A Special Report From Former U.S. Congressman Robert E. Bauman (J.D.)

Washington's Dirty Secret - that even the Media Establishment won't touch

A small group of Washington and Wall Street insiders is secretly playing "God" with the markets. If they slip up one more time...it may cost you half your remaining portfolio...

In this Special Report:

- Washington's Secret "Plunge Protection Team" (whose latest "unorthodox" actions may cost you half your retirement savings)
- How to Shock-Proof Your Wealth Against Economic and Geopolitical Disaster...and why you must take urgent action NOW!
- How to Turn the Tables on Wall Street and Invest Like the Super Rich!
- The Only Stocks You Should Be Invested in Today!
- How to Make 658% Gains Outside the U.S. Market
- The World's Best Performing Mutual Fund (Up 62% Last Year!)

• The *Easiest* Money to be Made *Anywhere* Today (Bush and Greenspan are practically giving away profits!

Dear Friend,

Five months after Black Monday - Executive Order 12631 was quietly signed into law. Today, it's about to explode in the face of millions of investors...

This Executive Order (signed without media coverage or fanfare) led to the formation of a closely-knit and secretive group of political and financial titans.

This Team includes none other than Fed Chairman Alan Greenspan, the Secretary of the Treasury, and the heads of the SEC and the Commodity Futures Trading Association. It also works closely with the heads of the various stock exchanges and the big Wall Street banks including: Citibank, JP Morgan Chase, Goldman Sachs and Merrill Lynch.

The group is now known on Wall Street today as the "Plunge Protection Team".

This tight little frat team's role is to ensure that a Black Monday scenario never occurs again.

Yet despite its enormous resources it has only succeeded in bringing about the very disaster it was supposed to avoid. It helped turn the bull market into a bubble...and the bear market into a bomb-like bust. Worse, the damage it's caused has only just begun...

In this special report you'll learn about <u>the most closely guarded secrets of the "Plunge Protection Team" (PPT).</u> You'll learn how they've begun to engage in dangerous and illegal measures that could jeopardize the financial futures of millions of unsuspecting Americans.

But you'll also learn about a powerful age-old financial device that can protect you from the coming economic turmoil. Plus you'll learn how a hand-full of well-informed investors have used this device to rack up extraordinary gains in the past few years - whilst millions of Americans watched their retirement dreams get washed away.

This group have not only been preserving their capital against a falling dollar and a collapsing economy - but they've been racking up extraordinary gains of 658%...193%...158%... and more - simply by capitalizing on lucrative investment opportunities <u>outside</u> the U.S. markets and the Wall Street way of thinking. Problem is, **the average**American investor doesn't even know these opportunities exist...

That's why I'm writing to you today...to introduce you to these little-known investments and strategies. (Until recently many of them were almost exclusively enjoyed by the super rich. Today I'll show you how you can take advantage of them too).

My name is Robert Bauman. I was a former U.S. Congressman for the State of Maryland. Through the years I've seen a lot of changes in Washington. I was a 15-year old Page Boy when I witnessed Dwight Eisenhower's first State of the Union address. And I was a 35-year-old Congressman when I heard Richard Nixon deliver one of his last speeches. In between there was Kennedy, Johnson and later Ford and Carter. I've lived through 40 years of State of the Union addresses. But I've never seen anything like the mess America is in today. Frankly it's terrifying. Add to it a war on terrorism - and it's a recipe for sure disaster.

In a moment I'll tell you about exclusive investment opportunities that can protect you from this...but first let me tell you why it's absolutely *urgent* you take advantage of them NOW...

Buyer Beware: The Rallies are Rigged

In the past few years there have only been three major long-term rallies. They began on September 17, 2001...July 24, 2002...and October 7, 2002...

On each of these dates a number of curious events occurred...

The markets opened and the indices began plunging recklessly...But by early afternoon it was if the angels had arrived...and the markets were brought back from the brink of collapse...

