder #1 has a temporary nurse staff of over 40,000. Every hospital in the country may be knocking on its door soon. And if they do, this stock could rise 236% or more in just days.

5 Maximum Growth Potential -- Simply put, we only consider stocks in expanding markets. So we only recommend companies that can quickly double or triple in size -- doubling or tripling your profits along with them.

Example: Virtually all four One-Day Wonders we profile have niche markets that are highly profitable, growing rapidly and remain little known. Their basic industries are in high gear, not stuck in the mud like the many so-called growth stocks that fizzled out.

6 Strong Profit Acceleration Rate -- This sounds elaborate, but it simply means this: Sales from the most recent quarter must be higher than sales from the previous quarter. When that happens, it's a highly positive sign.

7 Maximum Profit Potential -- Remember the WORLD'S OLDEST

WEALTH SECRET? The very essence of it is: The successful investor only uses a little to make a lot. That translates to buy low and sell high. That's why you will only receive stock recommendations that can at least double in value.

Example: Our entire record. In the past three months the **Penny Stock Fortunes** portfolio is up well over 20%. And that's not including winners that are up 166%, 38.9%, 23.7%, 24.1%, 23.8% and 22.3%. Who else has a record of making so much money this quickly in safe, solid enterprises Wall Street has never heard of? We combine conservative, detailed analysis with the most profitable group of stocks in America.

There's Much More: This Is Not a "Computer Program" System That Depends on Some Formula That Occasionally Works. We Go the Extra Mile.

If it were possible to figure out how to consistently make money in the stock market using computers and a software program, the Forbes 400 list would be much bigger. It's not possible -- and that's why no one has done it. This brings up a vital point.

Our CXS Scientific Stock Selection System finds stocks that financially fit our strict profile, but it's only a part of the entire selection system. The final step is our seasoned, time-tested judgment about the timing of the payoff at hand. In other words, when the company is just about to benefit from management's plans -- the fruition of their efforts. I briefly mentioned this idea earlier.

Burning the Midnight Oil to Confirm Every Single Fact...

Our investigative efforts are wide-ranging and excruciatingly detailed. This is where our years of experience come into play for you. No one else is doing what we do. Before we're satisfied, we will have spoken to management time and time again, talked to competitors, checked out potential contracts, analyzed the future profitability of new products, reviewed their financial condition in detail, made sure the future sales growth will far exceed the industry average -- all the steps required to assure ourselves that there's fabulous news about to break -- and we're FIRST in line to grab the lion's share of the profits.

No one else in America combines our CXS Scientific Stock Selection System along with our hands-on approach of personally analyzing the facts and making seasoned judgments. Next: Four One-Day Wonders we're very excited about. Here's where you see this unique system in action...