Each time a large unnamed buyer in the futures market secretly swept in and bought up massive quantities of S&P future contracts - making reckless bets that the S&P would go up - even though it was obvious that it was going to fall. This is a sure way to get rid of a lot money - very quickly. However, because such a large amount of money was

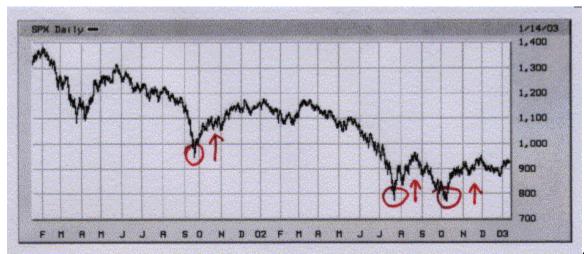

wagered on the S&P's rise - it was actually enough to reverse the market's fate.

This simple trick was first suggested by Robert Heller - a Federal Reserve Governor - in 1989 (the year after the creation of the Plunge Protection Team). He argued that it would be an easy way to rig the markets...

The move (so far) has successfully brought the markets back each time...even so much as to completely reverse the market's fate and transform the crisis into a rally...further propping up the already way overvalued indices...

Don't believe the PPT could engage in such "unconventional" measures?

The PPT Rallies: Blatant manipulation of the highest order:

On each of these dates the markets were ght up large amounts of S&P future

plunging precipitously. Then a huge unnamed buyer secretly came in and bought up large amounts of S&P future contracts...reversing the market's fate and transforming the crisis into a false rally...

One of the rallies began after the September 11 terrorist attacks. The markets managed to show an astounding rise for 3 to 4 months proceeding the attacks. The U.S. media called it a "patriotic rally". The European Press (more accurately) called it a "PPT (Plunge Protection Team) rally". Another rally began on July 24, 2002 amidst the shocking news of the unprecedented corporate accounting scandals - an event that should have sent markets spiraling.

The European Press again referred to it as a "PPT rally".

What's more at the Federal Open Market Committee meeting held on Jan 29-30, 2002 the Fed pondered using "unconventional methods" to stimulate the economy. Even more shocking: earlier this year the *Financial Times* (London) quoted a Fed official <u>who did not want to be named</u> as saying one of the extraordinary measures considered in January was "buying U.S. equities".

Plus a number of curiously understated articles in the popular press have also begun to acknowledge the existence of the Plunge Protection Team - and the dangerous actions its begun to engage in, including the *Washington Post*, *Sydney Morning Herald*, the *Guardian* (London) and the *New York Post*.

To quote the *New York Post*:

"Forget everything else - this is the most important thing you need to consider right now if you are thinking of getting into the stock market...If the FT and my suspicions are correct Washington is getting into dangerous territory".

Get out of U.S. stocks NOW...

Before these rigging adventures turn into a complete economic disaster...

Instead of protecting you...Washington and Wall Street managed to blow up one of the greatest economic bubbles in stock market history. They trumpeted the glories of the "New Economic Era"...hailed the stock market and mutual funds as the greatest place to put your money...rushed through new banking laws like the Gramm-Leach-Bliley Act which deregulated the banking system...and (although few investors know it) **this law paved the way for all the broker and corporate accounting scandals that we are still seeing on Wall Street today.** It allowed investment houses to push stocks that they were privately underwriting...and allowed brokers to get rich off commissions while people like you and me were encouraged to stay in stocks until they were practically worthless.

And this law was pitched to us as "reform".

Wall Street was geared toward inflating the bubble. Everyone was shouting "Buy...buy." And the top names in finance were behind it.

Now they're desperately trying to engineer a soft landing. Unfortunately, it's too little...too late...Trillions have vaporized off American markets. Consumer debt has reached a staggering \$1.78 trillion, mortgage repayment delinquencies are reaching all-time highs...and the national debt continues to soar...

Don't believe the Plunge Protection Team exists?

Take a look at these tell-tale reports from the popular press...

On February 23, 1997 the *Washington Post* published an article acknowledging the existence of the Plunge Protection Team. This was the first article ever to feature a story in the mainstream press on this secret government team.

On April 5th 2000 the *New York Post* online reported: "...something happened at around 1.00pm our time yesterday that pulled the stock market back from the edge of the cliff...one minute the NASDAQ was down 11%...and then it suddenly rallied several hundred points in the matter of an hour". Once again - *someone started buying large amounts of stock index future contracts through Goldman Sachs and Merrill Lynch - though neither brokerage firm (the article admitted) would comment on who made these purchases.* The article later admitted the existence of the Plunge Protection Team.

On October 13, 2000 The Sydney Morning

How to Shock-Proof Your Wealth Against Economic and Geopolitical Disasters

These are dangerous times. We are ruled by a government obsessed with the short-term - showing flagrant disregard for the long-term. This puts us all in jeopardy - every single American. And the more invested in America you are, including real estate, bank accounts, stocks, bonds and the once rock-solid American currency - the more trouble you might be in.

But I'm writing to tell you that you don't need to get caught in the aftermath of a giant economic or geopolitical disaster. There are ways out of this. Ways that are <u>safe</u>, <u>easy</u> - and <u>enormously</u> <u>profitable</u>. But you won't find them by following the Wall Street mindset or by following the crowd mentality.

That's why I want to introduce you to a small group of European and American millionaires. We call ourselves The Sovereign Society. And we have long abandoned the wild Wall Street approach to investing. Many of the strategies and investments we've tapped into are rarely even discussed - let alone accessed - by the young brash brokers on Wall Street. Since March 2000 - when major indices have plunged the globe over - we've been making extraordinary gains - *outside* the American market and the Wall Street way of thinking. What's more we've done it effortlessly.

Herald in an article entitled "Angels from on high drag markets to safer ground" sited a classic case of "divine intervention". It was Wednesday October 11th...the Dow Jones Industrial Average plunged 435 points (4.3%) and the NASDAQ plummeted 187 points (5.8%) in the first 10 minutes of trading. Then as the article stated "the angels arrived". The market rebounded miraculously. The DOW only ended 1.7% down for the day and the NASDAQ was down just 1.32%. The next day the markets rallied. The thing is, nobody knew why. Traders were stunned at the turnaround. What was clear is that the reversal was engineered in the futures market. It took a lot of heavy buying by the major Wall Street Houses to bring the market back that day - but no one would reveal the source of the buyers.

The Guardian reported on Sunday September 16th, 2001 - 5 days after the September 11 terrorist attacks - "...that a secretive committee...dubbed 'the plunge protection team'...is ready to coordinate intervention by the Federal Reserve on an unprecedented scale. The Fed supported by the banks, will buy equities from mutual funds and other institutional sellers..."

A **New York Post** writer had a telephone conversation with a very worried Fed official on September 17, 2001 - the day the stock markets reopened after the terrorist attacks.

We are not, however, some fly-by-night investment "gurus" pushing the latest Wall Street stock. In fact, it is this very type of advice that we are against. It's this type of advice that helped contribute to the great financial mess America is in. On the contrary we combine simple time-tested strategies with other alternative investments like special types of funds, foreign annuities, foreign currencies, precious metals and global stocks - to help our members create a well-balanced portfolio. Our portfolios are designed to withstand any kind of economic or geopolitical shock. We employ a strict investment philosophy that above everything ensures the <u>safety</u> and <u>security</u> of our member's capital.

Not to say we haven't enjoyed some spectacular gains.

And this is your unique opportunity to join us.

Easy Money - <u>Outside</u> the U.S Market

Before I tell you more about us - let me show you the kind of easy money we've been making...and let me explain how we've managed to maintain an almost perfect track record - even through one of the worst times in economic history. You may think we're some kind of financial geniuses - but we're not. We've just managed to tap into some of the world's top money managers and capitalize on some of their techniques. But our main strategies are very simple - and these volatile times have actually worked for us. As our experts will tell you - these are in fact the easiest times to make money - as long as you pay homage to history.

They discussed how the Fed could easily intervene in the market by purchasing stock index future contracts - as it's an inexpensive and apparently foolproof way of rigging the market without leaving a trace.

An article in the *Financial Times* on Feb 21, 2002 about Japan's Stock Buying Body and the Plunge Protection Team commented that it was... "Arguable the PPT's motions helped quell the tides in September." They later said that "...government backed equity markets, as Japan has recently become aware, do not work...Plunge protecting the world's markets may be a hazardous pursuit."

Since 1890 - history has shown us that in times of economic uncertainty there are a number of asset classes that do well. They are hard currencies, commodity currencies, precious metals, gold stocks, foreign bonds and emerging market investments.

By capitalizing on these trends we've been able to make some very impressive gains - very easily. Last year we made annualized gains of 193%, 158%, 105% on our global gold stocks...62% on one of the world's top-performing mutual funds...25% on precious metals...Plus we made 656% gains in just a few short months on a simple currency bet...And we made ultra-safe conservative gains on every offshore hedge fund we picked last year - and this was at a time when the vast majority of American mutual funds were crashing.

The problem is many of these alternative investments are not available in the U.S. As a result, the majority of American investors have missed out on some of the world's most profitable opportunities. For example, one of the world's best-performing mutual funds in the past five years was Gresham House Investment Trust - up 688%. But as this fund is managed offshore it is "off-limits" to most Americans. But there is a way you can legally access these opportunities. It's a method that until recently was mainly enjoyed by the super rich...

How to Turn the Tables on Wall Street... And Invest Like the Super Rich!

The easiest way to gain <u>instant</u>, <u>legal</u> and <u>unrestricted</u> access to this whole other world of lucrative investment opportunities is by having an offshore bank account.

As a member of the Sovereign Society one of the most extraordinary and powerful benefits you'll receive is the opportunity to open up one of these very accounts. In fact, through the Sovereign Society's powerful array of global contacts, we've already arranged to have a number of these accounts especially reserved for you. They are waiting for you at three of Europe's leading private banks. **The banks rank among some of the world's oldest and strongest**

financial institutions. And they are situated in the world's leading financial havens: Switzerland, Austria and Denmark.

Historically these places are the traditional havens of choice in times of economic uncertainty. The currencies, companies and investments in these places are soaring at the moment - as the world's money floods into them in search of safety and profits.

What's more in these havens accounting practices, investment banks and money managers are so tightly regulated, that the accounting frauds, number-fudging and broker scandals that are still breaking out on Wall Street today could never occur here. Their strict practices, strong institutions and experienced advisors make Wall Street look like the Wild West. You can be comforted knowing that your money will be growing safely and steadily - away from rigged markets, a crumbling economy, a crashing dollar, rogue traders, corrupt Wall Street brokers and the self-serving institutions they work for.

Access to a Whole New World of Financial Opportunity

In addition to being able to monitor and access your account online...you'll be able to:

- Access a whole new world of global investment opportunities...including each one of the lucrative investment opportunities I'll tell you about in this letter. (A benefit most Americans will sadly never know).
- Trade stocks, bonds, mutual funds, CDs, precious metals and currencies on markets everywhere...
- Employ Nobel Prize winning investment strategies with the indisputable leaders in financial integrity...
- Gain unrivalled asset protection in countries that have been the traditional havens of choice by the world's wealthiest families in times of war, scandal and economic upheaval.
- Diversify your assets out of American dollars and convert them into currencies set to soar against the dollar in the volatile times ahead like the rock-solid Swiss franc, the Euro and many more commodity currencies...
- Gain coveted access to some of the world's most trusted and established financial analysts and money managers. These are not young brash Wall Street brokers peddling stocks that benefit them rather than you. They are experienced analysts that have managed the fortunes of institutional investors and the world's wealthiest families for decades, riding them safely through economic disaster after economic disaster from the inflationary seventies to Black Monday and beyond almost doubling their money safely and surely every five years using sophisticated investment systems that have stood the test of time. These are the kinds of

analysts you'll want managing your money in the volatile times ahead.

You'll get more details about your accounts (and the banks at which they're held) in a special report we'll send you when you join. This is a truly unique and powerful benefit that is simply not available to the average American investor. And we are only able to offer it thanks to our powerful array of global connections.

But this is just the beginning. Many lucrative investment opportunities await you once you have your offshore account...opportunities that until recently have only been enjoyed by the *wealthiest* of American families. Now you can profit from them too...

Access the World's Best-Performing Funds!

In the past few years offshore hedge funds which often trade alternative asset classes...have been among the best-performing funds in the world. Now these aren't your average offshore hedge fund of the nineties - which had rather a risky reputation. Those funds were often run by big Wall Street legends like George Soros and Julian Robertson who would make big bets on currencies, stocks, bonds and interest rates. They were considered high-risk and were largely tools for the super rich - requiring \$1 million dollar minimum investments.

But you no longer need to fork over \$1 million dollar minimums to get in on this lucrative investment opportunity. It's possible to buy into these sophisticated low-risk funds now for as little as \$5,000.

A Perfect Track Record!

Last year every offshore hedge fund recommendation we made came up trumps! This was at a time when traditional mutual funds and stock indices were crashing the globe over. The S&P shed 23%. NASDAQ was down 31%. And the Dow was down 17%. But our ultrasafe funds trading alternative asset classes performed fine.

The Sovereign Society chooses its funds with the greatest of care. We scour the world for low risk funds that offer high returns. We choose funds that employ the world's top money managers - and who trade asset classes that do well in all market conditions - particularly at volatile times.

These are the funds you'll want your money in over the next few years. They can help restore the capital you've lost from the Wall Street stock and mutual fund massacre. To join us click on the 'subscribe now' button below, fill out the necessary information and submit your order. Your Membership will be activated immediately and a whole new world of financial

possibilities will be opened to you.

Last year every offshore hedge fund we recommended to our members came up trumps. We made ultra-safe gains of 15%...11%...and 8% - during the worst bear market since 1939-41. In a special report we'll send you when you join us you'll find out about our top fund picks for the times ahead. Plus we'll show you a *legal*, *little-known* - and *tax-efficient* way - that you can buy these funds through your offshore bank! Yes, not only can you be enjoying safe above market-average returns - but you can further enhance those returns by legally watching them compound tax-free!

Truly these proven, preferred strategies of the super rich - will change the way you invest forever

193% Gains in Global Gold Stocks!

Now is the greatest time to get in on global gold stocks! Gold is entering its strongest phase for the first time in two decades.

What's more in times of uncertainty gold *shares* out-perform gold. For instance in the last great gold rise - gold soared 26% - but **gold stocks soared an average of 130%**. And in the Great Depression gold shares soared during 1930 - 1935 - whilst other shares collapsed 80%!

Last year 8 out of our 10 gold recommendations came through for us:

Harmony Gold (HMY)	+158.22%
ASA (ASA)	+105.93%
Placer Dome (PDG)	+3.79%
Agnico Eagle (AEM)	+50.25%
Anglo-American (AAUK)	-8.18%
Durban Deep (DROOY)	+193.48%
Agnico Eagle (AEM)	+50.57%
Newmont Mining (NEM)	+ 52.07%
Homestake (HM) now Barrick Gold (ABX)	-4.88%

GoldCorp (GG) +108.55%	
[400001) (44)	

This is how we've been helping new members win back the money they've lost in the past few years. But again - don't think we're some kind of investment geniuses. We're not. Gold was one of last years' best-performing sectors. We just capitalized on the trend. But we expect gold to continue being one of the best-performing sectors in the volatile times ahead. So there's still plenty of gains to be won. You'll find out about our latest top gold recommendations in a special private bulletin we'll send you each month. (I'll tell you more about this special benefit in a moment)...

658% Gains - Outside the U.S. market

Here are some more ways we've been making easy money - outside the U.S. market. In the months ahead you'll be able to capitalize on these strategies too. In fact, you'll learn about many of these strategies and how to profit from them in the special private bulletins we'll send you each month. Plus you'll get the best of them in a special free report we'll send you when you join us called *How to Shock-Proof Your Wealth Against Economic and Geopolitical Disaster*.

How we Maintain an Almost Perfect Track Record in Times of Chaos

The Sovereign Society combines simple time-tested strategies and other alternative investments including special types of funds, foreign annuities, foreign currencies, precious metals and gold stocks - to help you create a well-balanced portfolio.

Our advisors and their global network of contacts preen global markets looking for low-risk, high-return opportunities. Every recommendation we make has been meticulously chosen - and must be in

- 658% Gains on a simple currency bet. Our hand picked investment advisors knew to capitalize on the uncertainty in the American market. In May 2002 we recommended buying 90-cent euro calls. They were trading at \$1,125 at the time. Just 3 months later they went up to \$8,575. That play made our members 658% gains in just a few short months! Yes six times our money in just a few short months. We made a similar play the year before on the Swiss franc...and netted our members 88% gains in just a few short months. But don't think you've missed out. We believe many more of these lucrative opportunities are coming up in the volatile months ahead. We'll show you how to take advantage of them.
- 62% on one of the World's Top-Performing Mutual Funds.

alignment with the Council of Experts particular philosophy and its investment consensus. It must be ultra-safe and offer at the very least a small real return. By employing this strict investment philosophy it ensures the safety and security of our member's capital.

Out of a universe of more than 50,000 mutual funds Sovereign Society managed to pick one of the top performing funds since March 2000. Last year the fund was up a staggering 62% - when the S&P plunged 23%. Your free special report will tell you how to get in on this top-performing mutual fund.

- **Big money on gold and precious metals.** Last year our members made 25% on the world's oldest investment gold. Many investors are wanting to diversify into precious metals at the moment and with good reason but most just don't know the most cost-effective and easiest way to do it. You'll learn how in your free report. It's a special *ultra-safe* program where your metals are *guaranteed* by the Western Australian Government who have been given a triple AAA rating from Standard & Poors.
- 17% annual gains on an incredible Emerging Markets Multi-Fund. This is a revolutionary new way to make safe gains in emerging markets. It is a fund of funds which has repeatedly won performance awards by London's Investment International Magazine. Since 1992 the fund has earned 10% per annum. And over this very volatile period gains have exceeded 17% each year! What's more, the fund has logged profits virtually every month since September 11! Name one American mutual fund that's done that. If the fund keeps going at this rate as we expect it too you could double your money in just over 3 years. You'll learn all about it in your free report.
- The Easiest Money to be Made Anywhere Today. Last year we picked up some of the easiest profits in the world just by betting against the U.S. dollar. While most Americans sat hopelessly by as the dollar crashed witnessing yet another 20-30% get wiped off their retirement nest eggs we made gains of 16.4% and 18.4% simply by switching our American dollars into Euros and Swiss francs. And there is plenty more to be made this coming year in currencies. In fact, <u>Bush and Greenspan are practically giving away profits</u> as they continue to let the air out of the over-inflated dollar. Our team of Swiss bankers, currency experts and global investment advisors will tell you the 6 currencies set to soar against the dollar over the coming year no matter what happens. And we'll show you the easiest and most cost-effective way to invest in them.

As I said, this is easy money. So much easier than the methods those poor young Wall Street brokers are employing today.

Your Own Plunge Protection Team!

As you can see the Sovereign Society's track record is quite impressive. And it's because we've paid homage to history...capitalized on some obvious financial trends...and stuck to a strict investment philosophy.

I sincerely hope I've convinced you to join us.

These are dangerous times to be trapped in American markets and the American dollar. Greenspan, the Bush Administration and their bungled economic policies have put the U.S. economy in the worst shape it's ever been in. The economy is teetering on the brink of the greatest collapse since 1929. But the Sovereign Society can open you up to a whole new world of financial opportunity.

As a member you'll get access to an unrivalled team of 45 financial and professional advisors, including top Swiss and Austrian bankers, money managers, global fund managers, famous investment authors, asset protection specialists and privacy experts. These people are masters in asset preservation. They will act as your own Plunge Protection Team. They will look out for you...open doors for you...and steer you safely and profitably through the volatile times ahead...

You're probably thinking that access to these advisors is going to cost you a small fortune. But don't worry. It's not.

You can access them all - for less than the cost of a single consultation!

Through our special private monthly advisory letter called *The Sovereign Individual* you'll gain access to this unrivalled team of financial and professional advisors. In *The Sovereign Individual* you'll find the hottest global gold stocks, oil stocks, alternative funds, currency investments and precious metal investments. You'll also find out about private banking strategies, computer privacy techniques, offshore tax havens, second passports, global business opportunities, offshore e-commerce strategies, asset protection techniques and many other things related to the offshore financial world. Offshore investment advice is just one part of the Sovereign Society. Our global network of contacts scour the globe each month for the finest opportunities the world can offer you...opportunities that can make your life *richer*, *safer* and *better*.

And in *The Sovereign Individual*, we aren't afraid to tell it as it is. You won't get the regular spin from the elite

Street Journal and Newsweek are talking about us... how The Sovereign Society "the offshore investment advisory group" can help you move cash, stocks and bonds offshore for asset preservation. Our legal offshore tax strategies have been quoted to have caused the IRS "deep concern" on the front page of the Wall Street Journal! Truth is - they see our group as a threat to their ailing economy. They want you to keep your money invested in their artificially propped-up markets. We warn people against this. We expose the truth...tell you how it really is...and step on people's toes - to help people like you avoid the ravages of a corrupt and recklessly run economy...

You'll also hear from me personally three times a week in *The Offshore A-Letter*. I'll keep you up-to-date on the state of the economy...what the U.S. government is up to...and urgent things you can do to keep your portfolio and your life safe and secure. Over 60,000 readers a week tune in to what we have to say in *The Offshore A-Letter*. It's the most successful and widely read offshore e-letter in the world. And it'll come to you free - 3 times a week. Join us today and you'll get an e-mail from me within the next few days!

Your 3 Free Reports!

In addition to *The Sovereign Individual*, *The Offshore A-Letter* and your offshore bank introductions you'll also get three important free reports:

- 1. How to Shock-Proof Your Wealth Against Economic and Geopolitical Disaster. This special report combines the very best of our investment recommendations. It shows you immediately in one easy-to-read report what you should do with your money today. It shows you how to profit from the current economic trends...and pick up the easy gains I've talked about in this letter. Even if you got nothing else from us this would be worth your membership fee many times over.
- 2. **The Offshore Convenient Account.** This report will tell you all about your exclusive offshore banking options. You'll learn about the powerful banks and the leading financial havens where your accounts are being held...plus you'll learn how to use your account legally and efficiently. Your offshore bank account is your gateway to the many profitable opportunities I've mentioned in this letter. It is a truly unique and privileged benefit of Society Membership. The super rich who are lucky enough to have the right contacts pay thousands of dollars to advisors to open offshore bank accounts for them. But as a member of the Sovereign Society this extraordinary benefit is yours free.

3. **Your Offshore Nest-Egg.** In this special report you'll learn how to build a safe and profitable nest egg offshore...far away from the corrupt institutions and brokers on Wall Street - and far away from the declining U.S. markets. This report will show you some of the most powerful ways to shelter your assets from taxes, sue-happy lawyers and market crashes.

Crisis Investing at its Finest

In the month of the September 11 terrorist attacks - one of the worst months in financial history -look at how our investments did:

- Swiss franc up 6% against the U.S. dollar in just 9 days!
- Gold up \$20 an ounce in one week!
- The Prudent Bear Fund up 29.5% for the month!
- Our Offshore Hedge Funds up an average of 2.5% for the month (annualized 30%)
- Our Global Gold stocks up an average of 14% in just one month! (annualized 168%)

This was at a time when investors were getting thrashed on Wall Street. Who would you like to trust your money too in the volatile times ahead? Wall Street or an unrivalled team of 45 financial advisors - many of whom are masters in asset preservation.

You can join the Sovereign Society and access this team for less than the price of a single consultation. Just click on the 'subscribe now' buton below, fill out the appropriate information

The Best \$99 Investment You'll Ever Make!

For the modest yearly membership fee of \$99 - you'll get access to all of these extraordinary benefits, including:

- 1. Advice from an unrivalled team of 45 financial and professional advisors. (A single consultation with just one of our advisors can be upwards of \$700 an hour plus airfares and flying time! But you'll get access to all of them as a benefit of membership).
- 2. *The Sovereign Individual*. Your monthly private advisory letter packed with alternative investments and strategies that you won't find on the pages of the *Wall Street Journal* or *Barrons*...plus asset protection techniques, privacy strategies, offshore retirement havens, e-commerce opportunities, tax strategies and much more!
- 3. The opportunity to open offshore bank accounts at one or more top European banks...where your money can be safe...and you can gain unrestricted access to investment opportunities everywhere.
- 4. *The Offshore A-Letter*. The world's most popular offshore e-letter which will keep you in touch with global events that can affect your wealth and safety.

and submit your order. Your Membership will be activated immediately and a whole new world of financial possibilities will be opened to you.

Plus your free 3 reports

- 1. How to Shock-Proof Your Wealth Against Economic and Geopolitical Disaster (includes top strategies and investments chosen by Sovereign Society's panel of advisors)
- 2. *The Offshore Convenient Account* (includes everything you need to know about getting the most out of your offshore bank account).
- 3. *Your Offshore Nest Egg* (shows you how to build a safe and profitable nest egg far away from the troubled and rigged American markets).

I'm sure you'll agree this is an unbelievable bargain. And you'd be crazy not to take us up on it.

An Even Better Deal...

For an even better deal, sign up for two years for \$198 and we'll send you *Forbidden Knowledge: Information They Don't Want You to Know*. This 472-page manual combines many of the greatest secrets the Sovereign Society and our prestigious international advisory board have revealed over the years. In it you'll get the secret banking techniques that were quoted to have caused the IRS "deep concern" on the front page of the *Wall Street Journal...*the top international attorney's "blue print on how to legally avoid tax" (that Senator Moynihan publicly admitted he did NOT want reprinted)...the secret offshore device that could help you turn \$50,000 into \$1,000,000...and much more. It's yours FREE with a 2-year membership!

Respond Within 7 Days - and Save a Fortune in Tax!

I don't need to tell you - why it's imperative to start diversifying your assets offshore immediately. But to help you protect your wealth even further - I'm going to offer you an **enormous tax secret of the super rich** - **absolutely free** -

but only if you respond within the next 7 days.

I'll send you a special free report - that will show you how to invest in many of the opportunities I've mentioned in this letter - *tax-free*! And believe it or not - it's all *perfectly legal*! It's a special offshore retirement plan. It's actually one of the safest and most powerful offshore investment vehicles available today. But it's been used by kings, sheiks and the world's wealthiest families for decades to protect and boost their wealth. But these days, they come with even more benefits - currency-management options, access to the world's top money managers and the ability to compound your profits privately and safely tax-free!

I'll make sure you get this special report on this dynamic, wealth-preserving investment vehicle - so you can not only rack up enormous gains offshore - but further enhance them by legally sheltering them from taxes. Just click on the order button below. Your Membership will be activated immediately and a whole new world of financial possibilities will be opened to you.

Don't risk a Penny - Until You Are **Convinced!**

I'm hoping our track record alone - has *more* than convinced you to join us. But just in case you have any doubts, I want to give you a unique opportunity to take a risk-free look at us. In other words - you won't have to risk a penny until you are *convinced* that Sovereign Society Membership is right for you. If at any time you decide the Sovereign Society is not for you - just cancel your membership - and we will give you a pro-rated refund on your fees. No questions asked. But you can still keep your free reports - whatever you decide. That's our guarantee to you.

The Best Financial Protection Available Today

There has never been a more critical time to diversify your assets into safe havens offshore. If global chaos reigns - U.S. markets may close (as they did after September 11)...and a whole generation of stock and mutual fund investors will find themselves locked in a crashing market. They will be powerless to move. But you won't. Your assets will be safely diversified offshore. You'll never be left powerless to move. It's an essential hedge in today's economic climate - yet only the smartest of investors have it in place. Now you can too.

Plus while the U.S. stock market is crashing - you can be racking up huge gains - offshore! Because when stocks slide - hard currencies, commodities, alternative funds and precious metals - will soar. You can be positioned to profit - big

time - from any disaster the future may have in store for you! It's a win-win portfolio...and a completely new way of organizing your finances that the average American mutual fund investor will never know.

You will not only survive through the volatile years ahead...but you'll thrive. Your wealth will stand tall against whatever shocks and surprises the world throws at it. While terrorist attacks, wars, broker scandals, accounting scandals and economic disasters break out in America - you can be sitting smug far removed from the evils of Wall Street...racking up huge gains offshore...

I look forward to sharing and profiting with you in the fascinating months ahead!

Sincerely,

Robert Bauman, JD The Sovereign Society

P.S. The government has stolen our Social Security...manipulated markets...defrauded the public...and now the U.S. economy is pitter pattering precariously on the surface of the greatest economic bubble in history. But there's no reason you have to get caught in the aftermath of a giant economic or geopolitical disaster. There are markets out there that aren't rigged...in countries whose economics are sound...where you can be making easy gains - simply by taking advantage of obvious economic trends: 62% on one of the world's top performing funds...193% on global gold stocks...658% on simple currency bets. All these profits and more await you - outside the U.S. markets and the Wall Street way of thinking. Start capitalizing on them today!
